CERTIFICATE OF ACHIEVEMENT FOR EXCELLENCE IN FINANCIAL REPORTING

The Government Finance Officers Association of the United States and Canada awarded the New Mexico Educational Retirement Board a Certificate of Achievement for Excellence in Financial Reporting for its Comprehensive Annual Financial Report (CAFR) for the fiscal year ended June 30, 2017. The Certificate of Achievement is the highest form of recognition in governmental accounting and financial reporting, and its attainment represents a significant accomplishment by a government and its management. We believe our current CAFR also meets the Certificate of Achievement Program's requirements.

PUBLIC PENSION STANDARDS AWARD

The Public Pension Coordinating Council (PPCC) awarded a Pension Standards Award for Standards and Administration for the fiscal year ended June 30, 2018. This is the fourth consecutive year that the New Mexico Educational Retirement Board has achieved this prestigious award. To be awarded a Public Pension Standards Award, a public pension program must meet the professional standards for plan design and administration as set forth in the Public Pension Standards guideline. This award is valid for a period of one year.

November 21, 2018

To the Trustees and Members of the
New Mexico Educational Retirement Board:

We are pleased to present the fiscal year 2018 Comprehensive Annual Financial Report (CAFR). This report reflects the ongoing commitment of all activities undertaken by the New Mexico Educational Retirement Board (NMERB) for the fiscal year ended June 30, 2018. The year was marked by management's commitment to a sustainable and sound pension fund now and in the future.

Management assumes full responsibility for the completeness and reliability of the information in this report, based on a comprehensive framework of internal control that has been established for this purpose. CliftonLarsonAllen, LLP, Certified Public Accountants, have issued an unmodified opinion on the New Mexico Educational Retirement Board's financial statements for the year ended June 30, 2018. The independent auditors' report is located at the beginning of the financial section of this report. Management's discussion and analysis (MD&A) follows the independent auditors' report and provides a narrative introduction, overview, and analysis of the financial statements. The MD&A complements this letter of transmittal and should be read in conjunction with it.

BACKGROUND

The Educational Retirement Act (ERA) in 1957 established the NMERB Board of Trustees to administer the Educational Employees Retirement Plan (Plan). The Plan is a cost-sharing, multiple-employer pension plan established to provide retirement and disability benefits for certified teachers and other employees of the state's public schools, institutions of higher learning, and state agencies providing educational programs.

The Plan is a pension trust fund of the State of New Mexico. The ERA assigns the authority to establish and amend benefit provisions to a seven-member Board of Trustees (Board); the state legislature has the authority to set or amend contribution rates and other terms of the Plan, which is a pension benefit trust fund of the State of New Mexico. NMERB is self-funded through investment income and educational employer and employee contributions. The Plan does not receive General Fund Appropriations from the State of New Mexico.

HIGHLIGHTS

The year resulted in growth for the New Mexico Educational Retirement Board Fund (Fund). The fair value of our public pension fund ended the year at \$12.9 billion, with net position increasing \$461 million, or 3.7 percent when compared to June 30, 2017. The Fund's investments returned 8.3% net of fees, ranking NMERB in the 37th percentile of its peers, for an annual investment gain of approximately \$900 million. The results for the year exceed the Fund's long-term actuarial annual return assumption of 7.25%. Over the past five years, the Fund returned 8.1%, net of fees, per annum, outperforming the policy index by 51 basis points and ranking in the 35th percentile of the InvestorForce Public Funds > 1 Billion universe.

The number of active members increased slightly from 59,495 to 60,358, or 1.0%, while the retiree population increased from 47,340 to 48,919, or 3.0%. These results are consistent with the trend seen over the last ten (10) years for a stable active membership population size, compared to the growing retiree population.

STRATEGIC GOALS: STRATEGIES, PRIORITIES, AND LONG-RANGE PLANS

The Board of Trustees (BOT) adopted a Strategic Plan for 2017–2019, which sets specific goals, objectives, and initiatives to continuously improve customer service. We continue to focus on improving the financial condition of the fund, improving and increasing the quality of services we offer, managing risks inherent in administering a pension fund, and building strong relationships with stakeholders. Staff manage priorities and progress toward NMERB's multi-year strategic goals and objectives through a sound project management approach.

BUDGET OVERVIEW: BASIS AND PROCESS

The Board of Trustees integrates the budgetary reporting process as a tool for monitoring the strength of internal controls and administration of the Plan. NMERB's budgetary process supports our strategic mission to provide secure retirement benefits to current and future retirees through strong oversight of the Fund's asset value and performance and continued high quality services for membership. The fiscal year 2018 budget appropriation remained stable in comparison to the prior year but continued to support efforts to enhance our core retirement software application.

FINANCIAL REPORTING AND SYSTEMS

The integrity and fairness of the information presented in this CAFR, including data, which of necessity, is based on estimates and judgments, are the responsibility of NMERB management. The accounting policies used to prepare the financial statements conform to accounting principles generally accepted in the United States. Financial information presented throughout this annual report is consistent with these accounting principles.

Our independent external auditor, CliftonLarsonAllen, LLP conducted an annual audit of the basic financial statements in accordance with auditing standards generally accepted in the United States, performing such tests and other procedures as they deemed necessary to express opinions on the basic financial statements in their report to the Board of Trustees (BOT). CliftonLarsonAllen, LLP had full and unrestricted access to the BOT to discuss their audit and related findings as to the integrity of the financial reporting and the adequacy of internal control systems.

Management is responsible for establishing and maintaining an internal control structure designed to ensure that NMERB assets are protected from loss, theft, or misuse, and that revenues are appropriately distributed. Since the cost of a control should not exceed the benefits to be derived, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements. Responsibility for the accuracy, completeness, and fair presentation of the information, and all disclosures, rests with NMERB management. The basic financial statements were prepared in accordance with accounting principles generally

accepted in the United States. Management assumes full responsibility for the completeness and reliability of the information contained in the financial statements, and in this report.

FUNDING

The funded ratio, as measured by the ratio of the actuarial value of the assets to the actuarial accrued liability, improved from 62.9 percent in fiscal year 2017 to 63.5% in fiscal year 2018.

The funding period (open group projection) of the plan, as measured the number of years in the future that will theoretically be required to pay off or eliminate the Unfunded Actuarial Accrued Liability, increased from 61 years in fiscal year 2017 to 70 years in fiscal year 2018.

NMERB has two significant revenue sources: 1) employer and employee contributions from New Mexico public schools, colleges, and universities; and 2) investment income. We continue to work with stakeholders (schools, educational associations, and retirees) to ensure efficient payment systems for reporting and payment of contributions, equitable reporting guidelines, a secure retirement outlook for New Mexico's educational employees, and a qualified workforce for participating educational employers. Covered payroll increased by 0.7% in fiscal year 2018, as compared to 2017. Total contributions in fiscal year 2018 were 1.8% lower than fiscal year 2017 contributions.

Fiscal year 2018 net investment income (net appreciation in the fair value of plan investments, dividend income, and interest income less investment expenses) was \$900,131,353, as compared to \$1,346,746,701, in fiscal year 2017. NMERB invests for the long term. It is important to keep in mind that NMERB's well diversified portfolio, especially in times of investment market volatility, is the best way to ensure a secure retirement for NMERB's members.

PROFESSIONAL AWARDS

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the NMERB for its Comprehensive Annual Financial Report (CAFR) for the fiscal year ended June 30, 2017. This is the 8th consecutive year that the NMERB has achieved this prestigious award. The Certificate of Achievement is the highest form of recognition in governmental accounting and financial reporting, and its attainment represents a significant accomplishment for the NMERB.

A Certificate of Achievement is valid for a period of one year only. We believe our current report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

The Public Pension Coordinating Council (PPCC) also awarded the NMERB a Recognition Award for Administration for its Comprehensive Annual Financial Report (CAFR) for the fiscal year ended June 30, 2018. This is the 8th consecutive year that the NMERB has been recognized.

The PPCC is a coalition of three national associations that represent public retirement systems and administrators: the National Association of State Retirement Administrators (NASRA), the National Council on Teacher Retirement (NCTR), and the National Conference on Public Employee Retirement Systems (NCPERS). To receive the Recognition Award for Administration, the retirement system must meet the following professional standards: Comprehensive Benefit Program, Actuarial, Audit, Investments and Communications.

Letter of Transmittal

IN CLOSING

We would like to extend our sincerest appreciation to all of NMERB's staff, consultants and vendors for their contributions and hard work on this report and throughout the year. This report is intended to provide complete and reliable information as a basis for management decisions, legal compliance, and stewardship of the NMERB Fund assets.

The NMERB also publishes an annual summary referred to as the Popular Annual Financial Report (PAFR) of the information contained in this report. Both reports are available on our website: http://www.nmerb.org/Annual_reports.html

Respectfully submitted,

Jan Goodwin
Executive Director

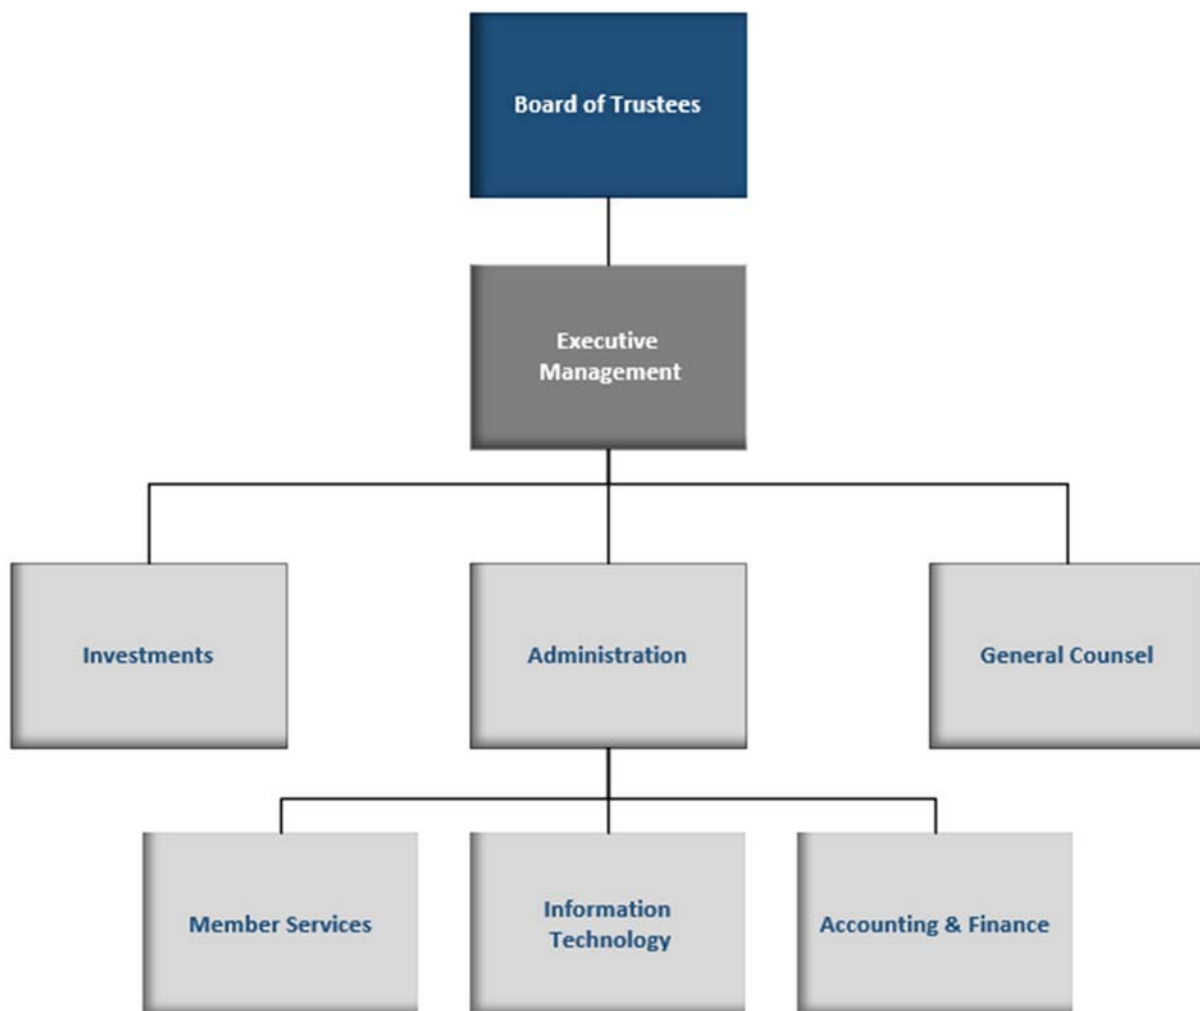

Norma Henderson
Chief Financial Officer

About NMERB

The New Mexico Educational Retirement Board (NMERB) is headquartered in Santa Fe, New Mexico and provides retirement benefit services to more than 156,000 members and 216 public educational employers. NMERB was created by New Mexico's Educational Retirement Act, Section 22-11-1 through 22-11-52, NMSA 1978 to administer the Educational Employees' Retirement Plan which provides retirement and disability benefits for certified teachers and other employees of the state's public schools, including public colleges, universities, and public technical and vocational institutions. As a defined benefit retirement plan, NMERB benefits are based on years of service, a benefit multiplier, and average compensation in the five highest consecutive years.

The management of NMERB is vested in a seven-member board. The organization functions through its five interrelated work groups to serve the membership and the employers.

Functional Organization Chart

About NMERB

Functional Workgroups

Investments

NMERB's investment asset portfolio is invested, or reinvested, pursuant to the authority of the Educational Retirement Act, Section 22-11-13 in accordance with the Uniform Prudent Investor Act, Sections 45-7-601 through 45-7-612, NMSA 1978. Investing is conducted solely in the interest of, and for the exclusive purposes of, providing benefits to members and their beneficiaries and defraying reasonable administrative expenses. (Schedules of investment fees, profit share, and commissions prepared by the investment group can be found in the Investment Section of this report beginning on page 149).

General Counsel

The Office of General Counsel serves as legal adviser to the New Mexico Educational Retirement Board and Agency management. The office ensures that the Board and NMERB act in conformance with all applicable legal and regulatory requirements and coordinates all litigation for NMERB.

Member Services

Member Services staff assists members throughout their careers and into retirement, acting as the primary customer service contact for assistance, information, and education about potential or current retirement benefits. Member Services provides educational outreach across New Mexico, conducts one on one onsite counseling, processes retirement applications and benefit estimates, and helps transition benefits to survivors. Member Services is a premier source of quality customer service to our membership.

Information Technology

Information Technology staff provides technical hardware and software support for NMERB's data processing needs, the document imaging system, network capability, and the communication system. Staff uses a project management and customer service orientation to maintain a secure and stable environment that ensures customer satisfaction and collaboration.

Accounting and Finance

Accounting and Finance staff are responsible for all the financial records administered by NMERB, including fiscal reporting, accounting, procurement, budgeting, and monthly employer contribution reporting and payment processing. Staff works closely with each of the NMERB's functional workgroups, optimizing workflow and communication.

Board of Trustees

The Board stands in a fiduciary relationship to the members covered under the Educational Retirement Act. Administrative management of the Fund is vested in the Executive Director who is appointed by the Board of Trustees to advise the Trustees on all matters pertaining to the retirement system, contractual obligations, and employment of the staff needed for operations.

Board and committee meetings are open to the public. The seven-member Board of Trustees is comprised of elected, appointed, and ex officio members to provide broad policy guidance and direction. Membership on the board is prescribed by the Educational Retirement Act in Section 22-11-3 NMSA, 1978, as follows:

- ❖ Secretary of the Public Education Department (PED), or a designee of the secretary who is a resident of New Mexico, a current employee of PED, and possesses experience relevant to the financial or fiduciary aspects of pension or investment fund management.
- ❖ State Treasurer, or a designee of the Treasurer who is a resident of New Mexico, a current employee of the State Treasurer's Office, and possesses experience relevant to the financial or fiduciary aspects of pension or investment fund management.
- ❖ One member to be elected for a term of four years by the members of the New Mexico Association of Educational Retirees.
- ❖ One member to be elected for a term of four years by the members of the National Education Association of New Mexico.
- ❖ One member to be elected for a term of four years by the members of the New Mexico members of the American Association of University Professors.
- ❖ Two members to be appointed by the governor for terms of four years each. Each member appointed shall have a background in investments, finance or pension fund administration.

Mr. David Craig	Designate for Secretary of Public Education Department	

About NMERB

The Business of the Board of Trustees

The Trustees adopted a strategic plan for 2017-2019 that addresses their goals and objectives for management to incorporate into operational plans. In keeping with that strategic plan, each year the Trustees and executive management ratify investment policies and asset allocation targets, approve the annual budget, update the information technology plan, review actuarial assumptions, and address overall planning to administer their fiduciary responsibility to the pension plan trust.

Mission and Vision Statements

Mission Statement

Providing secure retirement benefits for New Mexico's educational employees—past, present, and future.

Vision Statement

To be an effective and trusted manager of New Mexico's educational retirement system.

Strategic Planning

The Board of Trustees follows a formal strategic planning process which includes periodic review and update of NMERB's Strategic Plan. The goals set for fiscal years 2017-2019 are to 1) improve and maintain the financial condition of the fund, 2) continually improve the quality of member and employer service, 3) embark on agency-wide risk identification and management effort, and 4) build strong, effective relationships with all stakeholders. Each functional area implements the NMERB's strategic plan through inter-divisional initiatives producing sound long-term benefits for membership and stakeholders alike. Multi-year initiatives include short-term, interim objectives and performance measures to manage the initiatives and measure their success.

Budget Planning

The Board of Trustees employs the budgetary reporting process as a tool to administer and establish priorities for the Plan. Annual budget preparation includes periodic monitoring of appropriations and benchmarking to mitigate risk. The Chief Financial Officer is responsible for monitoring the budget and related business processes to add value and improve effectiveness, efficiencies, and adaptability to NMERB operations. The Chief Financial Officer regularly apprises the Trustees on NMERB's budgetary status and financial position.

The budget is adopted on the modified accrual basis of accounting, except for prior year obligations approved for payment by the New Mexico Department of Finance and Administration (DFA) per Section 6-10-4 NMSA 1978.

INDEPENDENT AUDITORS' REPORT

Members of the State of New Mexico
Educational Retirement Board

Mr. Wayne Johnson
New Mexico State Auditor

Report on the Financial Statements

We have audited the financial statements of the New Mexico Educational Retirement Board (ERB), which comprise the Statements of Fiduciary Net Position as of June 30, 2018, and the related Statements of Changes in Fiduciary Net Position for the year then ended, and the related Notes to the Financial Statements, which collectively comprise the ERB's basic financial statements, as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

Members of the State of New Mexico
Educational Retirement Board

Mr. Wayne Johnson
New Mexico State Auditor

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the net position of the ERB as of June 30, 2018, and the respective changes in its net position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 1, the basic financial statements of the ERB are intended to present the fiduciary net position and changes in fiduciary net position of only that portion of the State of New Mexico which are attributable to the transactions of the Funds administered by the ERB. They do not purport to, and do not present fairly the financial position of the State of New Mexico as of June 30, 2018, and the changes in its financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis and the Schedules of Changes in the Employers' Net Pension Liability and Related Ratios, Investment Returns, and Employer Contributions, and related Notes, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audits of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audits were conducted for the purpose of forming an opinion on the basic financial statements. The Schedules of Revenues and Expenditures - Budget and Actual (Non GAAP Basis), Budgeted Expenditures, Investment and Administrative Expenses, and Cash and Short-Term Investments, Accountability in Government Act Performance Measures, and Exit Conference (other supplementary information) as of and for the year ended June 30, 2018 are presented for purposes of additional analysis and are not a required part of the basic financial statements.

Members of the State of New Mexico
Educational Retirement Board

Mr. Wayne Johnson
New Mexico State Auditor

The other supplementary information is the responsibility of management and was derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audits of the basic financial statements for the year ended June 30, 2018 and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the accompanying supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole for the year ended June 30, 2018.

The Introductory, Actuarial, Investment and Statistical section, as listed in the table of contents, have not been subjected to the auditing procedures applied in the audits of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated November 21, 2018 on our consideration of the ERB's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the ERB's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the ERB's internal control over financial reporting and compliance.

CliftonLarsonAllen LLP

Management's Discussion and Analysis

Introduction

This Management's Discussion and Analysis (MD&A) section provides a narrative analysis of the New Mexico Educational Retirement Board's (NMERB) financial performance for the year ended June 30, 2018. This section should be read in conjunction with the Letter of Transmittal included in the Introductory Section in this report. It should also be read in conjunction with the Basic Financial Statements and accompanying Notes to the Financial Statements presented in the Financial Section of this report.

In addition to historical information, this MD&A includes certain forward-looking statements, which involve currently known facts and certain risks and uncertainties. NMERB's actual results, performance, and achievements may differ materially from the results, performance, and achievements expressed or implied in such forward-looking statements, due to a wide range of factors, including changes in interest rates, changes in the securities markets, general economic conditions, legislative changes, and other factors.

NMERB administers the Educational Employees Retirement Plan (Plan). The plan provides retirement, disability, and survivor benefits for certified teachers and other employees of the state's public schools, institutions of higher learning, and state agencies providing educational programs. A summary of Plan provisions and the composition of NMERB's Board of Trustees can be found in the Notes to the Financial Statements.

The following section provides an overview of NMERB financial statements.

Overview of the Financial Statements

This Comprehensive Annual Financial Report (CAFR) includes two basic financial statements: the Statement of Fiduciary Net Position and the Statement of Changes in Fiduciary Net Position. The Notes to the Financial Statements are an integral part of the statements.

In addition to the financial statements and notes, this CAFR also includes two types of supporting information: Required Supplementary Information (RSI) and Supplementary Information (SI). RSI and SI place the financial statements and notes into appropriate operational, economic, or historical context. RSI and SI differ in that RSI is mandated by the Governmental Accounting Standards Board (GASB). The GASB considers RSI an essential part of financial reporting. Although SI is not mandated by the GASB, it includes more detailed presentations of the information in the financial statements and notes, as well as presentations mandated by the New Mexico Office of the State Auditor and other oversight agencies.

Basic Financial Statements

The Statement of Fiduciary Net Position reports on the pension trust fund's assets, liabilities, and the resulting net position where Assets minus Liabilities equals Net Position restricted for pensions at the end of the fiscal year. It is a snapshot of the pension trust fund at June 30, 2018.

The Statement of Changes in Fiduciary Net Position summarizes the pension trust fund's financial transactions that occurred during the fiscal year, where Additions minus Deductions equals the net increase/decrease in Net Position. This statement describes the changes that have occurred, during this fiscal year, to the prior year's ending net position.

