Independent Auditors' Report

Wayne Johnson, New Mexico State Auditor Board Members of Arch Hurley Conservancy District

Report on Financial Statements

We have audited the accompanying financial statements of the governmental activities, each major fund, the aggregate remaining fund information, and the budgetary comparisons for the general fund of Arch Hurley Conservancy District (the District), as of and for the year ended December 31, 2017, and the related notes to the financial statements which collectively comprise the District's basic financial statements as listed in the table of contents. We also have audited the financial statements of the District's fiduciary fund and the budgetary comparisons for the major debt service fund, presented as supplementary information, as defined by the Government Accounting Standards Board, in the accompanying combining and individual fund financial statements as of and for the year ended December 31, 2017, as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatements, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion.

An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions,

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of the District, as of December 31, 2017, and the respective changes in financial position and the respective budgetary comparisons for the general fund for the year then ended in accordance with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the fiduciary fund of the District as of December 31, 2017, and the respective changes in financial position and the respective budgetary comparisons for the major debt service fund, for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Management has omitted the management's discussion and analysis that accounting principles generally accepted in the United States of America require be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Our opinion on the basic financial statements is not affected by this missing information.

Accounting principles generally accepted in the United States of America require that Schedule of the Proportionate Share of Net Pension Liability on Page 32 and the Schedule of Contributions on page 33 and the notes to the Required Supplementary Information on pages 34 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquires of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during my audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide me with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the District's financial statements, the combining and individual fund financial statements, and the budgetary comparisons. The Supporting Schedule of Deposits and Security Requirements and Schedule of Memorandum of Understanding on pages 41 and 42 required by 2.2.2 NMAC are presented for the purposes of additional analysis and are not a required part of the basic financial statements and are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the financial statements. Such information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Supporting Schedule of Deposits and Security Requirements and Schedule of Memorandum of Understanding on page 41 and 42, required by 2.2.2 NMAC are fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

Other Reporting Required by Government Auditing Standards

· austri CPA, PC

In accordance with *Government Auditing Standards*, we have also issued our report dated May 21, 2018 on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

STATE OF NEW MEXICO ARCHHURLEY CONSERVANCY DISTRICT Notes to the Financial Statements As of December 31, 2017

Note 1. Summary of Significant Accounting Policies

Arch Hurley Conservancy District (the "District") was established on July 28, 1937, as provided by law. The District maintains irrigation canals, ditches and laterals for the purpose of providing irrigation water to landowners in the District. The District is organized and acting under the laws of the State of New Mexico and in cooperation with the United States Government for the care, operation and maintenance of all irrigation and drainage works of the project. The District's governing body operates with a five-member board of directors elected from the landholders and water users within the boundaries of the District.

The summary of significant accounting policies of the District is presented to assist in the understanding of the District's financial statements. The financial statements and notes are the representation of the District's management who is responsible for their integrity and objectivity. The financial statements of the District have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to governmental units. The Governmental Accounting Standard Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles.

During the year ended December 31, 2015, the District adopted GASB Statements No. 68, Accounting and Financial Reporting for Pensions — an Amendment of GASB Statement No. 27 ("GASB 68"), and No. 71, Pension Transition for Contributions Made Subsequent to the Measurement Date - an Amendment of GASB Statement No. 68 ("GASB 71"). These two Statements are required to be implemented at the same time. GASB 68 addresses accounting and financial reporting for pensions that are provided to the employees of state and local governments through pension plans that are administered through trusts that have the following characteristics:

Contributions from employers and non-employer contributing entities to the pension plan and earnings on those contributions are irrevoçable.

Pension plan assets are dedicated to providing pensions to plan members in accordance with the benefit terms.

Pension plan assets are legally protected from the creditors of employers, non-employer contributing entities, and the pension plan administrator. If the plan is a defined benefit plan, plan assets are also legally protected from creditors of the plan members.