Management's Discussion and Analysis

Notes to the Financial Statements

The Notes to the Financial Statements accompany the basic financial statements. The notes provide additional information that is essential to a full understanding of the information provided in the basic financial statements. The information in the Notes to the Financial Statements is described below:

- Note 1** – provides a general description of the Educational Retirement Plan, including plan membership, plans benefits, and the composition of NMERB's Board of Trustees.
- Note 2** – provides a summary of significant accounting policies, including basis of accounting, measurement focus, use of estimates, and other significant accounting policies.
- Note 3** – provides information about Net Pension Liability, including actuarial assumptions and the annual money-weighted return on investments.
- Note 4** – provides information about NMERB's investment in the State General Fund Investment Pool.
- Note 5** – provides information about refund overpayments.
- Note 6** – provides information about how NMERB classifies and measures investments.
- Note 7** – provides information on investments, including NMERB's asset allocation policy, risk, and cash balances.
- Note 8** – provides information on derivative instruments.
- Note 9** – provides information on capital assets.
- Note 10** – provides information on accrued compensated absences.
- Note 11** – provides information on retirement plans.
- Note 12** – provides information on post-employment benefits.
- Note 13** – provides information on risk management.
- Note 14** – provides information on special, deficiency, and specific appropriations.
- Note 15** – provides information on pending litigation and claims.

Required Supplementary Information (RSI)

In addition to the MD&A, this report includes the following RSI: Schedule of Changes in the Employer's Net Pension Liability and Related Ratios, Schedule of Investment Returns (annual money-weighted rate of return), and Schedule of Employer Contributions.

Other Supplementary Information (SI)

SI includes the Schedule of Revenues and Expenditures – Budget and Actual (Non-GAAP Basis); Schedule of Budgeted Expenditures; Accountability in Government Act performance measures; Schedule of Investment and Administrative Expenses; Schedule of Cash and Short-Term Investments; and Schedule of Asset Management Costs (Unaudited).

Performance measures are included in the Notes to the Financial Statements in compliance with the Section 2.2.2.11 NMAC. In 1999, the Accountability in Government Act mandated performance-based budgeting across state agencies per Section 6-3A NMSA 1978 to improve program coordination and increase operational information available to the Governor, the Legislature, and the public. NMERB serves its membership through prudent asset management, efficient administration, membership training, and reliable payment processing. In support of these

Management's Discussion and Analysis

desirable outcomes, NMERB met targeted goals for five-year investment performance, training satisfaction, and ten-year performance ranking in a national peer survey of public plans.

Comparative Summary Statements

Below is presented a condensed version of the Statement of Fiduciary Net Position and the Statement of Changes in Fiduciary Net Position. More detailed versions of the statements can be found on pages 29 and 30.

Condensed Statement of Fiduciary Net Position (in Millions)

	2018	2017	Change	
			Dollar	%

Management's Discussion and Analysis

Overall Analysis of Financial Position and Results of Operations

Financial

Additions. During fiscal years ending June 30, 2018 and 2017 the additions to the Plan's fiduciary net position totaled \$1,578,294,691 and \$2,039,041,476, respectively. The components of additions are member and employer contributions, net investment income, and other income.

Deductions. Total deductions from the Plan's fiduciary net position of \$1,117,349,746 in fiscal year 2018 and \$1,062,523,517 in fiscal year 2017 resulted in increases of 5 percent and 4 percent over each prior fiscal year, respectively. These were primarily due to normal increases in total age and service benefits.

Condensed Net Position Analysis (In Millions)

	2018	2017	Change	
			Dollar	%
Net Position Restricted for Pensions	\$12,970	\$ 12,509	\$ 461	3.69%
Net Increase in Net Position	\$ 461	\$ 977	\$ (516)	-52.81%

Net Position. In the fiscal year ended June 30, 2018 the net position increased to \$12,970,300,855, from the prior year net position of \$12,509,355,910. Overall, the net increase of \$460,944,945 was the result of contributions and investment income exceeding benefit payments, refunds, and administrative costs.

Investments

Long Term Return on Investments. As of June 30, 2018, NMERB's investment return, net of fees, since July 1, 1983 was 9.1 percent.

Fair Value of Investments. The primary element of NMERB's fiduciary net position is the fair value of the investment portfolio. Investment assets totaled \$12,653,195,854 as of the fiscal year ended 2018, which was \$744,737,939 higher than the prior fiscal year. It is important to note that the net change year over year is not only due to changes in fair value, but is also impacted by the timing of purchases, sales, and redemptions.

Condensed Investment Portfolio, Fair Value (In Millions)

	2018	2017	Change	
			Dollar	%
Cash and Short Term Investments	\$ 222	\$ 434	(212)	-48.85%
Investments, at Fair Value	12,653	11,908	533	6.26%
Total	\$ 12,875	\$ 12,342	321	4.32%

Management’s Discussion and Analysis

Annual Return. The investment fund achieved a positive 8.3 percent time weighted rate of return during the fiscal year, net of fees. This one-year return exceeded the investment return assumption of 7.25 percent used for actuarial purposes. The fund underperformed the policy index (NMERB’s investment return objectives) by 2 percent. The 8.3 percent return resulted in the investment fund ranking in the top 37th percentile of its peers within the Investor Force Public Funds > \$1 Billion Universe. All NMERB asset classes were within target policy ranges at year end. The following table provides a summary of total fund performance (net of fees) as of June 30, 2018.

Fund Performance Summary (Net of Fees) at June 30, 2018

1 Year	3 Year	5 Year	10 Year	15 year	20 Year	30 year
8.3%	7.6%	8.1%	6.8%	7.6%	5.9%	8.6%

Investment Allocation History. The following chart depicts growth and changes in investment allocations by portfolio category as of June 30 from fiscal years 2013 to 2018. Target investment allocations are reviewed at least annually by the Board of Trustees. Additional detail on fiscal year 2018 targets are available in the Notes to the Financial Statement.

Management's Discussion and Analysis

Investment Risk Exposure. In formulating the Plan's investment strategy, NMERB takes a long-term perspective designed to meet the needs of our beneficiaries for many years to come. NMERB seeks to diversify the risks contained in the investment portfolio among the many categories of assets available to institutional investors. NMERB also manages liquidity to ensure the Plan's ability to meet continuing pension benefit obligations. NMERB continues to pursue long term institutional strategies for growth at a minimum level of risk per unit of return.

Actuarial

Net Pension Liability. The current fiscal year's net pension liability (NPL) of \$11,891,330,976, measured as the total pension liability, less the Plan's fiduciary net position as of June 30, 2018, was calculated based on an expected rate of return on Plan investments of 7.25 percent. The current NPL increased by 7.0 percent over the fiscal year 2017 NPL of \$11,113,468,217.

Sensitivity of the Net Pension Liability to the Single Discount Rate Assumption. The table below presents the changes in NMERB's fiduciary net pension liability. The table also provides the sensitivity of the net pension liability to changes in the discount rate. The sensitivity analysis shown below is for fiscal years 2015 through 2018.

Fiscal Year	Discount Rate	Net Pension Liability		
		1% Decrease	Current Single Rate Assumption	1% Increase
2018	5.69%	\$ 15,454,175,919	\$ 11,891,330,976	\$ 8,984,271,849
2017	5.90%	14,466,971,886	11,113,468,217	8,372,251,825
2016	7.75%	9,531,509,131	7,196,433,561	5,258,980,529
2015	7.75%	8,715,594,530	6,477,266,299	4,596,837,569

Funded Ratio. The funded ratio (the ratio of the actuarial value of assets to the actuarial accrued liability) improved from 62.9 percent as of June 30, 2017, to 63.5 percent as of June 30, 2018. The Plan's funding period, based on an open group projection as of the valuation date of June 30, 2018, is 70 years. This compares to 61 years as of June 30, 2017.

Management's Discussion and Analysis

Membership: Over the last ten years, the total number of active plan members has decreased 5.4 percent, while the number of retired members and beneficiaries has increased 50.5 percent. The ratio of active member to retired members and beneficiaries is 1.23. Other membership categories—inactive non-vested members and inactive vested members—have also increased 25.6 and 66.8 percent, respectively. Total membership has increased 23.6 percent.

Analysis of Balances and Transactions

Receivables and Payables. Total current receivables for fiscal year 2018 decreased by \$73,727,911 from the prior year. Total current payables for fiscal year 2018 decreased \$1,594,540 from the prior year. Changes in year-end balances were primarily caused by changes in year-end broker sales and purchase proceeds.

Condensed Receivables and Payables Analysis (In Millions)

	2018	2017	Change	
			Dollar	%
Interest, Dividends, and Other Receivables	\$ 142	\$ 213	(71)	-33.33%
Contributions	86	89	(3)	-3.37%
Total Current Receivables	\$ 228	\$ 302	(74)	-24.50%
Investment Broker Payables	\$ 128	\$ 129	(1)	-0.78%
Accounts Payable	6	6	-	0.00%
Member Withdrawals	1	1	-	0.00%
Accrued Payroll and Benefits	1	1	-	0.00%
Total Current Payables	\$ 136	\$ 137	(1)	-0.73%

Management's Discussion and Analysis

Changes in broker receivables and payables relate to the volume of investments sold at or near the current fiscal year end as compared to the prior year. Securities sales and purchases in the United States equity markets are based on "trade + 2 days," meaning the transactions will settle in two business days after initiation. The number of days varies in other U.S. and foreign securities markets.

Contributions. NMERB's funding objective is to meet long-term benefit obligations through member and employer contributions, as well as through investment earnings. Annual contributions for the current reporting year were \$676,047,787. This is a decrease of \$12,605,017, or 1.8 percent, from the prior fiscal year. One of the primary reasons for this is payroll for regular members decreased by \$50,147,108 in FY18 from the prior year. Over the past ten years, payroll for regular members has remained relatively flat, increasing by only 0.62 percent.

Investment Income. Investment income, net of external manager and custody banking fees, was \$900,131,353 for 2018 and \$1,346,746,701 for 2017, respectively. The continued positive return reflects NMERB's investment allocation plan. NMERB's investment allocation plan is designed to result in a lower volatility of returns than the historical NMERB portfolio and the average public pension fund. This means NMERB may lag other funds somewhat when equity markets move up sharply. However, NMERB expects to exceed the returns on those same funds when the equity markets have very small gains or losses. In short, NMERB is seeking to mute the extreme differences in returns from one quarter or one year to the next. This philosophy has contributed positively to NMERB's results in previous fiscal years and has contributed positively to its longer-term comparative performance.

Age and Service Benefits. Age and service benefits paid in fiscal year 2018, including disability and death benefit payments, totaled \$1,069,597,322, a 4.9 percent increase over the prior year's net benefit payments. The increase in payments is attributable to the growth in the retiree population by 3.0 percent from 47,340 in fiscal year 2017 to 48,919 in fiscal 2018 and mirrors the consistent, though modest, annual growth in the total retiree population.

Management's Discussion and Analysis

Currently Known Facts and Conditions

Pending Litigation and Claims

During each business cycle, NMERB may be named as a defendant in administrative appeals arising from the normal course of business. Legal counsel believes resolution of any currently pending matters will not have a material effect on the financial statements.

Note 1 General Description of the Board and Retirement Plan

A. Background

The New Mexico Legislature passed the Educational Retirement Act (ERA) in 1957, establishing the NMERB Board of Trustees to administer the Educational Employees Retirement Plan (Plan). The Plan is a cost-sharing, multiple-employer pension plan established to provide retirement and disability benefits for certified teachers and other employees of the state's public schools, institutions of higher learning, and state agencies providing educational programs. Additional tenets of the ERA can be found in Section 22-11-1 through 22-11-52, NMSA 1978, as amended.

B. Reporting Entity

The Plan administered by NMERB is a pension trust fund of the State of New Mexico. The ERA assigns the authority to establish and amend benefit provisions to a seven-member Board of Trustees (Board); the state legislature has the authority to set or amend contribution rates and other terms of the Plan which is a pension benefit trust fund of the State of New Mexico. NMERB is self-funded through investment income and educational employer contributions. The Plan does not receive General Fund Appropriations from the State of New Mexico.

The ERA defines the governing Board of Trustees for NMERB per Section 22-11-3 NMSA, 1978, as follows:

- The Secretary of Public Education, or a designee of the secretary who is a resident of New Mexico; is a current employee of the Public Education Department; and possesses experience relevant to the financial or fiduciary aspects of pension or investment fund management;
- The State Treasurer, or a designee of the Treasurer who is a resident of New Mexico; is a current employee of the State Treasurer's office; and possesses experience relevant to the financial or fiduciary aspects of pension or investment fund management;
- One member to be elected for a term of four years by members of the New Mexico Association of Educational Retirees;
- One member to be elected for a term of four years by the members of the National Education Association of New Mexico;
- One member to be elected for a term of four years by the New Mexico members of the American Association of University Professors; and
- Two members to be appointed by the governor for terms of four years each. Each member appointed shall have a background in investments, finance or pension fund administration.

NMERB applied criteria established by Generally Accepted Accounting Principles (GAAP) to determine whether other state agencies, boards or commissions which benefit the members of NMERB should be included within its financial reporting entity as component units. Those criteria include, but are not limited to, whether the Board exercises oversight responsibility; financial interdependency; selection of governing authority; designation of management; an ability to significantly influence operations and accountability for fiscal matters, scope of public service, and special financing relationships. Based on these criteria, the Board has determined that there are no component units that should be included in its financial reporting entity.

C. Defined Benefit Plan Description

The Plan administers a cost-sharing, multiple-employer defined benefit pension plan, which is a qualified plan under Section 401(a) of the Internal Revenue Service Code and is exempt from federal income taxes under Section 501(a). All accumulated assets are held in trust to pay benefits, including refunds of contributions as defined in the terms of the Plan. Eligibility for membership in the Plan is a condition of employment, as defined Section 22-11-2, NMSA 1978. Employees of public schools, universities, colleges, junior colleges, technical-vocational institutions, state special schools, charter schools, and state agencies providing an educational program, who are employed more than 25 percent of a full-time equivalency, are required to be members of the Plan, unless specifically excluded.

Active, retired, and inactive membership totaled 156,789 as of June 30, 2018. The following schedule shows the number of members by category. A breakdown of contributing employers by reporting category for fiscal year 2018 follows. The “State agencies” category includes the State of New Mexico as the common paymaster for all state agencies with educational programs, the New Mexico Activities Association, and the nine New Mexico Regional Education Cooperatives.

Schedule of Plan Membership

Membership Status	2018
Active Working Members	60,358
Retirees and Beneficiaries Currently Receiving Benefits	48,919
Inactive Members, Vested	10,621
Inactive Members, Nonvested	36,891
Total	156,789

D. Participating Employers

NMERB served a total 216 educational employers in fiscal year 2018. This is a decrease from the previous fiscal year due to three Charter Schools closing and one opening.

Schedule of Participating Employers

Employer Category	2018
Charter Schools	97
Public Schools	89
State Agencies	11
Universities and Colledges	15
Special Schools	4
Total	216

For the fiscal year ended June 30, 2018, educational employers contributed to the Plan based on the following rate schedule.

Schedule of Contribution Rates

Fiscal Year	Date Range	Wage Category	Member Rate	Employer Rate	Combined Rate	Increase Over Prior Year
2018	7/1/17 to 6/30/18	Over \$20K	10.70 %	13.90 %	24.60 %	0.00 %
2018	7/1/17 to 6/30/18	\$20K or Less	7.90 %	13.90 %	21.80 %	0.00 %

E. Pension Benefit

A member’s retirement benefit is determined by a formula which includes three component parts: 1) the member’s final average salary (FAS), 2) the number of years of service credit, and 3) a 0.0235 multiplier. The FAS is the average of the member’s salaries for the last five fiscal years of service or any other consecutive five fiscal year period, whichever is greater.

F. Summary of Plan Provisions for Retirement Eligibility

For members employed before July 1, 2010, a member is eligible to retire when one of the following events occurs:

- The member’s age and allowable service credit add up to the sum of 75 or more. Those who retire under the age of 60, and who have fewer than 25 years of earned service credit will receive reduced retirement benefits, or
- The member is at least sixty-five years of age and has five or more years of earned service credit, or
- The member has service credit totaling 25 years or more.

Notes to the Financial Statements

Chapter 288, Laws of 2009 changed the eligibility requirements for new members first employed on, or after, July 1, 2010 and before July 1, 2013. The eligibility for a member who either becomes a new member on or after July 1, 2010 and before July 1, 2013, or at any time prior to July 1, 2010 refunded all member contributions and then becomes re-employed after July 1, 2010 is as follows:

- The member's age and earned service credit add up to the sum of 80 or more. Those who retire under the age of 65, and who have fewer than 30 years of earned service credit will receive reduced retirement benefits, or
- The member is at least sixty-seven years of age and has five or more years of earned service credit, or
- The member has service credit totaling 30 years or more.

Section 2-11-23.2, NMSA 1978 added eligibility requirements for new members who were first employed on or after July 1, 2013, or who were employed before July 1, 2013 but terminated employment and subsequently withdrew all contributions and returned to work for an NMERB employer on or after July 1, 2013. These members must meet one of the following requirements.

- The member's minimum age is 55, and has earned 30 or more years of service credit. Those who retire earlier than age 55, but with 30 years of earned service credit will have a reduction in benefits to the actuarial equivalent of retiring at age 55.
- The member's age and earned service credit add up to the sum of 80 or more. Those who retire under the age of 65, and who have fewer than 30 years of earned service credit will receive reduced retirement benefits, or
- The member's age is 67 and has earned five or more years of service credit.

G. Form of Payment

The benefit is paid as a monthly life annuity with a guarantee that, if the payments made do not exceed the member's accumulated contributions plus accumulated interest, determined as of the date of retirement, the balance will be paid in a lump sum to the member's surviving beneficiary.

H. Benefit Options

The Plan has three benefit options available:

Option A – Straight Life Benefit – The single life annuity option has no reductions to the monthly benefit, and there is no continuing benefit due to a beneficiary or estate, except the balance, if any, of member contributions plus interest less benefits paid prior to the member's death.

Option B – Joint 100 Percent Survivor Benefit – The single life annuity monthly benefit is reduced to provide for a 100 percent survivor's benefit. The reduced benefit is payable during the life of the member, with the provision that, upon death, the same benefit is paid to the beneficiary for his or her lifetime. If the beneficiary predeceases the member, the member's monthly benefit is increased to the amount the member would have received under Option A Straight Life benefit. The member's increased monthly benefit commences in the month following the beneficiary's death.

Notes to the Financial Statements

Option C – Joint 50 Percent Survivor Benefit – The single life annuity monthly benefit is reduced to provide for a 50 percent survivor’s benefit. The reduced benefit is payable during the life of the member, with the provision that, upon death, the reduced 50 percent benefit is paid to the beneficiary for his or her lifetime. If the beneficiary predeceases the member, the member’s monthly benefit is increased to the amount the member would have received under Option A Straight Life benefit. The member’s increased monthly benefit commences in the month following the beneficiary’s death.

I. Cost of Living Adjustment (COLA)

All retired members and beneficiaries receiving benefits receive an automatic adjustment in their benefit on July 1 following the later of 1) the year a member retires, or 2) the year a member reaches age 65 (Tier 1 and Tier 2) or age 67 (Tier 3).

Membership Tiers	
Tier	Membership is Comprise of:
1	Employees who became members prior to July 1, 2010
2	Employees who became members after on or after July 1, 2010, but prior to July 1, 2013
3	Employees who became members on or after July 1, 2013

As of July 1, 2013, for current and future retirees the COLA is immediately reduced until the Plan is 100 percent funded. The COLA reduction is based on the median retirement benefit of all retirees excluding disability retirements. Retirees with benefits at or below the median and with 25 or more years of service credit will have a ten percent COLA reduction; their average COLA will be 1.5 percent. Once the funding is greater than 90 percent, the COLA reductions will decrease. The retirees with benefits at or below the median and with 25 or more years of service credit will have a five percent COLA reduction; their average COLA will be 1.7 percent.

Members on disability retirement are entitled to a COLA commencing on July 1 of the third full year following disability retirement. A member on regular retirement who can prove retirement because of a disability may qualify for a COLA beginning July 1 in the third full year of retirement.

Disability Benefit:

Eligibility – A member is eligible for a disability benefit provided (a) he or she has credit for at least ten years of service, and (b) the disability is approved by the Board.

Monthly Benefit – The monthly benefit is equal to two percent of FAS times years of service, but not less than the smaller of (a) one-third of FAS or (b) two percent of FAS times years of service projected to age 60.

Form of Payment – The disability benefit commences immediately upon the member’s retirement. Disability benefits are payable as a monthly life annuity, with a guarantee that, if the payments made do not exceed the member’s accumulated contributions, determined as of the date of retirement, the balance will be paid in a lump sum to the member’s surviving beneficiary. If the disabled member survives to age 60, the regular optional forms of payment are then applied.

J. Refund of Contributions

Members may withdraw their contributions only when they terminate covered employment in the State and their former employer(s) certification determination has been received by NMERB. Interest is paid to members when they withdraw their contributions following termination of employment at a rate set by the Board. Interest is not earned on contributions credited to accounts prior to July 1, 1971, or for contributions held for less than one year.

K. Alternative Retirement Plan

Effective October 1991, the New Mexico legislature established an Alternative Retirement Plan (ARP) through the enactment of ERA Sections 22-11-47 through 52 NMSA 1978 to provide eligible employees an election to establish an alternative retirement plan. In contrast to the defined benefit plan administered by NMERB, the ARP is a defined contribution plan. NMERB is the trustee of the ARP which is administered by two third-party contractors for NMERB. The administrators approved to offer ARP plans to eligible participants are Teachers Insurance and Annuity Association (TIAA), and Fidelity Investments.

These administrators have the authority to perform record keeping, enrollment education services, and other administrative duties for the ARP. The administrators are delegated any and all powers as may be necessary or advisable to discharge their duties under the ARP, and have certain discretionary authority to decide matters under the ARP. As the ARP trustee NMERB is responsible for selecting investment options that provide a prudent rate of return, and to ensure that all investments, amounts, property, and rights under the executed Plan-Trust are held for the exclusive benefit of Plan participants and their beneficiaries, as defined in the Plan Document.

Eligibility

Certain employees of the University of New Mexico, New Mexico State University, New Mexico Institute of Mining and Technology, New Mexico Highlands University, Eastern New Mexico University, Western New Mexico University, Central New Mexico Community College, Clovis Community College, Luna Community College, Mesalands Community College, New Mexico Junior College, Northern New Mexico College, San Juan College and Santa Fe Community College are eligible to make an election to participate within 90 days of employment. Information about the ARP is distributed by the employer. Those who do not elect to participate in the ARP remain members of the regular defined benefit retirement plan.

Section 22-11-47(D) NMSA 1978 allows an ARP participant a one-time option to make an irrevocable switch to the defined benefit retirement plan after seven years of ARP participation.

Form of Payment

Retirement, death, and other benefits are based upon contributions made and earnings accumulated on those contributions, in accordance with the terms of the applicable vendor contracts and Internal Revenue Service Code. Retirement benefits shall, at the option of the employee, be paid:

- in the form of a lifetime income, if held in an annuity contract,
- payments for a term of years, or
- a single-sum cash payment.

Notes to the Financial Statements

ARP retirement, death, and other benefits, including disability benefits, cannot be paid from the defined benefit plan administered by NMERB.

ARP Contributions

For the year ended June 30, 2018, colleges and universities contributed 10.90 percent of participating employees' gross salary to the ARP vendor on behalf of the participant, and three percent of the employees' gross salary to NMERB. The colleges and universities are responsible for submitting the balance of the employers' contribution, and the employees' contributions directly to the ARP vendors. Employees participating in the ARP do not accrue rights to benefits in the defined benefit pension plan based on the three percent contributions to the Plan. Employer contributions reported in the Statement of Changes in Fiduciary Net Position include amounts remitted on behalf of both the ARP defined contribution plan and the defined benefit plan. The three percent contribution remitted for fiscal year ended June 30, 2018 was \$5,861,690.