GASB 68 establishes standards for measuring and recognizing liabilities, deferred outflows of resources, deferred inflows of resources, and expense/expenditures related to pensions. For defined benefit pensions, this Statement identifies the methods and assumptions that should be used to project benefit payments, discount projected benefit payments to their actuarial present value, and attribute that present value to periods of employee service. As a result of the implementation of GASB 68, the government would recognize a net pension liability ("NPL") measured as of a date no later than the end of its prior fiscal year. If the government employer makes a contribution to the pension plan subsequent to the measurement date but prior to the end of the current fiscal year, GASB 68 requires the government to recognize that contribution as a deferred outflow of resources. In addition, GASB 68 requires the recognition of deferred outflows of resources and deferred inflows of resources for changes in the NPL that arise from other types of events, but does not require the government to recognize beginning deferred outflows of resources or deferred inflows of resources if the amounts are not practical to estimate. At transition to Statement 68, Statement 71 requires the employer or non-employer contributing entity to recognize a beginning deferred outflow of resources for its pension contributions made subsequent to the measurement date of the beginning net pension liability but before the start of the government's fiscal year, thus avoiding possible understatement of an employer or non-employer contributing entity's beginning net position and expense in the initial period of implementation. This pronouncement has materially impacted the financial statements and additional disclosures are included in the notes to the financial statements to highlight the effects.

A. Financial Reporting Entity

The financial reporting entity consists of (a) the primary government, (b) organizations for which the primary government is financially accountable and (c) other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete.

In evaluating how to define the District, for financial reporting purposes, management has considered all potential component units. The decision to include any potential component units in the financial reporting entity was made by applying the criteria set forth in GASB Statement No.'s 14 and 39.

The basic-but not the only-criterion for including a potential component unit within the reporting antity is the governing body's ability to exercise oversight responsibility. The most significant manifestation of this ability is financial interdependency. Other manifestations of the ability to exercise oversight responsibility include, but are not limited to, the selection of governing authority, the designation of management, the ability to significantly influence operations, and accountability for fiscal matters.

A second criterion used in evaluating potential component units is the scope of public service. Application of this criterion involves considering whether the activity benefits the District and/or its citizens, or whether the activity is conducted within the geographic

boundaries of the District and is generally available to its citizens. A third criterion used to evaluate potential component units for inclusion or exclusion from the reporting entity is the existence of special financing relationships, regardless of whether the District is able to exercise oversight responsibilities. Finally, the nature and significance of a potential component unit to the primary government could warrant its inclusion within the reporting entity. Based upon the application of these criteria, the District has no component units, and is not a component unit of another governmental agency.

The basic-but not the only-criterion for including a potential component unit within the reporting entity is the governing body's ability to exercise oversight responsibility. The most significant manifestation of this ability is financial interdependency. Other manifestations of the ability to exercise oversight responsibility include, but are not limited to, the selection of governing authority, the designation of management, the ability to significantly influence operations, and accountability for fiscal matters.

A second criterion used in evaluating potential component units is the scope of public service. Application of this criterion involves considering whether the activity benefits the District and/or its citizens, or whether the activity is conducted within the geographic boundaries of the District and is generally available to its citizens. A third criterion used to evaluate potential component units for inclusion or exclusion from the reporting entity is the existence of special financing relationships, regardless of whether the District is able to exercise oversight responsibilities. Finally, the nature and significance of a potential component unit to the primary government could warrant its inclusion within the reporting entity. Based upon the application of these criteria, the District has no component units, and is not a component unit of another governmental agency.

B. Government-wide and fund financial statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the non fiduciary activities of the primary government. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support.

The Statement of Net Position and the Statement of Activities were prepared using the economic resources measurement focus and the accrual basis of accounting. Revenues, expenses, gains, losses, assets and liabilities resulting from exchange like transactions are recognized when the exchange takes place. Revenues, expenses, gains, losses, assets and liabilities resulting from non-exchange transactions are recognized in accordance with the requirements of GASB Statement No. 33, Accounting and Financial Reporting for Non-Exchange Transactions and Statement No. 65, Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and net Position.

In the government-wide Statement of Net Position, the governmental activities column (a) is presented on a consolidated basis, (b) and is reported on a full accrual, economic resource basis, which recognized all long-term assets and receivables as well as long-term debt and obligations. The District's net position is reported in three parts - investment in capital assets, restricted net position; and unrestricted net position.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Separate financial statements are provided for governmental funds, and fiduciary funds, even though the latter is excluded from the government-wide financial statements. Major individual governmental funds are reported in separate columns in the fund financial statements.