Notes to the Financial Statements

Note 2 Significant Accounting Policies

A. Basis of Accounting and Measurement Focus

The Board's financial statements are prepared using the economic resource measurement focus and the accrual basis of accounting. The New Mexico General Fund Appropriation Act establishes the modified accrual basis of accounting for governmental funds as the budgetary basis for the State. Prior-year encumbrances are not carried forward for single-year appropriations. Employer and member contributions are recognized as revenue in the period in which the member's services are performed. Benefits and refunds are recognized when due and payable in accordance with the terms of the Plan.

B. Use of Estimates

In preparing financial statements in conformity with governmental accounting principles generally accepted in the United States, NMERB's management makes estimates and assumptions that affect the reported amounts of assets and liabilities, the reported amounts of additions to and deductions from the Plan fiduciary net position during the reported period, and disclosures as of the date of the financial statements. Actual results could differ from those estimates and assumptions. Certain NMERB investment assets, in particular global real assets and global private equity funds, use estimates in reporting fair value in the financial statements. These estimates are subject to uncertainty in the near term, which could result in changes in the values reported for those assets in the Statement of Fiduciary Net Position.

C. Cash and Short-Term Investments

Cash includes demand deposits and all short-term instruments with maturities at the time of purchase of less than 90 days. Individual deposit accounts and investment accounts held by NMERB are shown on the Statement of Fiduciary Net Position at fair value as required by Section 12-6-5(A) NMSA 1978. Cash activity is accounted for within the Statewide Human Resources Accounting and Management System (SHARE) fund number 60500. NMERB earns interest on all monies held at the State Treasurer's Office and in NMERB's custodial investment account at State Street Bank. When a security purchase transaction fails to be completed due to the broker not delivering the purchased security on settlement date the cash remains with custodial agent bank. When this occurs, NMERB's money is invested overnight in a Short-Term Investment Fund (STIF).

D. Revenue Recognition

Pension contributions are recognized as additions in the period they become due based on Plan reporting requirements. Investment income includes net investment appreciation or depreciation in the fair value of investments, interest and dividend income, and foreign currency transaction gains and losses. Investment income is recognized when earned.

E. Benefits

Benefits and refunds are recognized when due and payable in accordance with the terms of the plan.

Notes to the Financial Statements

F. Investments

All investment securities are reported at fair value, which is defined as the amount that a plan can reasonably expect to receive for an investment in a current sale between a willing buyer and a willing seller. Due to the nature of investments, it is reasonable to expect that changes in the value of investment assets will occur in the near future and that changes could materially affect the amounts reported.

NMERB's investments are measured and reported at fair value, based on quoted prices in active markets, significant other observable inputs, and significant unobservable inputs. Additional information on the valuation of investment securities can be found in Note 6, which is presented in accordance with GASB Statement 72, *Fair Value Measurement and Application*. There are certain market risks, credit risks, foreign exchange currency risks, or events that may subject the Plan's investment portfolio to economic changes occurring in certain industries, sectors, or geographic markets.

Net investment income (loss) includes net appreciation (depreciation) in the fair value of investments, interest income, dividend income, and investment expenses which include management and custodial fees, and all other significant investment related costs. Purchases and sales of securities are recorded on a trade-date basis. Dividends are recorded on the ex-dividend date.

The calculation of realized gains and losses is independent of the calculation of the net change in the fair value of pension plan investments. Realized gains and losses on investments that had been held in more than one reporting period and sold in the current period were included as a change in the fair value reported in the prior period(s) and the current period.

G. Capital Assets

Capital assets represent the cost of assets, net of accumulated depreciation, used for the administration of the Plan. Capital assets include NMERB's administration building located in Santa Fe, New Mexico. NMERB's capitalization policy, based on the requirements from Section 12-6-10 NMSA 1978, is to include all assets with a useful life of more than one year and a cost basis of at least \$5,000. Assets with an original cost less than \$5,000 but categorized as sensitive, primarily IT equipment, are also capitalized for tracking and control purposes. All additions are capitalized at historical cost as of the date of acquisition; depreciation is calculated on a straight-line basis over the asset's estimated useful life with no salvage value. Estimated useful asset lives are as follows:

	<u>Years</u>
Buildings and Building Improvements	25
Depreciable Land Improvements	10
Furniture and Equipment	10
Data Processing Equipment (Including Software)	5

H. Budgets and Budgetary Accounting

Formal budgetary integration is used by the Board of Trustees as a tool for monitoring internal controls and administering the Plan. The budget for NMERB, a New Mexico State agency is adopted on the modified accrual basis of accounting, except for prior year obligations approved for payment by the New Mexico Department of Finance and Administration (DFA) per Section 6-10-4 NMSA 1978.

Notes to the Financial Statements

Each year the New Mexico Legislature approves multi-year appropriations, which the State considers as continuing appropriations. The Legislature authorizes these appropriations for two to five years; however, it does not identify the authorized amount by fiscal year. Consequently, the appropriation is budgeted in its entirety the first year the Legislature authorizes it. The unexpended portion of the multi-year budget is carried forward as the next year's beginning budget balance until either the project period has expired or the appropriation has been fully expended. Budget presentations in these financial statements are consistent with this budgeting methodology.

Only administrative expenses are budgeted, while significant revenues and non-administrative expenses are not. The budget recognizes encumbrances and capital expenses as current expenses, excludes depreciation expense, and recognizes revenue when cash is received. Budgetary comparisons for the Plan are presented in the schedule of revenues and expenditures, included in Other Supplemental Information.

The Accountability in Government Act, Chapter 15, Laws of 1999, requires implementation of performance-based budgeting over a four-year period. NMERB developed performance measures which were approved by the State Budget Division (SBD), a division of the DFA, and the Legislative Finance Committee (LFC), an interim committee of the New Mexico Legislature, and included in the General Appropriations Act. NMERB is required to report annually to the SBD and the LFC on these performance measures. Performance results are included in Other Supplemental Information.

To establish the annual budget, NMERB has the following procedures:

1. NMERB prepares a Budget Appropriation Request for the Board of Trustees' approval, and to present at a Legislative Finance Committee (LFC) hearing. The request includes proposed expenses and the means of financing them.
2. The Budget Appropriation Request is submitted to the State Budget Division (SBD) of DFA and the LFC.
3. DFA makes recommendations and adjustments to NMERB's Budget Appropriation Request, which becomes the Governor's proposal to the legislature.
4. The LFC holds hearings on the Budget Appropriation Request during the legislature's interim period. Recommendations and adjustments are made prior to presenting the Budget Appropriation Request to the legislature.
5. Both DFA's and LFC's recommended appropriation proposals are presented to the Legislature for approval of the final budget. The final budget approved by the legislature is then sent to the Governor's office for final approval.
6. NMERB submits its annual operating budget to DFA and LFC based on the final appropriation recommendation from the Legislature and approval by the Governor.
7. Per Section 9 of the General Appropriation Act of 2012, all agencies, including legislative agencies, may request category transfers among personal services and employee benefits, contractual services, and other costs. The legal level of budgetary control for NMERB's operating budget is the enacted appropriation program.

Notes to the Financial Statements

I. Refunds Payable

Refunds payable represents the total amount due and payable as of June 30th to terminated members who have submitted valid claims for a full refund of contributions. These refunds are processed in early July 2018, as soon as the state's central accounting system is available to process the new fiscal year's transactions.

J. Due to Other State Agencies

NMERB's financial statements do not reflect any amounts due to other state agencies as of June 30, 2018.

K. Implementation of New Accounting Standards

During the year ended June 30, 2018, the NMERB adopted the following Government Accounting Standards Board Statements (GASB):

GASB No. 75 – *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*. The primary objective of this Statement is to improve accounting and financial reporting by state and local governments for postemployment benefits other than pensions (other postemployment benefits or OPEB). It also improves information provided by state and local governmental employers about financial support for OPEB that is provided by other entities. This Statement results from a comprehensive review of the effectiveness of existing standards of accounting and financial reporting for all postemployment benefits (pensions and OPEB) with regard to providing decision-useful information, supporting assessments of accountability and interperiod equity, and creating additional transparency. **The statement does not have a material impact on the NMERB's financial statements.**

GASB No. 85 – *Omnibus*. The objective of this Statement is to address practice issues that have been identified during implementation and application of certain GASB Statements. This Statement addresses a variety of topics including issues related to blending component units, goodwill, fair value measurement and application, and postemployment benefits (pensions and other postemployment benefits). **The statement does not have a material impact on the NMERB's financial statements.**

Notes to the Financial Statements

Note 3 Net Pension Liability

Governmental employers participating in the Plan are required to report their proportionate share of the Plan's net pension liability, pension expense, and deferred outflows and inflows of resources within their financial statements, as well as to disclose financial information about the Plan.

The net pension liability is measured as the total pension liability, less the amount of the Plan's fiduciary net position. In actuarial terms, this is analogous to the accrued liability less the market value of assets (not the smoothed actuarial value of assets used in actuarial valuations based on the Board's adopted assumptions and methods).

A single discount rate of 5.69 percent was used to measure the total pension liability as of June 30, 2018. This single discount rate was based on an expected rate of return on pension plan investments of 7.25 percent and a municipal bond rate of 3.62 percent. Based on the stated assumptions and the projection of cash flows, the pension plan's fiduciary net position and future contributions were sufficient to finance the benefit payments through the year 2050. As a result, the long-term expected rate of return on pension plan investments was applied to projected benefit payments through the 2050 fiscal year, and the municipal bond rate was applied to all benefit payments after that date.

The source of the municipal bond rate as of June 30, 2018 is the rate for Fixed Income Market Data/Yield Curve/Data Municipal bonds with 20 years to maturity that include only federally tax-exempt municipal bonds as reported in Fidelity Index's "20-Year Municipal GO AA Index." In describing this index, Fidelity notes that the municipal curves are constructed using option adjusted analytics of a diverse population of over 10,000 tax exempt securities. The rate shown is as of the last date available on or before the measurement date.

The projection of cash flows used to determine this single discount rate assumed that plan member and employer contributions will be made at the current statutory levels. Additionally, contributions received through Alternative Retirement Plan (ARP) and the Return to Work Program are included in the projection of cash flows. These contributions are assumed to remain a level percentage of ERB payroll, where the percentage of payroll is based on the most recent five-year contribution history.

Notes to the Financial Statements

A. Net Pension Liability of Plan Membership

The components of the net pension liability at June 30, 2018 were as follows:

	2018
Total Pension Liability	\$ 24,861,631,831
Plan Fiduciary Net Position	<u>(12,970,300,855)</u>
Employer Net Pension Liability	<u>\$ 11,891,330,976</u>
Plan Fiduciary Net Position as a percentage of Total Pension Liability	52.17 %
Covered Payroll	\$ 2,678,214,885
Net Pension Liability as a percentage of Covered Payroll	444.00 %

B. Actuarial Assumptions

The actuarial assumptions used in the June 30, 2018 valuation were based on the new assumptions adopted by the Board on April 21, 2017 in conjunction with the six-year actuarial experience study for the period ending June 30, 2016.

The total pension liability, net pension liability, and certain sensitivity information were based on an actuarial valuation performed as of June 30, 2018. The total pension liability was rolled forward from the valuation date to the Plan's year ended June 30, 2018 using generally accepted actuarial principles. The roll-forward incorporates the impact of the new assumptions adopted by the Board on April 21, 2017. There were no other significant events or changes in benefit provisions that required an adjustment to the roll-forward liabilities as of June 30, 2018. The liabilities reflect the impact of the new assumptions adopted by the Board of Trustees on April 21, 2017 as well as the change in the single discount rate between June 30, 2017 and June 30, 2018. Specifically, the liabilities measured as of June 30, 2018 incorporate the following assumptions:

- All members with annual salary of more than \$20,000 will contribute 10.70 percent during the fiscal year ending June 30, 2015 and thereafter,
- Members hired after June 30, 2013 will have an actuarially reduced retirement benefit if they retire before age 55 and their COLA will be deferred until age 67,
- COLAs for most retirees are reduced until NMERB attains a 100 percent funded status,
- The new assumptions adopted by the Board on April 21, 2017 in conjunction with the change in the single discount rate, and
- For purposes of projecting future benefits, it is assumed that the full COLA is paid in all future years.

Methods and Assumptions Used to Determine the Total Pension Liability

2018	
Actuarial Cost Method	Entry age normal
Inflation	3.00%
Salary Increases	Composed of 2.50% inflation, plus 0.75% productivity increase rate, plus step-rate promotional increases for less than ten years of service
Investment Rate of Return	7.25%
Single Discount Rate	5.69%
Retirement Age	Experience based table of rates based on age and service. Adopted by NMERB Board on April 21, 2017 in conjunction with the six-year experience study for the period ended June 30, 2016.
Mortality	<p>Healthy Males – RP-2000 Combined Mortality Table with white collar adjustments, generational mortality improvements with scale BB from the table's base year of 2000.</p> <p>Healthy Females – GRS Southwest Region Teacher Mortality Table, set back one year, generational mortality improvements in accordance with scale BB from the table's base year of 2012.</p>

The target long-term expected rate of return on pension plan investments is determined annually using a building-block approach that includes the following:

- Rate of return projections are the sum of current yield plus projected changes in price (valuation, defaults, etc.)
- Application of key economic projections (inflation, real growth, dividends, etc.)
- Structural themes (supply and demand imbalances, capital flows, etc.) developed for each major asset class.

Notes to the Financial Statements

C. Sensitivity of the Net Pension Liability to Changes in the Discount Rate Assumption

The following table provides the sensitivity of the net pension liability to changes in the discount rate as of June 30, 2018. In particular, the table presents the Plan's net pension liability, if it were calculated using a single discount rate that is one percentage point lower (1% decrease) or one percentage point higher (1% increase) than the single discount rate:

Fiscal Year	Discount Rate	Net Pension Liability		
		1% Decrease	Current Single Rate Assumption	1% Increase
2018	5.69%	\$ 15,454,175,919	\$ 11,891,330,976	\$ 8,984,271,849

D. Rate of Return

Disclosure of the annual money-weighted return is a requirement of GASB 67. It incorporates both the size and timing of cash flows to determine an internal rate of return, and expresses investment performance adjusted for the changing amounts actually invested. The requirements of the calculation are listed below.

- The rate is computed net of investment expenses, but not net of administrative expenses.
- External cash flows used as inputs should be determined on at least a monthly basis.
- Cash flows should be determined on an accrual basis of accounting.
- Cash flow weighting should be representative of the Plan's actual external cash flow timing.

For the year ended June 30, 2018, the annual money-weighted rate of return on pension plan investments was 8.38 percent

Best estimates of geometric real rates of return for each major asset class included in the Plan's target asset allocation for fiscal year 2018 for 30-year return assumptions are summarized net of fees and inflation in the following table by asset class.

Schedule of Real Rates of Return by Asset Class

Asset Class	Percentage
Cash	-0.49%
U.S. Treasuries	-0.01%
IG Corp Credit	1.44%
Mortgage Backed Securities	-0.01%
Core Bonds*	0.47%
Treasury Inflation Protected Securities	0.48%
High-Yield Bonds	2.13%
Bank Loans	2.16%
Global Bonds (Unhedged)	-0.75%
Global Bonds (Hedged)	-0.47%
Emerging Market Debt External	1.64%
Emerging Market Debt Local Currency	3.10%
Large Cap Equities	4.03%
Small/Mid Cap Equities	4.24%
International Equities (Unhedged)	4.24%
International Equities (Hedged)	4.65%
Emerging International Equities	5.61%
Private Equity	5.92%
Private Debt	4.07%
Private Real Assets	4.24%
Real Estate	3.10%
Commodities	2.08%
Hedge Funds	2.97%

* Core Bonds assumption based on market weighted blend of components of Aggregate Index (Treasuries, IG Corp Credit, and Mortgage Backed Securities).

Notes to the Financial Statements

Note 4 State General Fund Investment Pool

The State General Fund Investment Pool (SGFIP) is the State of New Mexico's main cash account. In compliance with Section 6-10-3 NMSA 1978, and to optimize the state's cash management and investment practices, funds of various state agencies are deposited in the SGFIP. This pool is managed by the New Mexico State Treasurer's Office (STO). Claims on the SGFIP are reported as financial assets by the various agencies investing in the SGFIP.

As provided for in Chapter 8-6 of the New Mexico Statutes Annotated 1978, the State Treasurer shall receive and keep all monies of the State, except when otherwise provided, and shall disburse the public money upon lawful warrants. The State Treasurer's Office (STO) acts as the State's bank. Agency cash receipts are deposited with STO and pooled in a State Investment Fund, when amounts are greater than immediate needs they are placed into short-term investments. When agencies make payments to vendors and employees they are made from this pool and their claims on the pool reduced. The comprehensive cash reconciliation model, which compares aggregated agency claims on the State General Fund Investment Pool to the associated resources held by the State Treasurer's Office, is now in its fourth year. This process has been reviewed multiple times by the independent public accountants (IPAs) during the audits of the General Fund, the Department of Finance and Administration and the State of New Mexico's Comprehensive Annual Financial Report. The reviews have deemed the process to be sound and the Department fully compliant with the requirements of the monthly process.

- As of June 30, 2018, resources held in the pool were equivalent to the corresponding business unit claims on those resources.
- All claims recorded in SHARE are honored at face value.

NMERB believes the cash invested in STO's Overnight Pool is represented fairly based on reconciliation procedures performed by NMERB. NMERB has established internal control procedures consistent with the State's Manual of Model Accounting Practices (MAPs). These procedures are designed to avert accounting errors and violations of state and federal law and rules related to financial matters.

NMERB uses the State's financial software general ledger system, SHARE, monitoring balances through internal reporting, and performing reconciliation procedures throughout the fiscal year, following the Department of Finance and Administration's (DFA's) policies and procedures for fiscal safeguards. Cash balances posted in SHARE are correct to the extent that NMERB has control (i.e., collection, depositing, reconciling, and documentation of outstanding items) of the cash, and its receipts and transfers to the SGFIP and other state agencies are made pursuant to DFA's current policies and procedures. Each deposit, payment voucher, investment, and other transactions that affect cash are verified to ensure the amounts are accurate and correctly classified in SHARE.

NMERB does not collect any revenues that contribute to, or revert to, the SGFIP, but does maintain all deposits on account at STO which are identified by NMERB's business unit and fund number. NMERB's cash balances are required to be managed by STO per Section 8-6-3 NMSA 1978. Accordingly, NMERB's investments include an interest in the SGFIP equal to the cash balance on hand that is managed by STO for business unit 35200 and fund 60500. As of June 30, 2018, NMERB had \$8,463,094 invested in the SGFIP.

Notes to the Financial Statements

A. Interest Rate Risk

STO has an investment policy that limits investment maturities to five years or less on allowable investments. This policy enables STO to manage interest rate risk exposure to fair value losses arising from increasing interest rates. This policy is reviewed and approved annually by the New Mexico State Board of Finance (SBOF).

B. Credit Risk

For additional GASB 40 disclosure information regarding funds held by STO, the reader should see the separate audit report for the New Mexico State Treasurer's Office for the fiscal year ended June 30, 2018.

C. Cash and Short-Term Investments

In addition to the overnight investment of funds deposited to the SGFIP at STO, NMERB invests in the Short-Term Investment Fund (STIF) held by State Street Bank, NMERB's custody bank. The STIF is used to facilitate more efficient trade procedures among NMERB's external money managers. Net cash balances in each of the custody bank internal and external investment managers' portfolios are swept into the STIF at the end of each day. STIF investments and cash equivalents of \$222,421,991 as of June 30, 2018 is reported as cash and short term investment balances in NMERB's statement of net position.

The short-term investment balances include \$102,378 in the STO Local Government Investment Pool (LGIP) as of June 30, 2018.

D. Custodial Credit Risk

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, NMERB will not be able to recover deposits or will not be able to recover collateral securities held in the possession of an outside party. NMERB's investment securities, including cash invested overnight in a short-term investment fund, are held by State Street Bank, a third-party custodian, independent of any counterparty. State Street Bank by agreement holds sufficient assets to minimize the risk that NMERB would not be able to recover the value of investments held for NMERB. To minimize risk to operating cash held in the State's depository bank, Wells Fargo, management utilizes the services of STO for overnight investment in a commingled short-term investment fund (STIF). For the LGIP, public funds are exempt from disclosing custodial credit risk and concentration of credit risk.

Notes to the Financial Statements

Note 5 Refund Overpayments

In June 2010, the Board adopted a revised method for computing interest due on refunds of contributions to members that have terminated employment and elected to withdraw their contributions, and on refunds paid to a beneficiary of a deceased member, with an effective date of July 1, 2010. During implementation, a programming error resulted in 834 individuals receiving overpayments totaling \$1,691,929, and ranging from less than one dollar to \$306,264.

The State Constitution requires every reasonable effort be made to recover these funds and that interest be assessed on the overpayments. As of June 30, 2018, the uncollected balance including interest assessed, net of uncollectible amounts due to settlement, bankruptcy, or death, is \$252,309. The agency continues to take all reasonable actions to collect and settle these outstanding amounts.

Note 6 Fair Value Measurements

NMERB investments are measured and reported at fair value, and classified according to the following hierarchy:

- *Level 1* – Investments reflect prices quoted in active markets.
- *Level 2* – Investments reflect prices that are based on a similar observable asset either directly or indirectly, which may include inputs in markets that are not considered to be active.
- *Level 3* – Investments reflect prices based on unobservable sources.

The categorization of investments within the hierarchy is based upon the pricing transparency of the instrument and should not be perceived as an indication of investment risk.

Debt, equities, and investment derivatives classified in Level 1 of the fair value hierarchy are valued directly from a predetermined primary external pricing vendor. Assets classified in Level 2 are subject to pricing by an alternative pricing source due to lack of information available by the primary vendor. NMERB uses internal fair values provided by the investment manager for mortgage and asset backed securities classified in Level 3 due to lack of an independent pricing source. Fair value reporting for the fiscal years ending June 30, 2018 is provided on the pages that follow.

NMERB's investments in limited partnerships are valued at an estimated fair value based on their proportionate share of the partnership's fair value as recorded in the partnership's financial statements. The limited partnerships allocate gains, losses and expenses to the partners based on the ownership percentage as described in the partnership agreements. As of June 30, 2018, NMERB's additional future contribution commitments to limited partnerships totaled \$2.92 billion.

The following schedule presents a summary of NMERB's investments measured at fair value as of June 30, 2018.

Notes to the Financial Statements

Schedule of Investments and Short-Term Holdings Measured at Fair Value by Level (In Thousands)

June 30, 2018

Notes to the Financial Statements

The valuation method for investments measured at the net asset value (NAV) per share, or equivalent, is presented in the table below.

Investments Measured at Net Asset Value

	2018	Unfunded Commitments	Redemption Frequency (if Currently Eligible)	Redemption Notice Period
<i>(in Thousands)</i>				
Comingled Bond Funds	\$ 101,785	\$ -	Monthly	2 Months
Comingled Global Asset Allocation	970,541	-	Monthly, Quarterly, Semi-Annual, Annual	30-120 Days
Comingled International Equity Funds	1,474,086	-	Daily, Monthly	5-15 Days
Hedge Funds	494	-	In Liquidation Process	N/A
Opportunistic Credit Funds	2,341,880	659,672	Daily, Monthly, Quarterly, Semi-Annual	30-180 Days
Private Equity Funds	1,794,125	1,373,103	N/A	N/A
Private Real Assets	1,483,776	882,919	N/A	N/A
Total	<u>\$ 8,166,687</u>	<u>\$ 2,915,695</u>		

Commingled Bond Funds and Equity Funds. One (1) bond fund and five international equity funds are considered to be commingled in nature. Each are valued at the NAV of units held at the end of the period based on the fair value of the underlying investments.