C. Measurement focus, basis of accounting, and financial statement presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Water assessment taxes are recognized as revenues in the year for which they are billed. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting.* Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due. Property taxes, franchise taxes, licenses and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period, subject to the availability criterion. Sales and use taxes are classified as derived tax revenues and are recognized as revenue when the underlying exchange takes place and the revenues are measurable and available. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met, subject to the availability criterion. Only the portion of special assessments receivable due within the current fiscal period is considered to be susceptible to accrual as revenue of the current period. All other revenue items are considered to be measurable and available only when cash is received by the government.

Program revenues included in the Statement of Activities are derived directly from the program itself or from parties outside the District's taxpayer or citizenry, as a whole; program revenues reduce the cost of the function to be financed from the District's general revenues. Program revenues are categorized as (a) charges for services, which include revenues collected for fees and use of District facilities, etc., (b) program-specific operating grants, which includes revenues received from state and federal sources to be used as specified within each program grant agreement, and (c) program-specific capital grants and contributions, which include revenues from state sources to be used for capital projects. Internally dedicated resources are reported as *general revenues rather* than as program revenues. Likewise, general revenues include all taxes.

The District reports all direct expenses by function in the Statement of Activities. Direct expenses are those that are clearly identifiable with a function. The District does not currently employ indirect cost allocation systems. Depreciation expense is not specifically identified by function and is reported separately on the Statement of Activities. Interest on general long-term debt is considered an indirect expense and is reported separately on the Statement of Activities.

Expenditure-driven grants are recognized as revenue when the qualifying expenditures have been incurred and all other grant requirements have been met and the susceptible to accrual criteria have been met.

Governmental funds are used to account for the District's general government activities, including the collection and disbursement of specific or legally restricted monies, the acquisition or construction of capital assets and the servicing of general long-term debt.

Under the requirements of GASB No. 34, the District is required to present certain of its governmental funds as major based upon specific criteria.

The District reports the following governmental funds:

General Fund

The General Fund is the general operating fund of the District. It is used to account for all financial resources except those required to be accounted for in another fund.

Debt Service Fund

The Debt Service Fund is used to account for the accumulation of resources for, and the payment of general long-term principal, interest, and related costs.

Fiduciary Funds

Fiduciary funds account for assets held by the government in a trustee capacity or as an agent on behalf of outside parties, including other governments, or on behalf of other funds within the District.

Private Purpose Trust Fund - Trust arrangement under which principal and income benefits individuals, private organizations, or other governments, and accounts for assets held by the District as an agent for the Interstate Stream Commission (ISC). The accounting reflects the District's agency relationship with the ISC.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments-in-lieu of taxes, because elimination of these charges would distort the direct costs and program revenues reported in the Statement of Activities. When both restricted and unrestricted resources are available for use, it is the District's policy to use restricted resources first, then unrestricted resources as they are needed.

D. Assets, Liabilities and Net position or Equity

Deposits and Investments: The District's cash and cash equivalents are considered to be cash on hand, demand deposits and short-term investments with original maturities of three months or less from the date of acquisition. State statutes authorize the District to invest in Certificates of Deposit, obligations of the U.S. Government, and the State Treasurer's Investment Pool.

Investments for the District are reported at fair value. Fair value is the amount at which a financial instrument could be exchanged in a current transaction between willing parties.

Receivables and Payables: Interfund activity is reported as loans, services provided, reimbursements or transfers. Loans are reported as interfund receivables and payables as appropriate and are subject to elimination upon consolidation. Services provided, deemed to be at market or near market rates, are treated as revenues and expenditures/expenses. Reimbursements are when one fund incurs a cost, charges the appropriate benefiting fund and reduces its related cost as a reimbursement. All other interfund transactions are treated as transfers. Transfers between governmental are netted as part of the reconciliation to the government-wide financial statements.

Advances between funds, as reported in the fund financial statements, are offset by a fund balance reserve account in applicable cashgovernmental funds to indicate that they are not available for appropriation and are not expendable available financial resources.

All receivables are reported at their gross value and, where appropriate, are reduced by the estimated portion that is expected to be uncollectible. Delinquent ad valorem taxes are accrued in the fund financial statements. If they are not received by year-end they are also recorded as deferred revenue in the fund financial statements.

Inventory: The District's method of accounting for inventory is the consumption method. Under the consumption approach, governments

report inventories they purchase as an asset and defer the recognition of the expenditures until the period in which the inventories actually are consumed. Inventory is valued at cost and consists of supplies and materials. The cost of purchased supplies and materials is recorded as an expenditure at the time individual inventory items are consumed.

Restricted Assets: Restricted assets consist of those funds expendable for operating purposes but restricted by donors or other outside agencies as to the specific purpose for which they may be expended.

Capital Assets: Capital assets are defined by the government as assets with an initial, individual cost of \$5,000 or more (amount not rounded) and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation. The District does not develop software.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized. Major outlays for capital assets and improvements are capitalized as projects are constructed.

The District was a phase I government for purposes of implementing GASB Statement No. 34. However, the District does not have any infrastructure assets to report.

The District does not capitalize interest in regards to any of its capital assets. Depreciation on all non-infrastructure depreciable assets is provided on the straight-line basis over the estimated useful lives with no salvage value. The District has no infrastructure assets; all canals are owned by the Federal Government. The following estimated useful lives are based upon management's estimates:

Equipment

8 to 25 years

Accrued Expenses: Accrued expenses are comprised of payroll expenditures based on amounts earned by the employees through December 31, 2017.

Unavailable Revenue: Accounting principles generally accepted in the United States of America require that grant revenue be recognized at the time the related expense is made if the expenditure of funds is the prime factor for determining eligibility for reimbursement; therefore, amounts received and not expended in the Special Revenue Funds are shown as unavailable revenues. Amounts receivable from the property taxes levied for the current year that are not considered to be "available" under the current financial resources measurement focus are reported as unavailable revenues in the governmental fund financial statements. GASS 63 amended previous guidance on deferred revenues in the Government-Wide Financial Statements to include deferred outflow of resources, which is the consumption of net assets by the government that is applicable to a future reporting period and deferred inflow of resources, which is acquisition of nets assets by the government that is applicable to a future reporting period.

Deferred Outflows of Resources: In addition to assets, the balance sheet reports a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a use of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expenditure) until that time. The District has one type of item that qualifies for reporting in this category. Accordingly, the item, employer contributions subsequent to measurement date, is reported in the Statement of Net Position. This amount is deferred and recognized as an outflow of resources in the period the amount becomes available. The District has recorded \$53,525 related to employer contributions subsequent to measurement date.

Deferred Inflows of Resources: In addition to liabilities, the balance sheet reports a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. Revenue must be susceptible to accrual (measurable and available to finance expenditures of the current fiscal period) to be recognized. If assets are recognized in connection with a transaction, but those assets are not yet available to finance expenditures of the current fiscal period, then the assets must be offset by a corresponding liability for deferred inflows of resources.

In addition, the District has two types of items present on the Statement of Net Position which arise due to the implementation of GASB 68 and the related net pension liability. Accordingly, the items, changes in proportion and differences between District contributions and proportionate share of contributions and net difference between projected and actual earnings, are reported on the Statement of Net Position. These amounts are deferred and recognized as an inflow of resources in the period that the amounts become available.

Compensated Absences: Vested or accumulated vacation leave that is expected to be liquidated with expendable available financial resources is reported as expenditure and a fund liability of the governmental fund that will pay it. Amounts of vested or accumulated vacation leave that are not expected to be liquidated with expendable available financial resources are reported in the government-wide statement of net assets.

The General Fund has been used to liquidate the liability for compensated absences in the past, and it is expected to continue to do so in the future.

Accrued sick leave is not paid upon resignation or termination of an employee; however, at the end of each calendar year an employee can sell back to the District any hours in excess of ninety-six hours, up to a maximum of ninety-six hours at one-half the hourly rate.

In the event that available vacation is not used by the end of the benefit year, employees may carry unused time forward to the next benefit year. If the total amount of unused vacation time reaches a "cap" equal to two times the annual vacation amount, further vacation accrual will stop. When the employee uses paid vacation time and brings the available amount below the cap, vacation accrual will begin again.

The amount of paid vacation time employees receives each year increases with the length of their employment as shown in the following schedule.