Commingled Global Asset Allocation/ Risk Parity Funds. Consisting of four funds, this strategy invests across multiple asset sectors based upon outcomes of economic and technical analysis and may allocate risk across the portfolio in order to achieve optimal portfolio diversification. These investments are valued at the NAV per share.

Hedge Funds-Absolute Return. Consisting of two (2) funds, these investments are valued at NAV per share. A majority of these investments have been wound down, and due to contractual lock up restrictions, the remaining redeemable balance of these investments is difficult to determine.

Opportunistic Credit Funds. Consisting of twenty-four funds, this strategy's main focus is to invest in a variety of credit securities to enhance investment risk-adjusted returns and increase total portfolio diversification. These investments are valued at NAV per share. While many of these funds are currently eligible for redemption, some of the fund distributions received as underlying investments are liquidated, which may be up to ten (10) years from the commencement of the fund.

Private Equity. Consisting of seventy-seven (77) funds, investing primarily in buyout, distress, growth equity, and secondaries, with some exposure to mezzanine and venture. The fair value of these funds has been determined using the most recent financial information. These funds are not eligible for redemption. Distributions are received as underlying investments within the funds liquidated, which on average can occur over the duration of five (5) to ten (10) years.

Notes to the Financial Statements

Real Assets. Consisting of forty-seven (47) funds, investing primarily in real estate, natural resources, and infrastructure, the fair values of these funds have been determined using the most recent financial information. These funds are not eligible for redemption. Distributions are received as underlying investments within the funds when liquidated, which on average can occur over the duration of five (5) to ten (10) years.

Note 7 Investments

NMERB is authorized to invest or reinvest the fund in accordance with the Uniform Prudent Investor Act Section 45-7-601 NMSA 1978. Key provisions per the Uniform Prudent Investor Act are summarized below. Provisions of the Act:

- Set a higher standard of care and prudence for investments, above and beyond the previous standard and guiding principles of law,
- Apply to the trust as a whole, rather than individual investments,
- Require investment strategy to be based on suitable risk and reward strategies, and
- Require diversification unless the trustees reasonably determine it is not in the best interest of the fund.

A. Asset Allocation Policy

NMERB has adopted a strategic Asset Allocation Plan, containing weights, ranges, and benchmarks for each asset class. Over time this strategy is expected to achieve NMERB's assumed overall rate of return on Plan assets of 7.25 percent. Achieving the target weights is a long-term goal. In the short term, a particular asset position may represent an intermediate point in the process of attaining its target weight

NMERB's investment allocation policy was reviewed and amended by the Board of Trustees on August 26, 2016. Plan assets are managed on a total return basis with a long-term objective of achieving and maintaining a fully funded status for the benefits provided through the pension plan. The following schedule shows the asset allocation policy adopted on August 26, 2016 as well as the prior allocation policy targets.

Notes to the Financial Statements

Schedule of Asset Allocation Versus Policy Targets

	Allocation	Policy Target ¹
Equities		
<i>Domestic Equities</i>		
Large cap equities	16.60%	16%
Small-mid cap equities	3.20%	3%
Total domestic equities	19.80%	19%
<i>International Equities</i>		
Developed	4.90%	5%
Emerging markets	8.90%	9%
Total international equities	13.80%	14%
Fixed Income		
Core fixed income	6.80%	6%
Opportunistic credit	18.70%	18%
Emerging markets debt	1.70%	2%
Total fixed income	27.20%	26%
Alternatives		
Global asset allocation	4.90%	4%
Risk parity	5.20%	3%
Real Estate/REITS	2.00%	7%
Private equity	13.00%	13%
Real Assets	7.40%	8%
Other	5.40%	5%
Total alternatives	37.90%	40%
Cash	1.30%	1%
Total	100.00%	100%

1 Long-Term Policy Target approved by the Board on August 26, 2016.

B. Foreign Currency Risk

Foreign currency risk for investments is the risk that changes in exchange rates will adversely affect the underlying securities. NMERB's exposure to foreign currency risk is derived from positions held in foreign currency and currency-denominated investments. Managers are given discretion to hedge this risk. NMERB's foreign currency exposure as of June 30, 2018 was \$340,545,290. A detail schedule reflecting foreign currency exposure is shown next.

With respect to the LGIP, all investments are denominated in US dollars. The LGIP does not have any foreign currency risk.

Notes to the Financial Statements

Schedule of Foreign Currency Risk Exposure as of June 30, 2018

Continent	Currency	Equity Securities	Cash (Overdraft)	Net Foreign Currency Risk
AFRICA	SOUTH AFRICAN RAND	\$ 25,700,923	\$ 915	\$ 25,701,838

	POUND STERLING	-	1,403	1,403
	ROMANIAN LUE	425,546	1,758	427,304
Total Subject to Risk		<u>\$ 339,763,112</u>	<u>\$ 782,177</u>	<u>\$ 340,545,289</u>

C. Custodial Credit Risk

Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty, NMERB will not be able to recover the value of investments or collateral securities that are in the possession of an outside party.

All investment securities were held in a custodial position by State Street Bank, located in Boston, Massachusetts, during fiscal year 2018 in the name of NMERB. Deposits and securities held by the custody bank are collateralized with securities held by State Street Bank's trust department, as described in our custody agreement.

Notes to the Financial Statements

D. Interest Rate Risk

Interest rate risk relates to changes in interest rates that will adversely affect the fair value of an investment. NMERB's investing activities may lead earnings and capital to be exposed to movements in interest rates. Interest rate risk management is handled is managed through duration, and by operating within defined risk parameters. NMERB uses a weighted average method to determine the duration of its investments.

Schedule of Interest Rate Risk as of June 30, 2018

Investment Type	Amount	Duration (Years)
Asset & Mortgage Backed Securities	\$ 341,459,118	3.71
Corporate Obligations	260,050,928	4.53
U.S. Treasury Securities	191,410,353	5.19
International Government Obligations	148,930,864	6.95
U.S. Govt & Govt Related Obligations	15,217,578	11.34
Total	<u>\$ 957,068,841</u>	5.84

E. Concentration of Credit Risk

Concentration risk is identified by the amount of investment in any one issuer that represents five percent or more of the fiduciary net position. As of June 30, 2018, with the exception of U.S. Government and Agency securities, NMERB was not exposed to any concentration risk greater than five percent.

F. Credit Risk

Credit risk for investments is the risk that an issuer or other counterparty to an investment agreement will not fulfill its obligations. Credit risk is managed through diversification and by operating within NMERB defined parameters instead of using a benchmark index. Excluding those investments issued by, or explicitly guaranteed by, the U.S. government, which are not considered to have credit risk, NMERB's credit quality distribution for investments with credit risk exposure at June 30, 2018 is presented in the Summary of Investments by Rating schedule. NMERB's investments were rated and categorized according to Standard & Poor's rating standards. The schedule below summarizes the investments by category subject to credit risk as of June 30, 2018.

Summary of Investments Subject to Credit Risk, at Fair Value

Asset and Mortgage Backed Securities	\$ 242,038,095
Collateralized Debt Obligations	108,113,756
Corporate Securities	315,733,298
Bank Loans, Bonds and Treasury Bills	291,183,691
Total	<u>\$ 957,068,841</u>

Notes to the Financial Statements

Investments by category and credit risk are listed below as of June 30, 2018.

Summary of Investments by Category and Credit Risk

Moody's Quality Rating	Total	Asset & Mortgage Backed Securities	Collateralized Debt Obligations	Corporate Securities	Bank Loans Bonds & Treasury Bills
AAA	\$ 6,524,845	\$ -	\$ -	\$ -	\$ 6,524,845
AA	503,829,061	209,634,308	102,784,400	-	191,410,353
A	70,319,805	32,403,787	-	1,207,844	36,708,174
BBB	312,245,395	-	-	312,245,395	-
BB	58,820,379	-	-	2,280,060	56,540,319
Not Rated	5,329,356	-	5,329,356	-	-
Total	<u>\$ 957,068,841</u>	<u>\$ 242,038,095</u>	<u>\$ 108,113,756</u>	<u>\$ 315,733,299</u>	<u>\$ 291,183,691</u>

G. Cash Balances

NMERB earns interest on all monies held in the Agency's custodial agent bank. When a security purchase transaction fails to be completed due to the broker not delivering the purchased security on settlement date, the cash remains with custodial agent bank. When this occurs, NMERB's money is invested overnight in a Short-Term Investment Fund (STIF). As of June 30, 2018, NMERB had \$213,602,328 on deposit with State Street Bank (SSB).

State law requires (Section 8-6-3 NMSA, 1978) the agency's operating cash to be managed by the New Mexico State Treasurer's Office (STO), which invests monies held overnight. STO ensures adequate protection of State monies for agency deposit accounts by requiring all qualified financial institutions to pledge collateral to secure public deposits. As of June 30, 2018, NMERB had \$8,463,094 on deposit with STO. The State Local Government Investment Pool (LGIP) balance as of June 30, 2018 was \$102,378. Additional information regarding NMERB's cash balances can be found on page 80.

Note 8 Derivative Instruments

Derivatives are generally defined as contracts or securities whose value depend on, or derive from, the value of an underlying asset, reference rate, or index.

The Board has adopted GASB Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments*, which addresses the recognition, measurement, and disclosure of derivative instruments. This note describes the Board's investment derivative instruments measured at fair value in the Statement of Fiduciary Net Position and Statement of Changes in Fiduciary Net Position.

NMERB's investment policies do allow portfolio managers to trade in certain derivatives for hedging purposes.

The notional or contractual amounts of derivatives indicate the extent of the Board's involvement in the various types and uses of derivative financial instruments and do not measure the Board's exposure to credit or market risks

Notes to the Financial Statements

and do not necessarily represent amounts exchanged by the parties. The amounts exchanged are determined by reference to the notional amounts and other terms of the derivatives.

The following table summarizes the aggregate notional or contractual amounts related to NMERB's derivative financial instruments as of June 30, 2018.

Notional Amounts, Fair Value <i>(in Thousands)</i>	
	2018
Foreign Exchange Forward Contracts	\$ 119,477
Options - puts purchased	1,684
Options - puts sold	(3,368)

The fair values of derivative instruments outstanding as of June 30, 2018 are classified by type and by the changes in fair value of the derivative instrument in the following table. A summary of foreign exchange contracts by currency is in section "B" on page 60.

Unrealized Gain/(Loss), as of June 30, 2018				
Derivative Type	Classification	Gain/(Loss) <i>(in Thousands)</i>	Classification	Amount <i>(in Thousands)</i>
Options - purchased	Investment Income	\$ (39)	Investment	\$ 169
Options - sold	Investment Income	98	Investment	(84)

A. Derivative Risks

NMERB is exposed to credit risk in the event of nonperformance by counterparties to financial instruments. Portfolio managers authorized to invest in derivatives manage the contractual obligation within established policy parameters for both the types of derivatives and the counterparty ratings, ensuring these contracts are made with high quality institutions. NMERB can be exposed to market risk in the event that changes in market conditions cause investments to decline in value. This exposure is managed within guidelines related to the types of instruments bought or sold and parameters for offsetting positions. Foreign currency risk is the risk that changes in exchange rates will adversely affect the investments. Managers of these assets are given discretion to hedge this risk.

B. Foreign Currency Exchange Contracts

NMERB may enter into forward contracts to purchase and sell foreign currencies in the normal course of investing activities to manage currency exposure associated with NMERB's foreign equity and fixed income investments. The terms of these contracts generally do not exceed one year. The credit risk associated with these contracts is minimal as they are limited to a small number of highly rated counterparties. NMERB's foreign exchange contracts by currency type are summarized below.

Notes to the Financial Statements

Summary of Foreign Exchange Contracts by Currency at June 30, 2018

Continent	Currency	Buys	Unrealized Gain/Loss	Sells	Unrealized Gain/Loss

	Total	<u>\$ 60,940</u>	<u>\$ 640</u>	<u>\$ 58,538</u>	<u>\$ (1,215)</u>

Notes to the Financial Statements

C. Options

An option contract is a contract in which the writer of the option grants the buyer of the option the right to purchase from (“call option”), or sell to (“put option”), the writer of a designated instrument at a specified price within a specified period of time. When NMERB purchases or writes an option, an amount equal to the premium paid or received by the Plan is recorded as an asset or liability and is subsequently adjusted to the current market value of the option purchased or written. Gain or loss is recognized when the option contract expires or is closed. There were no open written or purchased options as of June 30, 2018.

D. Swap Contracts

Swap contracts are executed on a number of different bases. NMERB employed both interest rate swap contracts and credit default swap contracts on June 30, 2018. An interest rate swap contract is an agreement between two parties to exchange periodic interest payments. One party agrees to make payments to the other based on a fixed rate of interest in exchange for payments based on a variable rate. NMERB employs interest rate swap contracts to adjust fixed income portfolio durations. A credit default swap contract is similar to an insurance policy, with the credit risk of an individual issuer or a basket of issuers (the “reference asset”) the insured factor. Under such a contract, two parties enter into an agreement whereby the first party pays the second party a fixed periodic payment for the specified life of the contract (analogous to an insurance premium). The other party makes no payment unless a credit event related to the reference asset occurs. If such an event takes place, the second party is obligated to make a payment to the first party. The size of the payment is linked to the decline in the reference asset’s market value following determination of the occurrence of a credit event.

E. Hedge Funds

The use of derivatives is allowed under the Hedge Fund Investment Policy. These investments are under the management of the external Hedge Fund managers who are employed in the “Hedge Fund,” “Emerging Market Debt,” and “Opportunistic Credit” classifications.

F. Asset-Backed Securities

In accordance with investment policy and fiduciary principles, the Plan invests in various forms of asset-backed securities that fit the previous definition of derivative securities. These securities are held by NMERB for investment purposes. The assets presented by investment category, at fair value, as of June 30, 2018 are as follows:

Schedule of Asset-Backed Securities

Security Type	Amount
Asset-Backed Securities	\$ 32,357,390
Non-Agency Mortgage-Backed Securities	107,881,154
Total	<u>\$ 140,238,544</u>

Notes to the Financial Statements

Note 9 Capital Assets

Capital assets are used in operations and have useful lives extending beyond a single reporting period. Assets costing \$5,000 or more per Section 12-1-10, NMSA 1978 are recorded at historical cost and depreciated over their useful lives. Furniture, fixtures, and equipment are depreciated over five to ten years; building and improvements are depreciated over twenty-five years. A schedule of capital asset activity for the year ended June 30, 2018 is shown below.

Depreciation expense reported as part of administrative expenses is \$265,192 for fiscal year 2018. NMERB disposed of \$47,801 in capital assets during fiscal year 2018 consisting primarily of obsolete computer equipment.

Schedule of Capital Asset Activity 2018

	Balance June 30, 2017	Additions	Deletions	Balance June 30, 2018
Capital Assets, at Cost				
Land & Land Improvements	\$ 248,172	\$ -	\$ -	\$ 248,172
Depreciable Land Improvements	19,361	-	-	19,361
Building and Building Improvements	3,385,166	51,332	-	3,436,498

Notes to the Financial Statements

Note 10 Accrued Compensated Absences

Qualified employees are entitled to accumulate vacation leave according to a graduated leave schedule of 80 to 160 hours per year, depending upon the length of service and the employee's hire date. A maximum of 30 working days (equivalent to 240 hours) of such accumulated vacation leave can be carried forward into the beginning of the next calendar year. Any excess accumulated vacation leave is forfeited on a calendar year basis.

When employees terminate employment with the State, they are compensated for accumulated vacation leave as of the termination date, up to a maximum of 240 hours. All balances for each employee have been recorded at their current pay rate as of June 30, 2018.

Qualified employees are entitled to accumulate sick leave at the rate of one day for each calendar month of service. There is no limit to the amount of sick leave an employee can accumulate. Once per fiscal year, in either January or July, employees may elect to be paid for accrued sick leave in excess of 600 hours but less than 720 hours at 50 percent of their current hourly rate.

In the case of retiring employees, they may be paid for accrued sick leave in excess of 600 hours but less than 1,000 hours at 50 percent of their current hourly rate. All sick leave balances in excess of 600 hours but less than 720 hours for each employee have been recorded as a liability at 50 percent of their current hourly rate.

Schedule of Compensated Absences

	Balance July 1, 2017	Increase	Decrease	Balance June 30, 2018
Compensated Absences	<u>\$ 590,201</u>	<u>\$ 234,167</u>	<u>\$ (136,715)</u>	<u>\$ 687,653</u>

The portion of compensated absences due after one year is not material, and therefore, not separately presented. The amount of compensated absences is calculated by multiplying the vested hours by the pay rate at year-end plus applicable payroll taxes.

Notes to the Financial Statements

Note 11 Retirement Plans

NMERB employees who do not possess a teaching or administrative certificate have the option of participating in the Educational Employees Retirement Plan or the Public Employees Retirement Plan. In the past, some NMERB employees elected to participate in the Educational Employees Retirement Plan. Currently, all employees participate in the Public Employees Retirement Plan. A summary of both plans is listed below.

A. Public Employees Retirement Association (PERA)

The Public Employee Retirement Plan is a qualified governmental plan under Section 401(a) of the Internal Revenue Code (IRC) administered by the Public Employees Retirement Association (PERA), which provides retirement, disability, and survivor benefits pursuant to the Public Employees Retirement Act. PERA is a cost-sharing, multiple employer defined benefit plan. PERA issues a separate, publicly available financial report that includes financial statements and required supplementary information. The report is available at www.pera.state.nm.us.

B. PERA Funding Policy

Plan members are required to contribute 8.92 percent of their gross salary. NMERB is required to contribute 16.99 percent of the gross covered salary. The contribution requirements for Plan members and NMERB are established under Chapter 10, Article 11, NMSA 1978. The requirements may be amended by acts of the legislature. Total contributions from NMERB and Plan members to PERA for fiscal year ended June 30, 2018 were \$669,157.

C. Educational Retirement Board (NMERB)

The New Mexico Educational Retirement Board administers a cost sharing multiple employer Plan authorized by the Educational Retirement Act established in Chapter 10, Article 22, NMSA 1978. NMERB administers the Plan which is a cost-sharing, multiple employer defined benefit plan providing retirement, disability, and survivor benefits to plan members (certified teachers and other employees of state public schools, colleges and universities, public charter schools). NMERB issues a separate, publicly available financial report that includes financial statements and required supplementary information. The report is available at www.nmerb.org.

D. NMERB Funding Policy

2018 Member Contributions – Plan members whose annual salary is \$20,000 or less are required to contribute 7.9 percent of their gross salary. Plan members whose annual salary exceeded \$20,000 are required to contribute 10.7 percent of their gross salary.

2018 Employer Contributions – Employers contribute 13.9 percent of the gross covered salary for employees whose annual salary was \$20,000 or less, and 13.9 percent of the gross covered salary for employees whose salary exceeded \$20,000.

Contribution requirements of the Plan are established under Chapter 22, Article 11 NMSA 1978. The requirements may be amended by acts of the legislature. There were no contributions from NMERB and Plan members to the Plan for fiscal years ended June 30, 2018.

Notes to the Financial Statements

E. GASB 68 – Financial Reporting and Disclosure for Multiple-Employer Cost Sharing Pension Plans by Employers

According to the Department of Finance and Administration (DFA), consistent with the requirements of GASB No. 68, the State of New Mexico has implemented the standard for the fiscal year ending June 30, 2015. NMERB, as part of the primary government (fiduciary fund) of the State of New Mexico, is a contributing employer to the cost-sharing multiple employer PERA fund. Disclosure requirements for governmental funds apply to the primary government as a whole, and as such, this information will be presented in the Component Appropriation Funds Annual Financial Report (General Fund) and the Comprehensive Annual Financial Report (CAFR) of the State of New Mexico. Information concerning the net pension liability, pension expense, and pension-related deferred inflows and outflows of resources of the primary government will be contained in the General Fund and the CAFR, and will be available, when issued, from the Office of the State Controller, Room 166, Bataan Memorial Building, 407 Galisteo Street, Santa Fe, New Mexico 87501.

Note 12 Post-Employment Benefits – Retiree Health Care Plan

Compliant with the requirements of Government Accounting Standards Board Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, the State of New Mexico has implemented this standard for the fiscal year ended June 30, 2018.

The NMERB, as part of the primary government of the State of New Mexico, is a contributing employer to a cost-sharing multiple-employer defined benefit postemployment health care plan that provides comprehensive group health insurance for persons who have retired from certain public service positions in New Mexico. The other postemployment benefits (OPEB) Plan is administered by the Retiree Health Care Authority of the State of New Mexico. Overall, total OPEB liability exceeds OPEB Plan net position resulting in a net OPEB liability. The State has determined the State's share of the net OPEB liability to be a liability of the State as a whole, rather than any agency or department of the State and the liability will not be reported in the department or agency level financial statements of the State. All required disclosures will be presented in the Comprehensive Annual Financial Report (CAFR) of the State of New Mexico.

Information concerning the net liability, benefit expense, and benefit-related deferred inflows and deferred outflows of resources of the primary government will be contained in the State of New Mexico Comprehensive Annual Financial Report (CAFR) for the year ended June 30, 2018 and will be available, when issued, from the Office of the State Controller, Room 166, Bataan Memorial Building, 407 Galisteo Street, Santa Fe, New Mexico, 87501.

Note 13 Risk Management

NMERB is exposed to various risks of loss for which it carries insurance (auto, employee bond, general liability, civil rights and foreign jurisdiction, money and securities, property, and workers' compensation) with the Risk Management Division (RMD) insurance program of the New Mexico General Services Department (GSD). The Plan's coverages are designed to satisfy the requirements of State tort claims. All claims are processed through RMD.

Notes to the Financial Statements

Note 14 Statutory Disclosures

Section 2.2.2.10P(2) of the Audit Rule 2011, 2.2.2 NMAC entitled, “Requirements for Contracting and Conducting Audits of Agencies” requires that state agencies disclose all special, deficiency, and specific appropriations. NMERB had no open appropriations as of fiscal year end 2018.

Note 15 Pending Litigation and Claims

During each business cycle, NMERB may be named as a defendant in administrative appeals arising from the normal course of business. Legal counsel believes resolution of any currently pending matters will not have a material effect on the financial statements.

Notes to Schedule:

The change for the fiscal year ending June 30, 2015 includes the impact of the new assumptions adopted by the Board on June 12, 2015. The change for the fiscal year ending June 30, 2017 includes the impact of the new assumptions adopted by the Board on April 21, 2017 as well as the change in the single discount rate between June 30, 2016 and June 30, 2017. The change for the fiscal year ending June 30, 2018 includes the change in the single discount rate.

The covered employee payroll is the actual payroll, imputed from the total employer contributions for active members, for the years ending June 30.