- 1. Following the "Introductory Period", the employee is entitled to 10 vacation days each year, accrued biweekly at the rate of 0.385 days.
- 2. After 7 years of eligible service, the employee is entitled to 15 vacation days each year, accrued biweekly at the rate of 0.577 days.
- 3. After 14 years of eligible service, the employee is entitled to 20 vacation days each year, accrued biweekly at the rate of 0.769 days.
- 4. After 21 years of eligible service, the employee is entitled to 25 vacation days each year, accrued biweekly at the rate of 0.962 days.

Long-term Obligations: In the government-wide fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities statement of net position.

Restricted fund balance represents amounts that are constrained either by: 1) externally imposed by creditors (such as debt covenants), grantors, contributors, or laws or regulations of other governments; or 2) imposed by law through constitutional provisions or enabling legislation.

Committed fund balance represents amounts that are useable only for specific purposes by formal action of the government's highest level of decision-making authority.

Assigned fund balance represents amounts that are intended to be used for specific purposes, but are neither restricted nor committed. Intent is expressed by the governing body or a subordinate high-level body or official whom the governing body has delegated.

Unassigned fund balance is the residual classification for the general fund and represents the amounts that have not been assigned to other funds, and that have not been restricted, committed, or assigned to specific purposes.

The District's policy is to apply restricted resources first when an expense is incurred for purposes for which both restricted and unrestricted net assets are available.

Government-wide Statements

Equity is classified as net position and displayed in three components:

Investment in capital assets:

Net position invested in capital assets, net of accumulated depreciation and reduced by the outstanding balances of any bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets.

Restricted net position:

Consists of net position with constraints placed on the use either by (1) external groups such as creditors, grantors, contributors, or laws or regulations of other governments; or (2) law through constitutional provisions or enabling legislation.

Unrestricted net position:

All other net position that do not meet the definition of "restricted" or "invested in capital assets.

Interfund Transactions: Quasi-external transactions are accounted for as revenues, expenditures or expenses. Transactions that constitute reimbursements to a fund from expenditures/expenses initially made from it that are properly applicable to another fund, are recorded as expenditures/expenses in the reimbursing fund and as reductions of expenditures/expenses in the fund that is reimbursed. All other interfund transactions, except quasi-external transactions and reimbursements are reported as transfers. Nonrecurring or nonroutine permanent transfers of equity are reported as residual equity transfers. All other interfund transfers are reported as operating transfers.

Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates. Significant estimates in the District's financial statements include management's estimate of depreciation on assets over their estimated useful lives, accrued compensated absences, and the allowance for uncollectible accounts.

Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Public Employees Retirement Act (PERA) and additions to/deductions from PERA's fiduciary net position have been determined on the same basis as they are reported by PERA, on the economic resources measurement focus and accrual basis of accounting. For this purpose, benefit payment (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Note 2. Stewardship, Compliance and Accountability

Budgetary Information

Formal budgetary integration is employed as a management control device during the year.

Budgets for the General and Debt Service funds are adopted on a basis inconsistent with generally accepted accounting principles (GAAP). The budgets are prepared using the cash basis of accounting. Budgetary comparisons for the various funds in this report are on the non-GAAP budgetary basis. The District follows the following procedures in establishing data reflected in the financial statements:

- 1. The District Manager submits to the District's Board of Directors, in May, a proposed operating budget for the fiscal year commencing the following January 1. The operating budget includes proposed expenditures and the means of financing them.
- 2. The Board of Directors tentatively approves the proposed budget during the June meeting.
- 3. The budget is then submitted to the New Mexico Department of Finance and Administration (DFA) for approval.
- 4. The District's Board of Directors formally adopts the budget during the September meeting.
- 5. The budget may be amended by line item (object) transfers within a series (activity) by action of the Board. Transfers between funds require approval by DFA.
- 6. Formal budgetary integration is employed as a management control device during the year for the General Funds and Debt Service Fund.
- 7. Budget appropriations lapse at the end of the fiscal year unless encumbered.
- 8. Expenditures of the statutory funds (e.g., general and operation and maintenance) may not legally exceed appropriations for each budget. The level of budgetary control is by fund total.

The original budget, approved by the District's Board and the Local Government Division, may be subsequently amended if approved by the District's Board and the Local Government Division. Actual expenditures for each budget may not legally exceed the appropriations in total, including budgeted beginning cash balances. The District's budget for the fiscal year ended December 31, 2015, was properly approved by the District's Board and by the Local Government Division. It was subsequently properly amended.

Note 3. Deposits and Investments

State statutes authorize the investment of District funds in a wide variety of instruments including certificates of deposit and other similar obligations, state investment pool, money market accounts, and United States Government obligations. All invested funds of the District properly followed State investment requirements as of December 31, 2017 amounted to \$1,205,932 as noted on page 42 of this report.

Deposits of funds may be made in interest or non-interest bearing checking accounts in one or more banks or savings and loan associations within the geographical boundaries of the District. Deposits may be made to the extent that they are insured by an agency of the United States or are collateralized as required by statute. The rate of interest in non-demand interest-bearing accounts shall be set by the State Board of Finance, but in no case shall the rate of interest be less than one hundred percent of the asked price on United States treasury bills of the same maturity on the day of deposit. Excess of funds may be temporarily invested in securities which are issued by the State or by the United States government, or by their departments or agencies, and which are either direct obligations of the State or the United States or are backed by the full faith and credit of those governments.

The collateral pledged is listed on page 41 of this report. The types of collateral allowed are limited to direct obligations of the United States Government and all bonds issued by any agency, district or political subdivision of the State of New Mexico. According to the Federal Deposit Insurance Corporation (FDIC), public unit deposits are funds owned by the public unit. Time deposits, savings deposits and interest bearing negotiable order of withdrawal (NOW) accounts of a public unit in an institution in the same state will be insured up to \$250,000 in aggregate and separate from the \$250,000 coverage for public unit demand deposits at the same institution.

Custodial Credit Risk - Custodial credit risk is the risk that in the event of a bank failure, the District's deposits may not be returned to it. The District's policy regarding custodial credit risk is to comply with its Resolution and with Section 6-10-17,

NMSA (1978 Comp). As of December 31, 2017, all of the District's deposits were either insured or fully collateralized with collateral not held in the District's name.

Investments - All of the District's investments at December 31, 2017 were bank certificates of deposit.

Interest Rate Risk - Investments. The District's policy related to interest rate risk with investments is to comply with the state as put forth in the Public Money Act (Section 6-10-1 to 6-10-63, NMSA 1978).

Note 4. Receivables

The District's receivables as of December 31, 2017 are as follows:

	Debt							
	General			ervise		Total		
Reivables:								
Assessments	\$	89,858	\$	5,358	ŝ	98,216		
Allowance for Uncollectible	Annual management of the second	(1,455)		(32)		(1,487)		
Total Assessments		88,403		8,326		94,729		
Ad Volorem Tax		175,247		9,223		184,470		
Total Receivables	\$	263.650	\$	15,549	Ş	279,199		

Note 5. Capital Assets

A summary of capital assets and changes occurring during the year anded December 31, 2017:

	Beginning Balance	Additions	(Reductions)	Ending Balance
Government Activities:				
Capital Assets Not Being Degreciated				
Tucumcari Lake	\$ 15,004	\$ -	\$ -	\$ 15,004
Dry Lake	20,000	- Carrier patents of any analysis of the patents of the contract of the contra	-	20,000
Total Capital Assets Not Being Depreciated	35,004			35,004
Other Capital Assets				
Equipment	1,407,730	204,630	(12,363)	1,599,997
Total Capital Assets Being Depreciated	1,407,730	204,630	(12,363)	1,599,997
Less Accumulated Depreciaiton				
Equipment	(1,114,628)	(59,405)	12,363	(1,161,870)
Capital Assets, Net	\$ 327,906	\$ 145,225	<u>s</u> .	<u>\$ 473,131</u>

Capital assets net of accumulated depreciation, at December 31, 2017 appears in the Statement of Net Position. Depreciation expense was unallocated.

Note 6. Assessments and Ad Valorem Taxes

Assessments

Lands within the Conservancy District boundaries are statutorily classified into irrigatable lands (Class "A" property) and all other lands (Class "B" property). These lands are assessed annually as provided by law to provide the District with funds for operation and maintenance of the irrigation and drainage system, administrative expenses, and the requirements for debt reduction as determined by the Board. The assessment in the Operations and Maintenance Fund may not be less than one-fourth or more than three-fourths of the operating and maintenance costs. The balance of the costs may come from tolls and charges for the use of water or from other sources. Assessments levied on Class A lands attach as an enforceable lien on the property and must be paid in accordance with the Board's policy. The assessment for 2017 was \$14.00 per acre, levied on 41,344.74 acres. The District collects assessments.