SCHEDULE OF INVESTMENT RETURNS

Fiscal Year Ending June 30,	Annual Money - Weighted Rate of Return
2018	8.38 %
2017	11.91 %
2016	2.68 %
2015	4.06 %
2014	14.71 %
2013	11.12 %
2012	1.87 %
2011	19.30 %
2010	*
2009	*

Notes to Schedule:

Governmental Accounting Standards Board (GASB) Statement 67 requires pension plans to disclose the annual money-weighted rate of return (MWRR). The MWRR incorporates both the size and the timing of cash flows to determine an internal rate of return. The MWRR considers the changing amounts actually invested during a period and weights the amount of pension plan investments by the proportion of time they are available to earn a return during that period. This rate of return is computed net of investment expenses but not net of administrative investment expenses.

*Complete data for this schedule is not available prior to fiscal year 2011.

2007	364,128,448	255,982,299	108,146,149	2,341,100,000	10.93 %

Notes to Schedule:

The valuation date for fiscal year 2018 is June 30, 2017. Actuarially determined contribution rates are calculated as of years ending June 30. Employers and members contribute based on statutorily fixed rates.

Methods and Assumptions for Actuarially Determined Contribution Rate for Fiscal Year 2018

Actuarial Cost Method	Entry age normal
Amortization Method	Level percentage of payroll
Remaining Amortization Period	Amortized over a closed thirty-year period from June 30, 2012 ending June 30, 2042.
Asset Valuation Method	Five-year smoothed market
Inflation	3.00%
Salary Increases	Composed of 2.50% inflation, plus .75% productivity increase rate, plus step-rate promotional increases for members with less than ten years of service.
Investment Rate of Return	7.25%
Retirement Age	Experience-based table of rates based on age and service. Adopted by NMERB Board on April 21, 2017 in conjunction with the six-year experience study for the period ending June 30, 2016
Mortality	<p>Healthy Males – RP-2000 Combined Mortality Table with white collar adjustments, generational mortality improvements with scale BB from the table's base year of 2000.</p> <p>Healthy Females - GRS Southwest Region Teacher Mortality Table, set back on year, generational mortality improvements in accordance with scale BB from the table's base year of 2012.</p>

2. Professional investment services represent the cost of investment manager and consulting contracts.
3. Communication expenses are allocated based on the number of staff in the workgroup.
4. Investment facility expenses represent leased office space in Santa Fe and Albuquerque, New Mexico.
5. Software expenses represent the costs of software licensing and maintenance for investment software.
6. Travel expenses include the cost of employee in-state and out of state business travel.
7. General administrative expenses for investment operations represent costs for information feeds, subscriptions, memberships, and other overhead allocated based on the number of staff in the workgroup and are included in the total administrative operations expenses.

Less Federal Deposit Insurance Corporation Coverage		<u>(250,000)</u>
Total Uninsured Public Funds	\$	<u>4,091</u>

Notes to Schedule

1. Individual deposit accounts and investment accounts held in the name of the New Mexico Educational Retirement Board are shown above as required by Section 12-6-5(A) NMSA 1978. All cash activity is accounted for within the Statewide Human Resources Accounting and Management System (SHARE) fund number 60500.
2. Additional information on credit risk related to state agency investments held in the State Treasurer's General Fund Investment Pool can be found in the State Treasurer's separately issued financial statements which disclose the collateral pledged to secure cash and investments.
3. State Street Bank balances for cash held by foreign currency and other portfolio managers is securitized by State Street Bank. See Note 7 for additional information on custodial and credit risk with respect to funds held by State Street Bank (SSB).
4. With respect to the Local Government Investment Pool (LGIP) in fiscal year 2018, the funds maintained by the State Treasurer's Office (STO) were rated AAAM by Standard & Poor's. As a Public Fund, STO is not required to disclose custodial risk and concentration of credit risk for this fund.
5. STO used the Weighted Average Maturity (WAM) method to report interest rate risk. As of June 30, 2018 the LGIP WAM (R) was 50 days and the WAM (F) was 100 days where WAM (R) indicates the number of days until the floating interest rate resets, and WAM (F) indicates the number of days to final maturity. Additional information can be found on STO's website at www.nmsto.gov.
6. New Mexico LGIP AAAM Rated \$102,378 [50] day WAM (R); [100] day WAM (F).

Other Supplemental Information

NMERB reports annual performance measure results (outputs and outcomes) through the state's budget process in pursuit of cost-effective and responsive government services in conformance with the Accountability in Government Act (Sections 6-3A-1 to 6-3A-9 NMSA 1978). Agency performance measures are included in the General Appropriations Act. NMERB selected the measures shown above based on our primary services of prudent asset management, pension benefit administration, and outreach and training services for both our membership and educational employers.

ACCOUNTABILITY IN GOVERNMENT ACT PERFORMANCE MEASURES JUNE 30, 2018

Type	Description	Target	Actual
Outcome	Average rate of return over a cumulative Five-year period	7.25 %	8.10 %
Outcome	Member seminar and training satisfaction ratings*	95 %	95 %
Outcome	Ten-year performance ranking in a national peer survey of public plans	<50%	21%
Outcome	Funding period of unfunded actuarial accrued liability in years**	<30	61

Notes to Schedule

* NMERB created more opportunities for members and employers to attend training workshops in regional settings or at their own sites. These sessions are in high demand and helpful for educating our current membership and future retirees.

** NMERB's contribution rate structure is intended to be sufficient to pay NMERB's normal cost and to amortize the unfunded actuarial accrued liability (UAAL) in payments which are level as a percentage of payroll. Except for short-term fluctuations, the amortization period should not extend beyond June 30, 2042 (30 years from June 30, 2012) in accordance with the funding policy set by the Board of Trustees. The amortization period, or funding period, is the number of years expected to be required to completely amortize the UAAL, assuming that NMERB's experience is consistent with all of the actuarial assumptions.

**INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING
AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL
STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS**

Members of the State of New Mexico
Educational Retirement Board

Mr. Wayne Johnson
New Mexico State Auditor

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of the New Mexico Educational Retirement Board (ERB) as of and for the year ended June 30, 2018, and the related notes to the financial statements, which collectively comprise ERB's basic financial statements, and have issued our report thereon dated November 21, 2018.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered ERB's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of ERB's internal control. Accordingly, we do not express an opinion on the effectiveness of ERB's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis.

A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Members of the State of New Mexico
Educational Retirement Board

Mr. Wayne Johnson
New Mexico State Auditor

Compliance and Other Matters

As part of obtaining reasonable assurance about whether ERB's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Exit Conference

EXIT CONFERENCE JUNE 30, 2018

NMERB staff prepared the Management Discussion and Analysis (MD&A), financial statements, statements, schedules, and notes for the fiscal years ended June 30, 2018. The contents of this report were discussed during an exit conference with the Audit Committee of the Board of Trustees and management of NMERB on November 16, 2018. The following individuals attended this exit conference:

Educational Retirement Board

Jan Goodwin, Executive Director
Rick Scroggins, Deputy Director
Rod Ventura, General Counsel
Norma Henderson, Chief Financial Officer
Lawrence Esquibel, Chief Information Officer
Monica Lujan, Member Services Director
Mary Lou Cameron, Audit Committee Chairperson
H. Russell Goff, Vice-Chairperson
Tim Eichenberg, State Treasurer

CliftonLarsonAllen, LLP, CPAs

Jason Ostroski, Engagement Principal (via conference call)
Brittany Smith, Audit Manager (via conference call)
Raul Anaya, Local Auditor

The contents of this report will also be presented to the NMERB Board of Trustees as part of the regular board meeting on February 15, 2019.

ACTUARIAL SECTION

October 26, 2018

Board of Trustees
Educational Retirement Board of New Mexico
P.O. Box 26129
Santa Fe, NM 87502-0129

Subject: Actuarial Valuation as of June 30, 2018

Dear Members of the Board:

The results of the June 30, 2018 annual actuarial valuation are presented in this report. We certify that the information contained in this report is accurate and fairly presents the actuarial position of the Educational Retirement Board of New Mexico (ERB) as of June 30, 2018.

This report was prepared at the request of the Board and is intended for the Board's use and those designated or approved by the Board. This report may be provided to parties other than the ERB only in its entirety and only with the permission of the Board.

To the best of our knowledge, this report is based on benefit provisions in effect as of June 30, 2018, audited financial information prepared as of that date, member data gathered as of that date, and the actuarial assumptions and methods previously adopted by the Board.

Valuations are prepared annually, as of June 30th of each year, the last day of ERB's plan and fiscal years.

ACTUARIAL VALUATION

The primary purposes of the valuation report are to determine the adequacy of the current employer contribution rate, to describe the current financial condition of ERB, to analyze changes in ERB's financial condition, and to provide various summaries of the membership data.

Board of Trustees
October 26, 2018
Page 2

This report does not provide information required under Governmental Accounting Standards Board (GASB) Statement Nos. 67 & 68. All of the information required by GASB is provided in a stand-alone report entitled “GASB Reporting and Disclosure Information for ERB Fiscal Year Ending June 30, 2018.”

The valuation report provides a “snapshot” of ERB’s estimated financial condition as of the valuation date. The valuation does not predict ERB’s future financial condition or its ability to pay benefits in the future and it also does not provide any guarantee of future financial soundness of ERB. Over time, ERB’s total cost will depend on a number of factors, including the amount of benefits the plan pays, the number of members receiving benefits, the period of time over which benefits are paid, plan expenses, and the amount earned on any assets invested toward the payment of benefits. These amounts and other variables are uncertain and unknowable at the valuation date. To prepare the valuation report, actuarial assumptions, including those adopted by the Board on April 21, 2017, are used in a forward looking financial and demographic model to present a single scenario from a wide range of possibilities; the results based on that single scenario are included in the valuation. The future is uncertain and the plan’s actual experience will differ from those assumptions; these differences may be significant or material because the results are sensitive to the assumptions made, and, in some cases, to the interaction between the assumptions.

Different assumptions or scenarios within the range of possibilities may also be reasonable and results based on those assumptions would be different. As a result of the uncertainty inherent in a forward-looking projection over a long period of time, no one projection is uniquely “correct” and many alternative projections of the future could also be regarded as reasonable. Two different actuaries could, quite reasonably, arrive at different results based on the same data and different views of the future.

FINANCING OBJECTIVES

In accordance with HB 628 (2011 Regular Session) and SB 115 (2013 Regular Session), employer contributions for the current fiscal year are scheduled to be 13.90% of active member payroll, member contributions for employees with annual salary more than \$20,000 are 10.70% of pay, and member contributions for employees with annual salary of \$20,000, or less, are 7.90% of pay.

In addition to the above, certain higher education employers make a contribution equal to 3.00% of the total payroll for their employees who have elected to join the Alternative Retirement Program rather than ERB.

In accordance with the funding policy as set by the Board of Trustees, these rates are intended to be sufficient to pay ERB’s normal cost and to amortize ERB’s unfunded actuarial accrued liability (UAAL) over a period that should not extend beyond June 30, 2042 (30 years from June 30, 2012). The amortization period, also referred to as the funding period, is the number of years expected to be required to completely amortize the UAAL, assuming that ERB’s experience exactly follows all of the actuarial assumptions.

Board of Trustees
October 26, 2018
Page 3

PROGRESS TOWARD REALIZATION OF FINANCING OBJECTIVES

The funded condition of the plan, as measured by the funded ratio, increased slightly from 2017 to 2018. The increase was primarily due to the recent investment performance, demographic gains and favorable COLA experience.

The funded ratio (the ratio of the actuarial value of assets to the actuarial accrued liability) increased from last year. The funded ratio as of June 30, 2017 was 62.9%. It is now 63.5% as of June 30, 2018. Five years ago this ratio stood at 60.1%, and ten years ago the ratio was 71.5%. If the ratio were calculated using the market value of assets rather than the actuarial value of assets, it would be 63.4% as of June 30, 2018, up from 63.0% as of June 30, 2017. During the last fiscal year, the UAAL increased from \$7.4 billion to \$7.5 billion.

The funded status is one of many metrics used to show trends and develop future expectations about the health of a retirement system. The funded status measure itself is not appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligations or assessing the need for or the amount of future contributions since it does not reflect normal cost contributions, the timing of amortization payments, or future experience other than expected.

The plan's funding period as of the valuation date is infinite. This is a theoretical calculation of the period that will be required to amortize the UAAL, assuming that the current year's amortization payment increases at the payroll growth rate (3.00% per annum) in the future. The infinite period compares with the 124.6-years period calculated as of the prior actuarial valuation date. An infinite period means that the principal on the UAAL will never be paid down.

This calculation of the funding period is a "snapshot" as of the valuation date and ignores a number of factors: (i) lower normal cost rate in the future since all new members will be eligible for Tier 3 benefits, (ii) the known deferred asset gains and losses that are reflected in the actuarial value of assets and that will be recognized over the next four years, and (iii) future cost-of-living adjustments that may be less than the assumed annual 1.9% increase. The impact of these factors on ERB's funding period is discussed in Section C.

RECENT EVENTS

The annual return from 2017 to 2018 on the market value of assets was approximately 7.2% and the annual return from that same period on the actuarial value of assets was 7.5%. The return on the actuarial value of assets of greater than the assumed return rate of 7.25% reflects the five-year "smoothing" of gains and losses at work in the asset valuation method; for instance, in 2015 not all the losses were recognized at one time in the actuarial value of assets and likewise, for this valuation, not all of the 2017 gains have been recognized in

Board of Trustees
October 26, 2018
Page 4

the actuarial value of assets. The net result of the losses from 2015, 2016 (when compared to the investment return assumption of 7.75%) and 2018, along with the gains from 2014 and 2017 recognized in this valuation, is an overall gain on the actuarial value of assets measured from last year to this year (a return of 7.5% versus the assumed return of 7.25%).

In accordance with the assumption changes discussed below, future investment returns will be compared to the investment return assumption of 7.25%.

BENEFIT PROVISIONS

There were no modifications to the benefit provisions that were reflected in the actuarial valuation as of June 30, 2018.

ASSUMPTIONS AND METHODS

Actuarial assumptions and methods are set by the Board of Trustees, based upon recommendations made by the plan's actuary. The Board adopted new assumptions on April 21, 2017 in conjunction with the six-year actuarial experience study period ending June 30, 2016. At that time, the Board adopted a number of economic assumption changes, including a decrease in the inflation assumption from 3.00% to 2.50%. The 0.50% decrease in the inflation assumption also led to decreases in the nominal investment return assumption from 7.75% to 7.25%, the assumed annual wage inflation rate from 3.75% to 3.25%, the payroll growth assumption from 3.50% to 3.00%, and the annual assumed COLA from 2.00% to 1.90%.

We believe the recommended assumptions and methods are internally consistent, are reasonably based on the actual experience of ERB, and comply with the Actuarial Standards of Practice.

The results of the actuarial valuation are dependent upon the actuarial assumptions used. Actual results can and almost certainly will differ, as actual experience deviates from the assumptions. Even seemingly minor changes in the assumptions can materially change the liabilities, calculated contribution rates and funding periods.

MEMBER AND FINANCIAL DATA

Member data for retired, active, and inactive participants was supplied as of June 30, 2018 by the ERB staff. We have not subjected this data to any auditing procedures, but have examined the data for reasonableness and consistency with the prior year's data. Asset information as of June 30, 2018 was also supplied by the ERB staff.

We provided some of the information used in the Comprehensive Annual Financial Report. Specifically, we provided information used in preparing the schedules of Active Member Valuation Data, Retirants and Beneficiaries, Analysis of Financial Experience, Solvency Test, and the Schedule of Retirees & Beneficiaries

Actuarial Certification Letter

Board of Trustees
October 26, 2018
Page 5

Added to/and Removed from Rolls that are found in the Actuarial Section; and we provided the Schedule of Changes in the Employers' Net Pension Liability and Related Ratios as well as the Schedule of Employer Contributions in the Financial Section.

CERTIFICATION

All of our work conforms with generally accepted actuarial principles and practices, and to the Actuarial Standards of Practice issued by the Actuarial Standards Board. In our opinion, our calculations also comply with the requirements of New Mexico state law and, where applicable, the Internal Revenue Code, ERISA, and the Statements of the Governmental Accounting Standards Board.

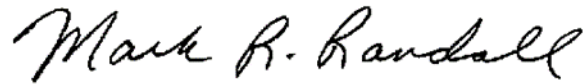

The undersigned are independent actuaries and consultants. Both are Enrolled Actuaries and are Members of the American Academy of Actuaries, and meet all of the Qualification Standards of the American Academy of Actuaries. Both of the undersigned are experienced in performing valuations for large public retirement systems.

We would like to especially thank the ERB staff for its assistance in the preparation of our report.

Respectfully submitted,

R. Ryan Falls, FSA, EA, MAAA
Senior Consultant

Mark R. Randall, FCA, EA, MAAA
Chief Executive Officer

Actuarial Standards of Practice Disclosure Statements

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law.

This report should not be relied on for any purpose other than the purpose described above. Determinations of the financial results associated with the benefits described in this report in a manner other than the intended purpose may produce significantly different results.

The valuation was based upon information furnished by the ERB's staff, concerning ERB benefits, financial transactions, plan provisions and active members, terminated members, retirees and beneficiaries. We checked for internal and year-to-year consistency but did not audit the data. We are not responsible for the accuracy or completeness of the information provided by the ERB's staff.

The developed findings included in this report consider data or other information through June 30, 2018.

This is one of multiple documents comprising the actuarial report. The other document comprising the actuarial report is a PowerPoint presentation presented to the Board of Trustees following the publication of this report.

Introduction

The results of the June 30, 2018 actuarial valuation of the Educational Retirement Board of New Mexico (ERB) are presented in this report. Table 1 of our report summarizes the key actuarial results. Table 2 analyzes changes in the unfunded actuarial accrued liability. Tables 3 and 4 show more detailed actuarial information. Tables 5a and 5b develop the Funding Policy Contribution and compare to the actual contributions received. Tables 6a, 6b, 6c, 13, 14, 15 and 16 show statistical information about the membership, and Tables 7 through 9b, and Table 11 show information about plan assets. Tables 10a and 10b show the calculation of the actuarial gains and losses. Table 12 shows the solvency test, used by some funds in their annual report. Finally, Appendix 1 is a summary of the benefit and contribution provisions of ERB, Appendix 2 is a summary of the actuarial methods and assumptions, and Appendix 3 is a glossary of terms.

Actuarial Information

The determination of the unfunded actuarial accrued liability (UAAL) and the funding period involves the following steps:

- The actuarial present value of future benefits is determined for the present members, including retired members, beneficiaries, inactive members and active members. This amounts to \$23.0 billion, as shown in Table 3 of our report.
- The entry age normal actuarial cost method is used to allocate the actuarial present value of future benefits between the portion due for the current year (the normal cost), prior years (the actuarial accrued liability), and future years (the future normal costs). The actuarial accrued liability is \$20.5 billion, as shown on line 5d in Table 1 of our report.
- Under the entry age normal actuarial cost method, the current and future normal costs are determined as a level percentage of payroll. Table 4 shows an analysis of the normal cost rate. The amount needed to fund the current and future normal costs is 13.68% of payroll inclusive of member contributions. This is the total (member plus employer) contribution rate needed to pay for the average member.
- Part of the normal cost is paid by the employee contributions of 10.70%, leaving 2.98% to be funded by the employers (i.e., the current year's employer normal cost is 2.98% of payroll). This is shown on line 2 in Table 1. The balance of the employer contribution is used as payment on the UAAL. The employer contribution is expected to increase in future years and this will affect the amount of funding available to amortize the UAAL.
- The unfunded actuarial accrued liability (UAAL) is determined by subtracting the actuarial value of assets from the actuarial accrued liability. (The actuarial value of assets is a smoothed market value, as discussed in more detail below.) The UAAL is \$7.5 billion as shown on line 7 in Table 1.
- Since the statutory employer contribution rate is 13.90% and the employer normal cost rate is 2.98%, the difference of 10.92% is used to amortize the UAAL. The 3.00% employer contribution made on behalf of ARP members is also used to amortize the UAAL.
- Finally, the funding period is calculated by determining how long it will take to reduce the UAAL to zero, assuming that the current year's amortization contribution increases at the 3.00% payroll growth period each year. This period is currently infinite. (Note, however, that this calculation does not reflect the lower normal cost rate in the future since all new members will be eligible for Tier 3 benefits and future cost-of-living adjustments that may be less than the assumed 1.9% increase. Further, it assumes a 7.25% return on the actuarial value of assets, not the market value. Alternate projections show that it will take approximately 70 years to amortize the unfunded actuarial accrued liability when incorporating the expected decrease in the normal cost rate, the expected reductions in cost-of-living adjustments, and the assumed a 7.25% return on the market value of assets. These alternate projections are referred to as the Open Group Projection in this report).

Analysis of Changes

Table 2 shows an analysis of the changes in the UAAL. Since the UAAL is an actuarial present value, with future anticipated benefits discounted using an annual 7.25% interest rate, the UAAL increases each year by the imputed interest rate, less employer contributions made to amortize the UAAL. (Keep in mind that part of the employer contribution is used to pay the normal cost, so only part of each year's contribution is available to amortize the UAAL.)

As shown in Table 2, the UAAL increased by \$533.8 million for imputed interest and decreased by \$320.3 million because of contributions made in excess of the normal cost. This means that the UAAL was expected to increase \$213.5 million before recognizing plan experience. The UAAL as of June 30, 2017 was \$7.4 billion, and the expected UAAL as of June 30, 2018, recognizing actual contributions made, is \$7.6 billion.

A cost-of-living adjustment (COLA) was applied as of July 1, 2018 to retirement benefits for retirees eligible to receive a COLA as defined in Section 22-11-31 of the New Mexico Statutes Annotated. A 2.00% adjustment factor was applied to all disabled retirees who had been retired for at least three years, i.e., members who began receiving a disability retirement benefit in calendar year 2014 or earlier. Since the plan's funded ratio as of June 30, 2017 was 90% or less, all non-disability retirements with 25 or more years of service credit at retirement and whose monthly annuity is less than the median monthly benefit of all non-disability retirees from the prior year (i.e., \$1,611.45 as of June 30, 2018) received an annual adjustment of 1.80%. All remaining non-disability retirements received an annual adjustment of 1.60%. Note that the adjustment is only applied to members who retired in calendar year 2017 or earlier; members who retired in 2018 are ineligible. The overall actual COLA was less than the expected 2.0% which resulted in a net \$24.5 million decrease in UAAL.

The plan experienced an actuarial gain on investments of \$26.2 million. The investment gain resulted from the fact that the return on the actuarial value of assets, 7.5%, was greater than the 7.25% assumed investment return. This gain was the result of recognizing 20% of the losses from FY2015, FY2016 and FY2018, with 20% of the gains from FY2014 and FY2017. The market rate of return in FY2018 was 7.2%. The investment returns stated in this report are calculated net of administrative and investment-related expenses and may differ from the actual rate of return reported by ERB's investment consultants.

There was no benefit change and assumption change since the last actuarial valuation.

As a result of all the above experience, the UAAL increased from \$7.4 billion to \$7.5 billion.

Funding Policy

The Board of Trustees has established a funding policy with a goal of eliminating the UAAL by June 30, 2042 (30 years from June 30, 2012). This funding policy does not directly impact the level of funding on an annual basis since the members and the employers all contribute a fixed percentage of payroll. However, the funding policy contribution amount provides the Board of Trustees with a valuable benchmark which can be used to determine whether the total contribution being received by ERB is sufficient to meet the long-term goal of eliminating the UAAL by June 30, 2042.

Table 5a of our report calculates the Funding Policy Contribution and Table 5b tracks how closely the contributions received during the past fiscal year compared to the Funding Policy Contribution. As noted on Table 5b, ERB only received 71% of the contributions necessary to meet their Funding Policy.

Comments on Benefit Provisions

Appendix 1 of our report summarizes the provisions of ERB. This valuation reflects benefits promised to members by statute. There are no ancillary benefits - retirement type benefits not required by statutes but which might be deemed an ERB liability if continued beyond the availability of funding by the current funding source.

The overall percentage increase of the Consumer Price Index resulted in a base adjustment of two percent during the preceding fiscal year. Additionally, the ERB funded status was less than 100%. As a result of these two factors, ERB granted a reduced COLA on July 1, 2018 which resulted in an actuarial gain of \$24.5 million.

Comments on Actuarial Assumptions and Methods

Actuarial assumptions and methods are set by the Board of Trustees, based upon recommendations made by the plan's actuary. The Board adopted new assumptions on April 21, 2017 in conjunction with the six-year actuarial experience study period ending June 30, 2016. At that time, the Board adopted a number of economic assumption changes, including a decrease in the inflation assumption from 3.00% to 2.50%. The 0.50% decrease in the inflation assumption also led to decreases in the nominal investment return assumption from 7.75% to 7.25%, the assumed annual wage inflation rate from 3.75% to 3.25%, the payroll growth assumption from 3.50% to 3.00%, and the annual assumed COLA from 2.00% to 1.90%.

There were no assumption changes since prior valuation.

We believe the recommended assumptions are internally consistent and are reasonably based on the actual experience of ERB. Appendix 2 of our report summarizes the current actuarial assumptions being utilized in the preparation of the actuarial valuations.

In addition to the actuarial assumptions, the actuary also makes use of an actuarial funding method to allocate costs to particular years. In common with most public sector retirement plans, ERB uses the entry age normal actuarial cost method. This method produces a relatively level pattern of funding over time, and thereby provides equity between various generations of taxpayers. We continue to believe this method is appropriate for ERB.

Assets

ERB assets are held in trust. The ERB staff has provided the asset information as of June 30, 2018 used in this valuation.

Table 7 of our report shows a reconciliation of the assets from the beginning of the prior year to the valuation date.

Table 8 shows the development of the actuarial value of assets (AVA). The AVA is a “smoothed” market value. A smoothed value is used in order to dampen some of the year-to-year fluctuations that would occur if the market value were used instead. The method used phases in differences between the actual and expected market returns over five years. The expected return is determined using the 7.25% assumption and the plan’s market value, adjusted for contributions received and benefits and refunds paid. Both the actual and expected returns are computed net of investment and administrative expenses.

Note that the actuarial value is currently 100.2% of the market value. The dollar amount of the difference between the actuarial value and market value is the value of the deferred losses, and totals \$26.3 million. Over any short time period, a disparity between actuarial value and market value may appear, but over the long term, we would expect the actuarial value and the market value to continue to track each other fairly closely.

Table 9a shows that the investment return rate for FY2018 on market value was 7.2%, while it was 7.5% on the actuarial value of assets. Table 9b shows historical return rates since the current actuarial asset method was adopted.

Finally, Table 11 shows a history of cash flows to the trust, and the net cash flow measured as a percentage of the assets. The net cash flow is slightly negative, 3.4% of market value. A slightly negative cash flow like this is typical for a mature defined benefit plan where the annual investment earnings are expected to finance a large portion of the annual benefit payments.

It should be noted that the actual rate of return on the market value of assets of 7.2% that is stated in this report is based on a simplifying assumption that all contributions and benefit payments occur in the middle of the year. Additionally, this return is calculated net of administrative and investment-related expenses. This methodology is consistent with other procedures incorporated into this actuarial valuation. However, this actual rate of return may differ from the actual rate of return reported by ERB’s investment consultants which are based on more sophisticated methods.

Member Data

Membership data was provided in electronic files by the ERB staff. Data for active members includes gender, birthdate, service, salary paid in the prior year, and accumulated contributions. Data for inactive, nonretired members was similar, but includes the member's accrued benefit as well. For retired members, data includes status (service retiree, disabled retiree or beneficiary), gender, birthdate, pension amount, form of payment, beneficiary gender and birthdate if applicable, and date of retirement.

While not verifying the correctness of the data at the source, we performed various tests to ensure the internal consistency of the data and its overall reasonableness.

Tables 6a and 6b summarize the data for all members. Table 6c is a history of key statistical information about active members, and Table 13 is a history of statistical information about retirees. Table 14 is an age/service distribution of active members and their average pay. Table 15 is a reconciliation that tracks changes in the plan population from last year to this year.

The number of active members increased since last year, from 59,495 to 60,358.

Total payroll increased 0.7% since last year. For all comparative purposes, payroll is the amount supplied by the ERB staff (i.e., the 2017-2018 member pay). However, this figure is increased by one year's expected pay increase to determine the member's rate of pay as of July 1, 2018. Pay is assumed to change only at the beginning of a school/fiscal year.

Average pay decreased 0.7% since last year. Average pay for members active in both this valuation and the last year's valuation increased 1.2%. The difference between these two figures is due to the effect of retirements and terminations, and their replacement by new members who generally earn less.

Risks Associated with Measuring the Actuarial Accrued Liability and Actuarially Determined Employer Contribution

The determination of the actuarial accrued liability and the actuarially determined employer contribution (ADEC) requires the use of assumptions regarding future economic and demographic experience. Risk measures, as illustrated in this report, are intended to aid in the understanding of the effects of future experience differing from the assumptions used in the course of the actuarial valuation. Risk measures may also help with illustrating the potential volatility in the accrued liability and the actuarially determined contribution that result from the differences between actual experience and the actuarial assumptions.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions due to changing conditions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period, or additional cost or contribution requirements based on the System's funded status); and changes in plan provisions or applicable law. The scope of an actuarial valuation does not include an analysis of the potential range of such future measurements.

Examples of risk that may reasonably be anticipated to significantly affect the System's future financial condition include:

1. Investment risk – actual investment returns may differ from the expected returns;
2. Asset/Liability mismatch – changes in asset values may not match changes in liabilities, thereby altering the gap between the accrued liability and assets and consequently altering the funded status and contribution requirements;
3. Contribution risk – actual contributions may differ from expected future contributions. For example, actual contributions from the State may not be made in accordance with the current arrangement or material changes may occur in the anticipated number of covered employees, covered payroll, or other relevant contribution base;
4. Salary and Payroll risk – actual salaries and total payroll may differ from expected, resulting in actual future accrued liability and contributions differing from expected;
5. Longevity risk – members may live longer or shorter than expected and receive pensions for a period of time other than assumed;
6. Other demographic risks – members may terminate, retire or become disabled at times or with benefits other than assumed resulting in actual future accrued liability and contributions differing from expected.

The effects of certain trends in experience can generally be anticipated. For example if the investment return since the most recent actuarial valuation is less (or more) than the assumed rate, the cost of the plan can be expected to increase (or decrease). Likewise if longevity is improving (or worsening), increases (or decreases) in cost can be anticipated.

The Funding Policy Contribution calculated in Tables 5a and 5b may be considered as a minimum contribution that complies with the Board's funding policy and State statute. The timely receipt of the Funding Policy

Supporting Schedules

Contribution is critical to support the financial health of the System. Users of this report should be aware that contributions made consistent with the Funding Policy Contribution do not necessarily guarantee benefit security.

Plan Maturity Measures

Risks facing a pension plan evolve over time. A young plan with virtually no investments and paying few benefits may experience little investment risk. An older plan with a large number of members in pay status and a significant trust may be much more exposed to investment risk. Generally accepted plan maturity measures include the following:

	2018	2017
Ratio of the market value of assets to total payroll	4.7	4.6
Ratio of actuarial accrued liability to payroll	7.5	7.3
Ratio of actives to retirees and beneficiaries	1.2	1.3
Ratio of net cash flow to market value of assets	-3.4%	-3.0%
Duration of the actuarial accrued liability	12.7	12.8

Ratio of Market Value of Assets to Payroll

The relationship between assets and payroll is a useful indicator of the potential volatility of contributions. For example, if the market value of assets is 2.0 times the payroll, a return on assets 5% different than assumed would equal 10% of payroll. A higher (lower) or increasing (decreasing) level of this maturity measure generally indicates a higher (lower) or increasing (decreasing) volatility in plan sponsor contributions as a percentage of payroll.

Ratio of Actuarial Accrued Liability to Payroll

The ratio of liability to payroll may be used as a measure of sensitivity of the liability itself. For example, if the actuarial accrued liability is 2.5 times the payroll, a change in liability 2% other than assumed would equal 5% of payroll. A higher (lower) or increasing (decreasing) level of this maturity measure generally indicates a higher (lower) or increasing (decreasing) volatility in liability (and also plan sponsor contributions) as a percentage of payroll.

Ratio of Actives to Retirees and Beneficiaries

A young plan with many active members and few retirees will have a high ratio of active to retirees. A mature open plan may have close to the same number of actives to retirees resulting in a ratio near 1.0. A super-mature or closed plan may have significantly more retirees than actives resulting in a ratio below 1.0.

Risk Assessment

Ratio of Net Cash Flow to Market Value of Assets

A positive net cash flow means contributions exceed benefits and expenses. A negative cash flow means existing funds are being used to make payments. A certain amount of negative net cash flow is generally expected to occur when benefits are prefunded through a qualified trust. Large negative net cash flows as a percent of assets may indicate a super-mature plan or a need for additional contributions.

Duration of Actuarial Accrued Liability

The duration of the actuarial accrued liability may be used to approximate the sensitivity to a 1% change in the assumed rate of return. For example, duration of 10 indicates that the liability would increase approximately 10% if the assumed rate of return were lowered 1%.

Additional Risk Assessment

Additional risk assessment is outside the scope of the annual actuarial valuation. Additional assessment may include scenario tests, sensitivity tests, stochastic modeling, stress tests, and a comparison of the present value of accrued benefits at low-risk discount rates with the actuarial accrued liability.

Table 1

Actuarial Information

	June 30, 2018	June 30, 2017
	(1)	(2)
1. Payroll		
a. Supplied by System (annualized)	\$ 2,609,168,136	\$ 2,591,195,672

A solvency test is one way of evaluating a system’s progress under its funding program. In a short-term solvency test, the plan's present assets are compared with:

1. The liabilities for active member accumulated contributions on deposit;
2. The liabilities for future benefits to present retirees and beneficiaries; and
3. The liabilities for service already rendered by active and inactive members.

In a system that has been following an actuarially determined financing principle, the liabilities for active member contributions on deposit (column 2) and the liabilities for future benefits to present retirees (column 3) should be fully covered by present assets. In addition, the additional liabilities for service already rendered by active members (column 4) should be partially covered by the remainder of present assets. Generally, if the system has been using actuarially determined financing, the funded portion of the liability will increase over time.

Table 13

Table 15

Reconciliation of Members by Status for Year Ending June 30, 2018

	Active Members	Inactive, Nonretired Members		Annuitants			Grand Total
		Vested	Nonvested	Service Retirees	Disabled Retirees	Beneficiaries	
Number at beginning of year	59,495	10,581	36,098	43,282	840	3,218	153,514
Refund paid (non-death)	(1,545)	(410)	(2,077)				(4,032)
Refund due	(3,135)		3,135				0
Vested terminations	(1,504)	1,504					0
Retirements (non-disabled)	(1,755)	(525)	(35)	2,315			0
Disabled retirements	(20)	(16)			36		0
New Alternate Payee resulting from QDRO				40			40
Death before retirement - refund							0
Death before retirement - annuity	(26)					26	0
Death of annuitant - survivor benefit due				(193)	(11)	204	0
Death of annuitant - no further benefits due				(624)	(21)	(169)	(814)
New hires	6,905	77	1,099				8,081
Reemployments	1,943	(610)	(1,322)	(11)			0
Adjustments and corrections		20	(7)	(13)			0
Number at end of year	60,358	10,621	36,891	44,796	844	3,279	156,789

Table 16

**Schedule of Retirees & Beneficiaries
Added to/and Removed from Rolls**

Year Ending June 30,	Added to Rolls		Removed from Rolls		Rolls - End of Year		% Increase/ Decrease in Annual Allowances	Average Annual Benefit
	Number	Annual Allowances*	Number	Annual Allowances	Number	Annual Allowances		
(1)	(2)	(2)	(3)	(3)	(4)	(4)	(5)	
2012	2,768	\$ 72,218,345	889	\$ 14,359,797	37,336	\$ 768,140,575		\$ 20,574
2013	3,855	102,030,450	881	15,541,594	40,310	854,629,431	11.3%	21,201
2014	2,913	69,897,967	977	16,901,682	42,246	907,625,716	6.2%	21,484
2015	2,861	72,123,070	1,064	18,187,814	44,043	961,560,972	5.9%	21,832
2016	2,879	65,686,730	1,125	20,801,404	45,797	1,006,446,298	4.7%	21,976
2017	2,682	68,362,756	1,139	20,082,332	47,340	1,054,726,722	4.8%	22,280
2018	2,744	75,757,772	1,165	21,822,890	48,919	1,108,661,604	5.1%	22,663

* The Annual Allowances added to the rolls in each year include the COLA granted to all retirees for the year. As a result, the Annual Allowances added to the rolls do not necessarily correspond to the number of retirees and beneficiaries added to the rolls in the same year.

Notes to Schedule: Information prior to 2012 is not available. Until a ten-year trend is available, this schedule will only present information for the years that the information is available.

Summary of Plan Provisions

1. Effective Date: July 1, 1957
2. Plan Year/Fiscal Year: Twelve-month period ending June 30th.
3. Administration: The Educational Retirement Board of New Mexico (ERB) is responsible for administration of the plan and investment of plan assets.
4. Type of Plan: ERB is a qualified, defined benefit, governmental retirement plan. For government accounting purposes, it is a cost-sharing multiple-employer public employee retirement system.
5. Eligibility: All those employed and working more than 0.25 of a full-time equivalent (FTE) at public and state schools in New Mexico, including public colleges, universities, public technical and vocational institutions participate in ERB. Employees at regional education cooperatives and the New Mexico Activities Association participate in ERB. In addition, employees at certain state agencies that provide an educational program also participate if the employee filling a position is required to be a certified educator. Their participation is a condition of employment. However, see the section on the Alternative Retirement Plan below for an exception. Moreover, employees of ERB, the Public Education Department, certain State agencies, School for the Visually Handicapped, and School for the Deaf can choose to be ERB members upon hire.
6. Member Contributions: Members must contribute a percentage of their salary to ERB. “Salary” for this purpose includes substantially all earnings. The member contribution rate is set by statute, and has been changed from time to time. The following schedule shows recent and future member contribution rates. Member contributions are paid directly by employers so member contributions are considered “pre-tax” for federal income tax treatment.

Fiscal Year Ended	Member Contribution Rate
FYE 2005 and earlier	7.60%
FYE 2006	7.67%
FYE 2007	7.75%
FYE 2008	7.82%
FYE 2009	7.90%
FYE 2010*	9.40%
FYE 2011*	9.40%
FYE 2012*	11.15%
FYE 2013*	9.40%
FYE 2014*	10.10%
FYE 2015 and later*	10.70%

* For members whose annual salary is greater than \$20,000. Members with annual salary of \$20,000 or less will continue to contribute 7.90%.

Summary of Plan Provisions

7. Employer Contributions: The school district or other local administrative unit which employs a member contributes a percentage of the member’s salary to ERB. “Salary” for this purpose includes substantially all earnings. The employer contribution rate is set by statute, and has been changed from time to time. The following schedule shows recent and future employer contribution rates. In addition, state universities, colleges and junior colleges contribute 3% of the earnings of non-members who are participating in the Alternative Retirement Plan.

Fiscal Year Ended	Employer Contribution Rate
FYE 2005 and earlier	8.65%
FYE 2006	9.40%
FYE 2007	10.15%
FYE 2008	10.90%
FYE 2009	11.65%
FYE 2010*	10.90%
FYE 2011*	10.90%
FYE 2012*	9.15%
FYE 2013*	10.90%
FYE 2014	13.15%
FYE 2015 and later	13.90%

*For members whose annual salary is greater than \$20,000. For members with annual salary of \$20,000 or less, the employer contributed 12.40% in FYE2010 through FYE2013.

8. Service: Employees receive credit for each calendar quarter in which they are contributing members. Credit is also granted for service prior to ERB’s effective date, and certain military service. Allowed service credit may also be purchased for specific types of prior employment, including military service, teaching in another state, or teaching for an accredited private school or higher learning institution in New Mexico.
9. Tier: Members who join ERB by June 30, 2010 are in Tier 1, members who join between July 1, 2010 and June 30, 2013 are in Tier 2, and members who join later are in Tier 3. Members who terminated, took a refund, later rejoined ERB, and repaid their refund to ERB prior to June 30, 2013 were allowed to rejoin their prior tier. Otherwise, members that take a refund and later rejoin ERB will be eligible for Tier 3 benefits.
10. Final Average Compensation (FAC): The average of the member’s earnings for the last five years, or such other five consecutive year period that gives the largest average. Monthly benefits are based on one-twelfth of this amount.

Summary of Plan Provisions

11. Normal Retirement

a. Eligibility:

- Tier 1 members may retire upon Normal Retirement on the earliest of (i) the date he/she attains age 65 with credit for 5 years of service, or (ii) the date the member completes 25 years of service, or (iii) the date that the sum of the member's age and service is at least 75, provided the member is at least age 60.
- Tier 2 and Tier 3 members may retire upon Normal Retirement on the earliest of (i) the date he/she attains age 67 with credit for 5 years of service, or (ii) the date the member completes 30 years of service, or (iii) the date that the sum of the member's age and service is at least 80, provided the member is at least age 65.

b. Monthly Benefit: 2.35% of FAC (monthly) times years of service. Tier 3 members who retire with 30 years of service and prior to attaining age 55 shall have their benefits reduced to an amount equal to the actuarial equivalent of the benefit the member would receive if the member had retired at age 55.

c. Payment Form: Benefits are paid as a monthly life annuity, with a guarantee that if the sum of payments made does not exceed the member's accumulated contributions with interest, determined as of the date of retirement, the balance will be paid in a lump-sum to the member's beneficiary. Optional forms of payment are available; see below.

12. Early Retirement

a. Eligibility: Tier 1 members may take early retirement once the sum of his/her age and service equals or exceeds 75, while Tier 2 and Tier 3 members may take early retirement once the sum of his/her age and service equals or exceeds 80.

b. Monthly Benefit: 2.35% of FAC (monthly) times years of service, multiplied by the early retirement factor in next page.

Summary of Plan Provisions

c. Early Retirement Factors:

Tier 1		Tier 2 and Tier 3	
Age at Retirement	Factor	Age at Retirement	Factor
60 or later	1.000	65 or later	1.000
59	.976	64	.976
58	.952	63	.952
57	.928	62	.928
56	.904	61	.904
55	.880	60	.880
54	.808	59	.808
53	.736	58	.736
52	.664	57	.664
51	.592	56	.592
50	.520	55	.520
49	.448	54	.448
48	.376	53	.376
47	.304	52	.304
46	.232	51	.232
45	.160	50	.160

The reduction for Tier 1 members is from age 60 and the reduction for Tier 2 and Tier 3 members is from age 65. The reduction is 2.4% per year for the first five years the retirement precedes age 60 (Tier 1) or age 65 (Tier 2 and Tier 3), and 7.2% for any additional years before the indicated age.

d. Payment Form: Same as for Normal Retirement above.

13. Disability Retirement

- a. Eligibility: A member is eligible provided (i) he/she has credit for at least 10 years of service, and (ii) the disability is approved by the Board of Trustees.
- b. Monthly Benefit: 2% of FAC (monthly) times years of service, but not less than the smaller of (i) one-third of FAC, or (ii) 2% of FAC times years of service projected to age 60.
- c. Payment Form: The disability benefit commences immediately upon the member's retirement. Disability benefits are payable as a monthly life annuity, with a guarantee that if the payments made do not exceed the sum of the member's accumulated contributions with interest as of the date of retirement, the balance will be paid in a lump-sum to the member's beneficiary. If the disabled member survives to age 60, the regular optional forms of payment are available.

Summary of Plan Provisions

14. Vested Termination Benefit

- a. Eligibility: A member with at least five (5) years of service who does not withdraw his/her contributions from the fund is eligible for a vested termination benefit.
- b. Monthly Benefit: 2.35% of FAC (monthly) times years of service. Both FAC and Service are determined at the time the member leaves active employment.
- c. Payment Form: Benefits commence when the participant attains his/her normal retirement age. Alternatively, benefits may commence at the early retirement age, applying the same reduction factors as are used for regular early retirement. The form of payment is the same as for Normal Retirement above.
- d. Death Benefit: Upon the death of an inactive vested member who has not retired, the beneficiary may elect to receive an annuity as described under the Death in Service benefit below, with payments deferred until the member would have been eligible for retirement if the member was not eligible at the time of death. Alternatively, the beneficiary may receive a refund of the member's contributions, plus interest based upon a rate set by the Board of Trustees.

15. Withdrawal (Refund) Benefit

- a. Eligibility: All members leaving covered employment with less than five (5) years of service for a reason other than the member's death. Alternatively, members eligible for other benefits may withdraw their contributions in lieu of the regular benefits due.
- b. Benefit: The member who elects to withdraw receives a lump-sum payment of his/her employee contributions, plus interest computed at a rate set by the Board of Trustees.

16. Death in Service

Benefit: Upon the death of an active member, the beneficiary may receive a refund of the member's contributions, plus interest based upon a rate set by the Board of Trustees. If the member has five (5) or more years of service, the beneficiary may elect to receive an annuity determined as though the member had retired, elected option B below, and then died, in lieu of the refund. If the member is not eligible for early or normal retirement, this benefit may still be elected, with payments deferred until the member would have been eligible for retirement.

17. Optional Forms of Payment: There are optional forms of payment available on an actuarially equivalent basis, as follows:

- a. Option B – A Joint and 100% Survivor annuity with a “pop-up” feature. The regular life annuity amount is reduced to provide a Joint and 100% Survivor benefit, i.e., a benefit payable as long as either the member or joint annuitant are alive. If the joint annuitant predeceases the member, then the member's benefit amount reverts to the regular life annuity amount.

Summary of Plan Provisions

- b. Option C – A Joint and 50% Survivor annuity with a “pop-up” feature. The regular life annuity amount is reduced to provide a Joint and 50% Survivor benefit, i.e., a benefit payable as long as both the member and the joint annuitant are alive, reducing to 50% of this amount upon the member’s death, if the joint annuitant is still living. If the joint annuitant predeceases the member, then the member’s benefit amount reverts to the regular life annuity amount.

18. Cost-of-Living Increase: All retired members and beneficiaries receiving benefits receive an automatic adjustment in their benefit commencing on July 1 following the later of: (i) the year a member retires, or (ii) the year in which a member attains age 65 (Tier 1 and Tier 2) or age 67 (Tier 3).

If the plan’s funded ratio for the next preceding fiscal year is 100%, or greater, Section 22-11-31(C)(1) of the New Mexico Statutes Annotated defines the adjustment factor as $\frac{1}{2}$ of the percentage increase of the consumer price index between the next preceding calendar year and the preceding calendar year. The adjustment factor cannot exceed four percent, nor be less than two percent. However, if the percentage increase of the consumer price index is less than two percent, the adjustment factor will be equal to the percentage increase of the consumer price index.

If the plan’s funded ratio for the next preceding fiscal year is greater than 90%, but less than 100%, Section 22-11-31(C)(2) indicates that the adjustment factor for all non-disability retirements will be 95% of the adjustment factor defined in Section 22-11-31(C)(1) if the member had 25 or more years of service credit at retirement and whose annuity is less than or equal to the median adjusted annuity for the fiscal year next preceding the adjustment date. For all other retirees eligible for an adjustment, the adjustment factor will be 90% of the adjustment factor defined in Section 22-11-31(C)(1).

If the plan’s funded ratio for the next preceding fiscal year is 90%, or less, Section 22-11-31(C)(3) indicates that the adjustment factor for all non-disability retirements will be 90% of the adjustment factor defined in Section 22-11-31(C)(1) if the member had 25 or more years of service credit at retirement and whose annuity is less than or equal to the median adjusted annuity for the fiscal year next preceding the adjustment date. For all other retirees eligible for an adjustment, the adjustment factor will be 80% of the adjustment factor defined in Section 22-11-31(C)(1).

Finally, annuities shall not be decreased in the event that there is a decrease in the consumer price index between the next preceding calendar year and the preceding calendar year.

19. Alternative Retirement Plan (ARP): Beginning July 1, 1991, certain members employed by higher education may elect participation in the ARP, a defined contribution plan, rather than in ERB. If this election is not made at the time of initial hire, the employee remains a member of the ERB defined benefit plan permanently. No benefits are paid to ARP members from the ERB defined benefit plan. Also as discussed in the section on Employer Contributions above, the employer of an ARP member makes a contribution of 3.00% of the member’s salary to ERB.

Summary of Actuarial Assumptions and Methods

I. Valuation Date

The valuation date is June 30th of each plan year. This is the date as of which the actuarial present value of future benefits and the actuarial value of assets are determined.

II. Actuarial Cost Method

The contribution rate is set by statute for both employees and for the employers. The funding period is determined, as described below, using the Individual Entry Age Normal actuarial cost method.

The Individual Entry Age Normal actuarial cost method assigns the plan's total unfunded liabilities (the actuarial present value of future benefits less the actuarial value of assets) to various periods. The unfunded actuarial accrued liability is assigned to years prior to the valuation, and the normal cost is assigned to the year following the valuation. The remaining costs are the normal costs for future years. Then each year's contribution is composed of (i) that year's normal cost, plus (ii) a payment used to reduce the unfunded actuarial accrued liability.

The normal contribution is determined using the Entry Age Normal method. Under this method, a calculation is made to determine the rate of contribution which, if applied to the compensation of each individual member during the entire period of anticipated covered service, would be required to meet the cost of all benefits payable on his behalf. The salary-weighted average of these rates is the normal cost rate. This calculation reflects the plan provisions that apply to each individual member. The employer normal cost rate is equal to (i) the normal cost rate, minus (ii) the member contribution rate.

The actuarial accrued liability is the difference between the total present value of future benefits and the actuarial present value of future normal costs. The unfunded actuarial accrued liability is the excess of the actuarial accrued liability over the actuarial value of assets.

The balance of the employers' contributions--the remainder after paying their share of the normal cost--is used to reduce the unfunded actuarial accrued liability. The funding period is the length of time required for the unfunded actuarial accrued liability to be completely amortized, assuming that the portion used to reduce the unfunded liability remains level as a percentage of total payroll, which is assumed to grow 3.00% per year. The 3.00% contribution made by employers to ERB on behalf of employees who elected to participate in the Alternative Retirement Plan is also used to amortize the unfunded actuarial accrued liability.

It is assumed that contributions are made monthly at the end of the month.

III. Actuarial Value of Assets

The actuarial value of assets is based on the market value of assets with a five-year phase-in of actual investment return in excess of (less than) expected investment income. Expected investment income is determined using the assumed investment return rate and the market value of assets (adjusted for receipts and disbursements during the year). Returns are measured net of all investment and administrative expenses.

Summary of Actuarial Assumptions and Methods

IV. Actuarial Assumptions

A. Economic Assumptions

1. Investment return: 7.25%, compounded annually, net of expenses. This is made up of a 2.50% inflation rate and a 4.75% real rate of return.
2. Salary increase rate: Inflation rate of 2.50% plus productivity increase rate of 0.75% plus step-rate/promotional as shown:

Years of Service	Annual Step-Rate/Promotional Component Rates of Increase	Total Annual Rate of Increase
0	8.75%	12.00%
1	3.00%	6.25%
2	2.00%	5.25%
3	1.50%	4.75%
4	1.25%	4.50%
5	1.00%	4.25%
6	0.75%	4.00%
7	0.50%	3.75%
8	0.50%	3.75%
9	0.50%	3.75%
10 or more	0.00%	3.25%

3. Cost-of-living increases: 1.90% per year, compounded annually. Note that increases are deferred until July 1 following the year a member retires, or the year in which a member attains the age of 65 (67 for Tier 3), whichever is later or, for disabled retirees, until July 1 of the third year following retirement.
4. Payroll growth: 3.00% per year (with no allowance for membership growth)
5. Contribution accumulation: The accumulated member account balance with interest is estimated at the valuation date by assuming that member contributions increased 5.50% per year for all years prior to the valuation date. Contributions are credited with 4.00% interest, compounded annually, applicable to the account balances in the past as well as the future.

B. Demographic Assumptions

1. Mortality after termination or retirement
 - a. Healthy males – RP-2000 Combined Healthy mortality table for males with White Collar Adjustments, no set back. Generational mortality improvements in accordance with Scale BB from the table’s base year of 2000
 - b. Healthy females – GRS Southwest Region Teacher Mortality Table, set back one year. Generational mortality improvements in accordance with Scale BB from the table’s base year of 2012

Summary of Actuarial Assumptions and Methods

- c. Disabled males – RP-2000 Disabled Mortality Table for males, set back three years, projected to 2016 with Scale BB
- d. Disabled females – RP-2000 Disabled Mortality Table for females, no set back, projected to 2016 with Scale BB

Mortality Improvement: The non-disabled annuity mortality assumption includes an explicit generational mortality improvement assumption. To account for future mortality improvement for disabled annuitants, the tables and table multipliers selected above were chosen so that the assumed mortality rates are slightly smaller than the rates observed in the last experience study, covering experience for FY 2009 – FY 2014. The ratio of the actual number of deaths occurring during this period to the expected number based on the selected assumptions was 103% for disabled male annuitants and 108% for disabled female annuitants.

- 2. Mortality rates of active members – RP-2000 Employee Mortality Tables, with males set back two years and scaled at 80%, and females set back five years and scaled at 70%. Static mortality improvement from the table’s base year of 2000 to the year 2016 in accordance with Scale BB. No future improvement was assumed for pre-retirement mortality.
- 3. Disability Incidence – As shown below for selected ages (rates are only applied to eligible members, which are members with at least 10 years of service):

Age	Occurrence of Disability per 100 Members	
	Males	Females
25	.007	.010
30	.007	.020
35	.042	.050
40	.091	.080
45	.133	.120
50	.168	.168
55	.182	.168

Summary of Actuarial Assumptions and Methods

4. Retirement - Select and ultimate as shown below for selected ages (rates are only applied to members eligible for retirement):

Retirement Per 100 Members						
Males - Years of Service						
Age	0-4	5-9	10-14	15-19	20-24	25+
45	0.00	0.00	0.00	0.00	0.00	15.00
50	0.00	0.00	0.00	0.00	0.00	18.00
55	0.00	0.00	0.00	0.00	5.00	20.00
60	0.00	0.00	0.00	15.00	20.00	25.00
62	0.00	0.00	30.00	30.00	30.00	30.00
65	0.00	40.00	35.00	30.00	30.00	30.00
67	0.00	25.00	25.00	25.00	30.00	30.00
70	100.00	100.00	100.00	100.00	100.00	100.00

Females - Years of Service						
Age	0-4	5-9	10-14	15-19	20-24	25+
45	0.00	0.00	0.00	0.00	0.00	15.00
50	0.00	0.00	0.00	0.00	0.00	18.00

The retirement assumption was further modified for members who joined after June 30, 2010. The probability of retirement upon first eligibility for Normal Retirement reflects the accumulated probability of retirement from the first eligibility for members who joined ERB by June 30, 2010 (generally, 25 years of service or Rule of 75) to their actual first eligibility for Normal Retirement (generally, 30 years of service or Rule of 80).

Early Retirement Per 100 Members – Members joined after June 30, 2010

Age	Years of Service					
	Males			Females		
	15-19	20-24	25-29	15-19	20-24	25-29
55			5.00			6.00
60		20.00	20.00		15.00	15.00
62	30.00	30.00	30.00	30.00	30.00	30.00
65	30.00	30.00	30.00	40.00	40.00	40.00

Summary of Actuarial Assumptions and Methods

5. Termination (for causes other than death, disability or retirement):

Completed Service	Terminations per 100 Members	
	Males	Females
0	43.4	31.4
1	28.1	23.8
2	19.6	17.2
3	14.3	13.5
4	11.9	10.6
5	10.0	9.8
6	9.1	8.6

8	6.1	6.3
9	5.7	5.5
10	5.2	5.0
11	4.2	4.7
12	4.0	4.2
13	3.4	3.6
14	3.4	3.5
15	3.1	3.3
16	2.2	2.3
17	2.3	2.7
18	2.3	2.1
19 and over	0.0	0.0

Rates are not applied after the member is eligible for reduced or unreduced retirement benefits.

C. Other Assumptions

1. Age difference: Males are assumed to be three years older than females. All beneficiaries are assumed to be spouses.
2. Percent electing annuity on death: It is assumed that beneficiaries of deceased members will elect to receive the refund of contributions with interest, unless the member is eligible for early or normal retirement, in which case the beneficiary will elect to receive the survivor annuity.
3. Percent electing deferred termination benefit: All vested active members terminating prior to eligibility for a retirement benefit are assumed to elect the more valuable of (i) an immediate refund, or (ii) a deferred annuity commencing when the member is eligible for an unreduced retirement benefit.
4. Assumed age for commencement of deferred benefits: Members electing to receive a deferred benefit are assumed to commence receipt when eligible for an unreduced benefit (or attained age if later).
5. Investment and administrative expenses: The assumed investment return rate is intended to be the net rate of return after payment of all investment and administrative expenses.
6. Percent married: For valuation purposes 100% of members are assumed to be married.

Summary of Actuarial Assumptions and Methods

V. Participant Data

Participant data was supplied on an electronic file for (i) active members, (ii) inactive members, who are entitled to either a future deferred benefit or a refund of their employee contributions and the accumulated interest, and (iii) members and beneficiaries receiving benefits.

The data for active and inactive, non-retired members included birth date, sex, years of service, salary, and accumulated employee contributions (without interest). For retired members and beneficiaries, the data included date of birth, sex, beneficiary or joint annuitant date of birth (where applicable), current monthly benefit, date of retirement, and a form of payment code.

Salary supplied for the current year was the total earnings for the year preceding the valuation date. We have not subjected this data to any auditing procedures but have examined the data for reasonableness and consistency with the prior year's data.

Definition of Actuarial Terms

1. **Actuarial Accrued Liability (AAL):** That portion, as determined by a particular Actuarial Cost Method, of the Actuarial Present Value of Future Plan Benefits which is not provided for by future Normal Costs. It is equal to the Actuarial Present Value of Future Plan Benefits minus the actuarial present value of future Normal Costs.
2. **Actuarial Assumptions:** Assumptions as to future experience under the Plan. These include assumptions about the occurrence of future events affecting costs or liabilities, such as:
 - mortality, withdrawal, disablement, and retirement;
 - future increases in salary;
 - future rates of investment earnings and future investment and administrative expenses;
 - characteristics of members not specified in the data, such as marital status;
 - characteristics of future members;
 - future elections made by members; and
 - other relevant items.
3. **Actuarial Cost Method or Funding Method:** A procedure for allocating the Actuarial Present Value of Future Benefits to various time periods; a method used to determine the Normal Cost and the Actuarial Accrued Liability. These items are used to determine the Funding Policy Contribution.
4. **Actuarial Gain or Actuarial Loss:** A measure of the difference between actual experience and that expected based upon a set of Actuarial Assumptions, during the period between two Actuarial Valuation dates. Through the actuarial assumptions, rates of decrements, rates of salary increases, and rates of fund earnings have been forecasted. To the extent that actual experience differs from that assumed, Actuarial Accrued Liabilities emerge which may be the same as forecasted, or may be larger or smaller than projected. Actuarial gains are due to favorable experience, e.g., the Plan's assets earn more than projected, salaries do not increase as fast as assumed, members retire later than assumed, etc. Favorable experience means actual results produce actuarial liabilities not as large as projected by the actuarial assumptions. On the other hand, actuarial losses are the result of unfavorable experience, i.e., actual results that produce actuarial liabilities which are larger than projected. Actuarial gains will shorten the time required for funding of the actuarial balance sheet deficiency while actuarial losses will lengthen the funding period.
5. **Actuarially Equivalent:** Of equal actuarial present value, determined as of a given date and based on a given set of Actuarial Assumptions.
6. **Actuarial Present Value (APV):** The value of an amount or series of amounts payable or receivable at various times, determined as of a given date by the application of a particular set of Actuarial Assumptions. For purposes of this standard, each such amount or series of amounts is:
 - a. adjusted for the probable financial effect of certain intervening events (such as changes in compensation levels, marital status, etc.),
 - b. multiplied by the probability of the occurrence of an event (such as survival, death, disability, termination of employment, etc.) on which the payment is conditioned, and
 - c. discounted according to an assumed rate (or rates) of return to reflect the time value of money.

Definition of Actuarial Terms

7. **Actuarial Present Value of Future Plan Benefits:** The Actuarial Present Value of those benefit amounts which are expected to be paid at various future times under a particular set of Actuarial Assumptions, taking into account such items as the effect of advancement in age and past and anticipated future compensation and service credits. The Actuarial Present Value of Future Plan Benefits includes the liabilities for active members, retired members, beneficiaries receiving benefits, and inactive, non-retired members either entitled to a refund or a future retirement benefit. Expressed another way, it is the value that would have to be invested on the valuation date so that the amount invested plus investment earnings would be provide sufficient assets to pay all projected benefits and expenses when due.
8. **Actuarial Valuation:** The determination, as of a valuation date, of the Normal Cost, Actuarial Accrued Liability, Actuarial Value of Assets, and related Actuarial Present Values for a plan. An Actuarial valuation for a governmental retirement system typically also includes calculations of items needed for compliance with GASB, such as the funded ratio and the Funding Policy Contribution.
9. **Actuarial Value of Assets or Valuation Assets:** The value of the Plan's assets as of a given date, used by the actuary for valuation purposes. This may be the market or fair value of plan assets, but commonly actuaries use a smoothed value in order to reduce the year-to-year volatility of calculated results, such as the funded ratio and the Funding Policy Contribution.
10. **Actuarially Determined:** Values which have been determined utilizing the principles of actuarial science. An actuarially determined value is derived by application of the appropriate actuarial assumptions to specified values determined by provisions of the law.
11. **Amortization Method:** A method for determining the Amortization Payment. The most common methods used are level dollar and level percentage of payroll. Under the Level Dollar method, the Amortization Payment is one of a stream of payments, all equal, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the Amortization payment is one of a stream of increasing payments, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the stream of payments increases at the assumed rate at which total covered payroll of all active members will increase.
12. **Amortization Payment:** That portion of the pension plan contribution or Funding Policy Contribution which is designed to pay interest on and to amortize the Unfunded Actuarial Accrued Liability.
13. **Closed Amortization Period:** A specific number of years that is counted down by one each year, and therefore declines to zero with the passage of time. For example if the amortization period is initially set at 30 years, it 138is 29 years at the end of one year, 28 years at the end of two years, etc. See Funding Period and Open Amortization Period.
14. **Decrements:** Those causes/events due to which a member's status (active-inactive-retiree-beneficiary) changes, that is: death, retirement, disability, or termination.
15. **Defined Benefit Plan:** An employer-sponsored retirement benefit that provides workers, upon attainment of designated age and service thresholds, with a monthly benefit based on the employee's salary and length of service. The value of a benefit from a defined benefit plan is generally not affected by the return on the assets that are invested to fund the benefit.

Definition of Actuarial Terms

16. **Defined Contribution Plan:** An employer-sponsored retirement plan, such as a 401(k) plan, a 403(b) plan, or a 457 plan, in which the contributions to the plan are assigned to an account for each member, and the plan's earnings are allocated to each account, and each member's benefits are a direct function of the account balance. The ARP is a defined contribution plan.
17. **Employer Normal Cost:** The portion of the Normal Cost to be paid by the employers. This is equal to the Normal Cost less expected member contributions.
18. **Experience Study:** A periodic review and analysis of the actual experience of the Plan which may lead to a revision of one or more actuarial assumptions. Actual rates of decrement and salary increases are compared to the actuarially assumed values and modified as deemed appropriate by the Actuary.
19. **Funded Ratio:** The ratio of the actuarial value of assets (AVA) to the actuarial accrued liability (AAL). Plans sometimes calculate a market funded ratio, using the market value of assets (MVA), rather than the AVA, although GASB 25 reporting requires the use of the AVA.
20. **Funding Period or Amortization Period:** The term "Funding Period" is used in two ways. In the first sense, it is the period used in calculating the Amortization Payment as a component of the Funding Policy Contribution. This funding period is chosen by the Board of Trustees as part of the funding policy. In the second sense, it is a calculated item: the number of years in the future that will theoretically be required to amortize (i.e., pay off or eliminate) the Unfunded Actuarial Accrued Liability, based on the statutory employer contribution rate, and assuming no future actuarial gains or losses.
21. **Funding Policy Contribution:** The employer's contribution rate determined in accordance with the funding policy established by the Board of Trustees. The Funding Policy Contribution consists of the Employer Normal Cost and the Amortization Payment. This contribution amount is sometimes referred to as the Annual Required Contribution (ARC) or Actuarially Determined Employer Contribution (ADEC).
22. **GASB:** Governmental Accounting Standards Board.
23. **GASB 67 and GASB 68:** Governmental Accounting Standards Board Statements No. 67 and No. 68. These are the governmental accounting standards that set the accounting rules for public retirement systems and the employers that sponsor or contribute to them. Statement No. 67 sets the accounting rules for the employers that sponsor or contribute to public retirement systems, while Statement No. 68 sets the rules for the systems themselves.
24. **Normal Cost:** That portion of the Actuarial Present Value of pension plan benefits and expenses which is allocated to a valuation year by the Actuarial Cost Method. Any payment in respect of an Unfunded Actuarial Accrued Liability is not part of Normal Cost (see Amortization Payment). For pension plan benefits which are provided in part by employee contributions, Normal Cost refers to the total of employee contributions and employer Normal Cost unless otherwise specifically stated. Under the entry age normal cost method, the Normal Cost is intended to be the level cost (when expressed as a percentage of pay) needed to fund the benefits of a member from hire until ultimate termination, death, disability or retirement.

Definition of Actuarial Terms

25. **Open Amortization Period:** An open amortization period is one which is used to determine the Amortization Payment but which does not change over time. In other words, if the initial period is set as 30 years, the same 30-year period is used in determining the Amortization Period each year. In theory, if an Open Amortization Period is used to amortize the Unfunded Actuarial Accrued Liability, the UAAL will never completely disappear, but will become smaller each year, either as a dollar amount or in relation to covered payroll.
26. **Unfunded Actuarial Accrued Liability:** The excess of the Actuarial Accrued Liability over the Actuarial Value of Assets. This value may be negative in which case it may be expressed as a negative Unfunded Actuarial Accrued Liability, also called the Funding Surplus.
27. **Valuation Date or Actuarial Valuation Date:** The date as of which the value of assets is determined and as of which the Actuarial Present Value of Future Plan Benefits is determined. The expected benefits to be paid in the future are discounted to this date.

**STATE OF NEW MEXICO EDUCATIONAL RETIREMENT BOARD
REPORT ON INVESTMENT ACTIVITY
JUNE 30, 2018**

Members & Retirees of NMERB:

For Fiscal Year 2018 (FY18), the NMERB investment portfolio posted a net of fee return of 8.3%, for annual investment gains of approximately \$1.02 billion. The result for the year exceeded the Fund's actuarially required annual return assumption of 7.25%.

Meeting or exceeding the 7.25% annual hurdle is **THE** most important measure of our investment performance. Thus, 2018 was another successful year. Nonetheless, we do also use other measures to gauge our performance on a relative basis. For the year, the actual portfolio return of 8.3% fell slightly short of the Fund's policy index return of 8.5%. On another measure, the Fund's investment performance ranked in the 37th percentile (which means we were above the median) of NMERB's peer group of U.S. public pension funds with assets of \$1 billion or more, as measured by the Investor Force database. For the 3, 5, 10, 15, 20, and 30-year periods, our actual returns exceeded the policy return in all periods longer than a year. Likewise, on the peer group measure, our portfolio is above the median return (50th percentile) in all periods of one year or longer. The details of this may be found on page 28 of the Quarterly Investment Performance Report on our website:

<http://www.nmerb.org/pdfs/Q2%202018%20NMERB%20IPA%20Final+.pdf>

The report is the source document for the data referenced in this letter.

As we have noted in past years, our allocation plan is designed to result in a lower volatility of returns than the historical NMERB portfolio and the average public pension fund. This means we may lag those other funds somewhat when equity markets move up sharply. We also expect to exceed the returns on those same funds when the equity markets have very small gains or losses. In short, we are seeking to mute the extreme differences in returns from one quarter or one year to the next. This philosophy has contributed positively to our results in previous fiscal years and has contributed positively to our longer-term comparative performance.

Report on Investment Activities

In terms of major market index returns, FY18 was somewhat mixed for world-wide equity markets. Domestic equity market returns were strong but non-U.S. international markets returns were more muted. The S&P 500 index returned a robust 14.4% for the fiscal year. Smaller capitalization stocks as measured by the Russell 2500 index did even better, returning 16.2%. The Europe, Australasia and Far East (EAFE) index for developed foreign equity markets gained 6.8%, while the MSCI Emerging Markets Equity index gained 8.2%. In the fixed income sector, returns were unrewarding due largely to increases in interest rates. The Barclays Capital Aggregate index representing the U.S. investment grade bond market posted a negative return of -0.4%. In the high yield bond space, the Barclays US High Yield index returned a positive 2.6%. NMERB's fixed income portfolio is a combination of managers operating in markets related to those two indices, as well as a small exposure to Emerging Market debt. Despite the disappointing index returns, our fixed income portfolio generated a positive return of 4.5%, a strong performance given the market environment.

Our portfolio also contains a number of investments in the alternative investment category. The following table illustrates the results of those investments:

Private Real Estate	15.9%
Private Equity	11.1%
Real Assets	10.2%
Risk Parity	7.0%
GTAA	4.6%

While the overall results for the year were good, one should not place a great deal of significance on the results in any single year. The required return assumption is intended to be a target that is met on average over a number of years. Thus, longer term results over multiple years are of much greater significance in gauging the contribution of the NMERB investment portfolio to the Fund's long-term sustainability. For these periods, are results are as follows:

3 years:	7.6%
5 years:	8.1%
10 years:	6.8%
Since Inception of performance reporting: (July 1983)	9.1%

Report on Investment Activities

Further details regarding investments are contained within the remainder of this report. You may also refer to our website for additional details on investment performance: <http://www.nmerb.org/Investments.html>

While we can tell you about past results in great detail, we can say little with certainty about the future. This we can say with certainty, however: Your NMERB Board of Trustees and staff are working to attain the best results possible in an uncertain and challenging environment.

Sincerely,

Bob Jacksha
Chief Investment Officer

The investment performance reported in this letter is based on time weighted rates of return calculated using the market value of assets as of June 30, 2018. Performance shown for periods longer than one year has been annualized.

Investment Policies

Investment Objectives

Recognizing NMERB's fiduciary responsibilities to the pension plan and long-term nature of the pension fund, assets are managed on a total return basis with a long-term objective of achieving and maintaining a fully funded status for the benefits provided through the pension plan. NMERB's Investment Division seeks to diversify investment assets to both enhance returns and control risk. Over the long term, the fund's objective is to earn the actuarial rate of return of 7.25%.

The strategy used within the equity investment program is to build a diversified portfolio of stocks. This includes large and mid-capitalization domestic stocks, as well as international equities. Large capitalization domestic stocks are managed internally in an S&P 500 index strategy. Mid-sized capitalization domestic stocks are managed internally in an S&P 400 index strategy. These portfolios replicate all of the holdings in their respective indices. A portfolio of REIT (real estate investment trusts) provides exposure to real estate through an equity vehicle. A portion of this exposure is obtained through an index portfolio based on the Wilshire REIT index.

Domestic investment grade fixed income securities are actively managed by internal managers. The investment grade securities include U.S. Treasury and agency, corporate, and asset backed securities. Additional diversification is achieved through investments in an opportunistic credit allocation which incorporates high yield debt and other credit strategies in both domestic and foreign debt. The fund also has investments in other alternative investment sectors to further diversify risks. These include investments in private equity, private real estate, absolute return strategies, global tactical asset allocation, risk parity and real assets in the form of infrastructure, mining and mineral, agriculture, timber, water, and energy assets.

Investment Process

NMERB is authorized to invest or reinvest the fund in accordance with the Uniform Prudent Investor Act, Section 45-7-601 NMSA 1978. Key guidelines are to:

- Set a higher standard of care and prudence for investments, above and beyond the previous standard guiding principles of law;
- Apply to the trust as a whole, rather than individual investments;
- Require investment strategy to be based on suitable risk and reward strategies; and
- Require diversification unless the trustees reasonably determine it is not in the best interest of the Fund.

Investment Policies

NMERB's investment activity is further governed by the Educational Retirement Act of New Mexico (Chapter 22, Article 11 NMSA 1978). The "prudent investor" standard, as defined by the Section 22-11-13 NMSA 1978, requires all members of the Board of Trustees and NMERB staff to discharge their duties solely in the interest of Fund participants and beneficiaries, with the care, skill, prudence and diligence they would exercise in the conduct of their own affairs.

The Board of Trustees (Trustees) relies on the Investment Committee to monitor the activities of the Investment Division. The Investment Committee is composed of three (3) Trustees appointed by the Board Chair. The Chief Investment Officer, within the parameters of state statute and investment policies established by the Trustees, uses both external and internal managers to implement NMERB's investment goals and objectives.

Asset Allocation

Asset allocation is the greatest determinant of Fund performance. The Investment Committee uses the target asset allocation plan approved by NMERB's Trustees to carry out its responsibilities in conjunction with analyses of the Fund's long-term liabilities. The latest analysis can be found at http://www.nmerb.org/asset_allocation.html. The Investment Committee and NMERB staff regularly monitor the position of the Fund relative to the target allocations, periodically rebalancing among classes to maintain prescribed relationships. The Investment Committee reviews NMERB's investment policies annually with respect to target allocation guidelines. NMERB's Investment Policy Statement is available on NMERB's website at http://www.nmerb.org/investment_policies.html.

The following schedule shows the asset allocation on June 30, 2018. NMERB's board approved the policy targets in June 2016. All asset classes were within policy range as of June 30, 2018.

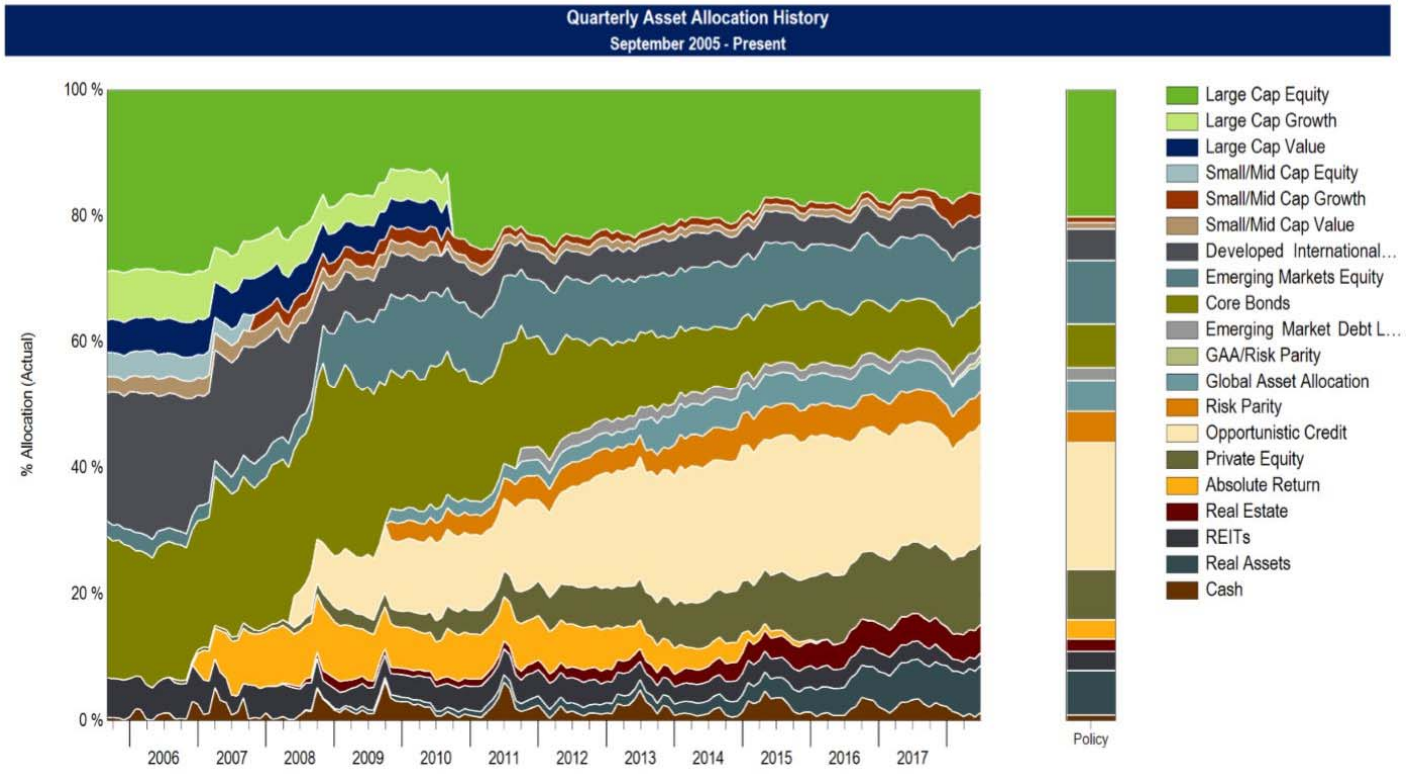

Schedule of Asset Allocation Versus Policy Targets

Investment Results

The investment performance shown in the schedules and chart below is based on time weighted rates of return calculated using the market value of assets as of June 30, 2018. Performance shown for periods longer than one year has been annualized.

Over the past five years, the Fund returned 8.1% per annum, outperforming the policy index by 51 basis points and ranking in the top 35th percentile of the InvestorForce Public Funds > \$1 Billion universe, and outperforming the actuarial assumed rate of 7.25%. The Fund's volatility was 4.6%, which ranks in the top 7th percentile of its peers over this period. The Fund's risk-adjusted performance, as measured by the Sharpe Ratio, ranks in the top 6th percentile of its peers.

Over the past three years, the Fund returned 7.6% per annum, outperforming the policy index by 27 basis points and ranking in the top 11th percentile of its peer group. Over the same period, the Fund's volatility ranks in the top 7th percentile of its peers, resulting in a three-year Sharpe Ratio of 1.4, which ranks in the top 7th percentile.

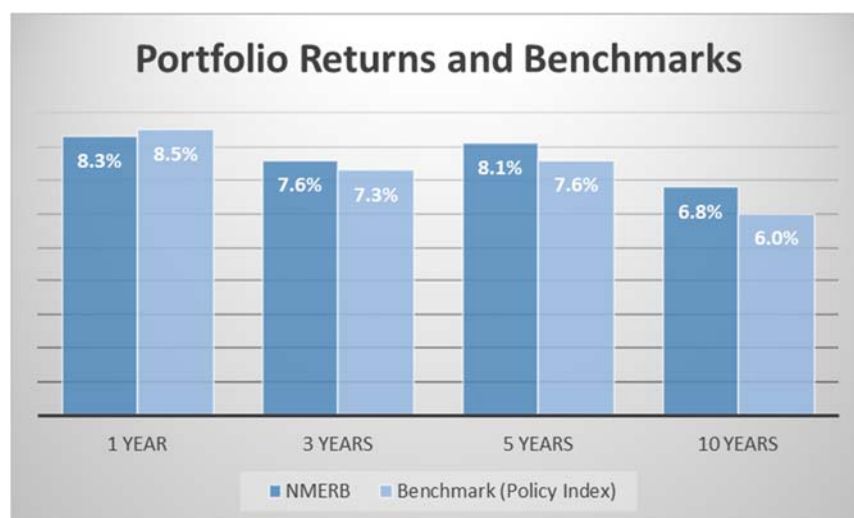

Fund Performance Summary (Net of Fees) at June 30, 2018

1 Year	3 Year	5 Year	10 Year	15 Year	20 year	30 Year
8.3%	7.6%	8.1%	6.8%	7.6%	5.9%	8.6%

US TREASURY N/B	912810SA7	10,000,000	9,971,484
Total			<u>\$ 157,807,268</u>

The ten (10) largest fixed income holdings are based on the Fund's separately managed portfolios. A complete list of holdings is available upon request.

Fees, Commissions, and Carried Interest

Fees, commissions, and carried interest for the year ended June 30, 2018 are listed below.

Schedule of Asset Management Costs-Unaudited

For the Year Ended June 30, 2018

All Asset Classes Except Private Asset Classes and Alternative Investment Classes:

Consultant	Location	Description of Investments Subject to the Agreement	Fees
NEPC	Out of state	Total fund	\$ 367,251

Third-party marketers	Location	Description of Investments Subject to the Agreement	Fees, Commissions or Retainers
Not Applicable			

Name of Investment	Asset Class	Value of the Investment at 06/30/18	Management Fees	Performance Fees
Domestic Equities-Internal	Domestic Equity	\$ 2,551,842,556	\$ 934,857	\$ -
	Global & International Equity	1,779,344,914	10,667,245	-
Core Fixed income-Internal	Domestic Fixed Income	878,916,881	-	-
	Global & International Fixed Income	214,461,076	1,847,905	853,473
	Real Estate Investment Trusts (REITs)	261,109,998	1,264,057	-
	Listed Infrastructure	-	-	-
	Commodities	-	-	-
	TIPS	-	-	-
	Other	-	-	-
		\$ 5,685,675,425	\$ 14,714,064	\$ 853,473

For private asset classes and alternative investment classes:

Consultant	Location	Description of Investments Subject to the Agreement by Asset Class	Fees
Caledon Capital Management	Out of State	Real Estate	\$ 378,280
Hamilton Lane	Out of State	Infrastructure	437,500
Top Tier	Out of State	Private Equity	625,000
			\$ 1,440,780

Third-party marketers	Location	Description of Investments Subject to the Agreement	Fees, Commissions or Retainers
N/A			

Asset Class	Brief Description of Investments	Management Fees	Carried Interest
Global Asset Allocation	Investment Mix Targeting Diversity	\$ 7,396,011	\$ 1,431,470
Private Equity	Investment Mix Targeting Investments		
	Not Listed on a Public Exchange	24,122,018.09	7,412,708.12
Real Return/Real Assets	Investment Mix Targeting Real Assets	11,733,013.06	410,845.52
Real Estate	Investment Mix Targeting Real Estate	5,920,733.65	676,452.26
Risk Parity	Investment Mix Targeting Balanced Risk	2,272,547.68	-
Opportunistic Credit	Investments Providing Capital to Borrowers	15,016,569.60	9,816,733.48
Other	Other	1,310,605.00	-
		\$ 67,771,498	\$ 19,748,209

Profit Share

The next schedule provides information on profit sharing. Certain investment manager contracts, primarily in the alternative assets category, provide for the manager to earn a share of the profits from NMERB investments once certain rate of return hurdles are met. Typically, the manager's profits share is 10-20% of profits above the specified hurdle rate. The amounts shown in the schedule are based on profits at June 30, 2018. The profits shown are subject to change as they increase and decrease through time. Whether or not any profit share will ultimately be distributed to investment partners depends on the distribution terms of the underlying profit-sharing agreement and on profits at the time of distribution. Given this, profit share cannot be estimated and accrued. Consequently, NMERB recognizes and records profit share as a reduction of profits when profit share becomes payable to the partners under the applicable profit-sharing agreement. At that time, profit share is recognized by netting it against profits to arrive at net profit, which is then reported under the "investment income" classification with other investment income, in the Statement of Changes in Fiduciary Net Position.

**Schedule of Estimated Investment Profit Share (Expense)
by Category of Investment
for the Fiscal Year Ended June 30, 2018**

Category	Profit Share
Opportunistic Credit	\$ 9,816,733
Private Equity	7,412,708
GTA	1,431,470
Non-US Fixed Income	853,473
Private Real Estate	676,452
Infrastructure	381,656
Natural Resources	29,190
Risk Parity	-
Total	<u>\$ 20,601,682</u>

STATISTICAL SECTION

Summary

The Statistical Section provides additional historical perspective, context, and relevant details to assist readers in using information found within the fiscal year 2018 financial statements, note disclosures, and supplementary information to assess the economic condition of NMERB. This information has not been audited by NMERB's independent auditor. All non-accounting data is taken from internal NMERB sources except for information derived from the actuarial valuations and investment performance analysis, both prepared by external consultants for NMERB.

The charts and schedules in the Statistical Section are organized into two categories: Financial Trends and Demographic and Economic Information.

Financial Trends

Summary of Changes in Fiduciary Net Position

The following tables contain trend information. Unless otherwise noted, the information included in the Financial Trends tables is derived from the annual financial reports for the relevant year.

Additions to Net Position by Source

Retirement benefits are funded by member and employer contributions and by investment income. In fiscal year 2018, contributions and investment income funded 148% of retirement benefits.

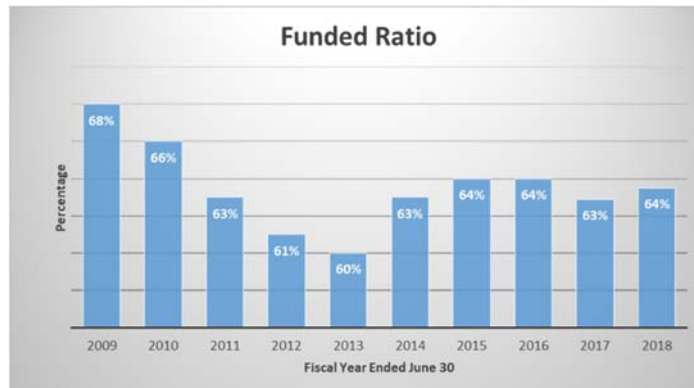

NMERB Investment Income, Contributions, and Benefit Payments

This chart shows the relationship between investment income, contributions, and benefit payments (expenditures) over the past ten years.

Financial Trends

Funded Ratio

This chart illustrates the difference between the actuarial value of assets and the amount needed to pay benefits to current NMERB members. The ratio is determined using asset-smoothing methods that consider short-term fluctuations in asset values. Accordingly, the total actuarial value of assets will differ from the market value of investment for any given year (see “Asset Smoothing” below).

Asset Smoothing

The following three charts illustrate the impact of smoothing volatility in actuarial computations. Smoothing asset values reduces the year-to-year volatility of calculated results, such as the funding ratio. Accordingly, the use of smoothed asset values to determine contribution rates makes more sense than using fair market value. It also makes more sense when the objective is long-term investment returns, which require investing in classes of assets that, by their nature, tend to be somewhat volatile in fair market value.

Retirees and Beneficiaries Data

NMERB administers the Educational Employees' Retirement Plan, which was established by the New Mexico Educational Retirement Act to provide retirement, disability, and survivor benefits for educational employees (certified teachers and other employees of the State of New Mexico's public schools, institutions of higher learning, and state agencies providing educational programs). The schedule below shows the number of retirees, total annual benefits paid to retirees, and the average monthly individual benefit paid.

Retirees and Beneficiaries Data

Demographic and Economic Information

The following tables help the reader understand the environment within which NMERB's financial activities take place. NMERB is charged with providing secure retirement benefits for New Mexico's educational employees. This includes employees at schools providing kindergarten through twelfth grade instruction, colleges and universities, special state schools, and educational programs at state agencies.

Membership and Participating Employers

Total membership in the pension trust retirement system administered by NMERB increased in fiscal year 2018 over the prior year by 3,275 employees (1.5%), with all categories of membership increasing. The largest increase was in the Retired/Beneficiaries category.

Demographic and Economic Information

Schedule of Members by Status and Type of Benefit

The following schedule portrays the number of members by status in the current year and the growth in each membership level over the last nine years.

Schedule of Members by Membership Status by Fiscal Year - Last Ten Years

GLOSSARY OF ACRONYMS

AC – Audit Committee

The NMERB AC is a subcommittee of the Board of Trustees charged with oversight of the financial and internal controls of the agency.

ARC – Annual Required Contribution

The employer's periodic contributions, expressed as a dollar amount or a percentage of covered plan compensation, determined under GASB 25. The ARC consists of the Employer Normal Cost and the Amortization Payment.

ARP – Alternative Retirement Plan

NMERB's Alternative Retirement Plan is a Defined Contribution Plan offered at colleges and universities. Under the provisions of this Plan participating Employers remit 3% of the annual employee's gross salary to NMERB. The balance of the employer and employee contributions are remitted to the ARP vendor and credited to the participants' accounts.

BOT – Board of Trustees

The governing board of NMERB is composed of seven (7) members. The Educational Retirement Act defines the composition of the BOT in Section 22-11-3 NMSA, 1978; duties and powers of the BOT are addressed in Sections 22-11-4 through 22-11-14.

CAFR – Comprehensive Annual Financial Report

U.S. government financial statements comprising the financial report of a state, municipal, or other governmental entity that complies with the accounting requirements promulgated by the Governmental Accounting Standards Board. GASB provides standards for the content of a CAFR in its annually updated publication *Codification of Governmental Accounting and Financial Reporting Standards*.

COLA – Cost of Living Adjustment

All retired members and beneficiaries receiving benefits receive an automatic adjustment in their benefit.

DBP – Defined Benefit Plan

A defined benefit plan is a pension plan in which a sponsor promises a specified monthly benefit on retirement that is predetermined by a formula based on the employee's earnings history, tenure of service and age, rather than depending directly on individual investment returns.

DCP – Defined Contribution Plan

A defined contribution plan is a retirement plan in which the employer, employee or both make contributions on a regular basis. Individual accounts are set up for participants and benefits are based on the amounts credited to these accounts plus any investment earnings on the money in the account.

DFA – New Mexico Department of Finance and Administration

DFA is the fiscal agency in New Mexico charged with the mission to provide budgetary and fiscal oversight for State agencies.

DR/BCF – Disaster Recovery and Business Continuity Plan

A disaster recovery and business continuity plan is a documented process or set of procedures intended to recover and protect the information technology infrastructure in the event of a disaster.

ENC – Employer Normal Cost

The portion of the Normal Cost to be paid by the employers. This is equal to the Normal Cost less expected member contributions.

NMERB – New Mexico Educational Retirement Board

NMERB is the agency of the State of New Mexico which administers the Educational Retirement Plan.

GASB – Government Accounting Standards Board

GASB is the independent organization that establishes and improves standards of accounting and financial reporting for U.S. state and local governments.

GFOA – Government Finance Officers Association

A professional membership organization open to those whose career, studies, or interests involve government financial management. The organization established the Certificate of Achievement for Excellence in Financial Reporting Program to ensure users of governmental financial statements have the information they need to assess the health of participating governments.

GL – General Ledger

A GL is the complete record of financial transactions over the life of the entity, holding the account information needed to prepare financial statements.

IC – Investment Committee

The NMERB IC is a subcommittee of the Board of Trustees charged with oversight of the investment function of the Plan.

IPA – Independent Public Accountant

The IPA is the certified public accounting firm used to audit the agency's books and records.

MD&A – Management Discussion and Analysis

Management's discussion and analysis is required supplementary information in an entity's annual report that introduces the financial statements and provides an analytical overview of financial activities.

NASRA – National Association of State Retirement Administrators

NASRA is a non-profit association whose members are the directors of the nation's state, territorial and largest statewide public retirement systems. NASRA members oversee retirement systems that hold more than two-thirds of the \$3.8 trillion held in trust for fifteen million working and eight million retired employees of state and local government.

NAV – Net Asset Value

NAV is the value of an entity's assets minus the value of its liabilities.

NCPERS – National Conference on Public Retirement Systems

NCPERS is the largest trade association for public sector pension funds, representing more than 500 funds throughout the United States and Canada.

NCTR – National Council on Teacher Retirement

The NCTR is an independent organization dedicated to safeguarding the integrity of public retirement systems in the United States and its territories to which teachers belong and to promoting the rights and benefits of all present and future members of the systems.

NMAC – New Mexico Administrative Code

The NMAC represents the administrative laws of the State of New Mexico.

NMSA - New Mexico Statutes Annotated

The NMSA represents state statutes enacted by legislation.

NPL – Net Pension Liability

The NPL is the amount by which the total pension liability exceeds the pension plan's net assets.

PPCC – Pension Planning Coordinating Council

The PPCC is a coalition of three national associations that represent public retirement systems and administrators: National Association of State Retirement Administrators, National Council on Teacher Retirement, and National Conference on Public Employee Retirement Systems.

TPL – Total Pension Liability

The TPL is the total actuarial value of projected pension benefits attributable to past periods of employee service.

UAAL – Unfunded Actuarial Accrued Liability

The UAAL is the difference between accrued liabilities and the actuarial value of assets accumulated to finance an obligation, expressed in dollar amounts.

VD – Valuation Date, or Actuarial Valuation Date

The date as of which the value of the assets is determined and as of which the Actuarial Present Value of Future Plan Benefits is determined. The expected benefits to be paid in the future are discounted to this date.