The allocation or apportionment of the assessment between Class "A" and "B" lands are provided by statute. The Conservancy Board of Directors, subject to the approval of the Secretary of the Interior and confirmation by the Conservancy Court, adopts a resolution establishing the apportionment between the classes "A" and "B" lands. The apportionment may be modified in a like manner, but not more often than once every five years.

Pursuant to Board Policy, after each landowner of Class "A" property pays the assessment, the landowner is allowed to purchase the

amount of water per acre allocated by the Board, as water is available from the District. Proceeds from water tolls and charges are used to operate and maintain the District's irrigation system.

Ad Valorem Taxes

Ad valorem taxes are levied on all Class "B" lands within the District and attach as an enforceable lien as of January 1; however, the taxes may be paid in two installments (1/2 of total each) prior to December 10 and May 10 of the following year. For 2017, the levy amounted to 5.466 mils. These taxes are collected by the County Treasurer and remitted to the district.

Note 7. Advance Collections of Assessments, Ad Valorem Tax and Water Charges

The District collects water charges in advance, and then recognizes the revenue when the water is delivered. The District collects assessments in advance of the due date and defers these until recognized. The county treasurer collects ad valorem taxes prior to the beginning of the year, the revenue is deferred until recognized.

The balances in these three accounts are as follows:

	Ger	ieral	Deb	t Service	Total		
Advance Collection of Assessments	\$	99,935	\$	9,012	\$	108,947	
Advance Collection of Ad Volorem Tax	*15000000000000000000000000000000000000	113,445		10,308	-,,	123,751	
Total	<u>\$</u>	213,378	Ş	19,320	<u>\$</u>	232,698	

Note 8. Incremental Land Value Credits

Prior to repeal by the U.S. Congress in 1955, the U.S. Bureau of Reclamation collected certain amounts upon the sale of irrigated lands located in the District, pursuant to certain contracts executed with the landowners and the District. The amounts are held by the U.S. Bureau of Reclamation and applied against the construction obligation in inverse order of the due date of the annual installments on the obligation.

The District recognized credit applied on the construction obligations by the Bureau from the advance collections as a reduction in the annual assessment, to the extent of the assessment assessed by the Board of Directors for the year. Credits applied to the construction obligation in excess of the annual assessment to the property owner are recorded in an account entitled "Distributed incremental land value credits - unapplied on assessment rolls". Credit Outstanding were \$198,508 as of December 31, 2017.

Note 9. Long-term Debt

During the year ended December 31, 2017, the following changes occurred in the liabilities reported in the government-wide statement of net position:

Long-term debt transactions are as follows:

				Ending
	Balance	Additions	(Reductions)	Balance
Construction Obligation	\$ 1,063,106	\$ -	\$ (26,362)	\$ 1,036,744
Compensated Absence	22,939	18,234	(17,729)	23,444
	\$ 1,086,045	\$ 18,234	\$ (44,091)	\$ 1,060,188

Note 10. Construction Obligation

The original Construction Obligation is contained in Contract No. 14-06-500-359 between the United States of America and Arch Hurley Conservancy District, dated December 27, 1938, and amended August 20, 1953 and September 30, 1958.

The repayment terms of the original construction obligation are determined by an annual variable repayment formula. The formula relates to the national agricultural parity ratio and the value of the District's gross crop income of the preceding year to determine the annual installment.

The debt bears no rate of interest. Because of the variable nature of the repayment terms mentioned above, there appeared to be no definitive way to compute the net present value of the note in prior years. However, by letter dated March 28, 2006, the Bureau of Reclamation acknowledged the existence of a minimum payment provision which had previously been ignored. The minimum payment amount is \$58,255 per year, beginning in calendar year 2007. The payment amount for calendar year 2017 which was paid in 2017 was \$58,255. Of the \$58,225, \$26,362 was the principal payment.

An interest rate of 3.0% has been imputed to this note. The debt service requirements are as follows:

	Principal		Interest		Total
2018	\$	27,153	\$ 31,102	\$	58,255
2019		27,968	30,287		58,255
2020		28,806	29,449	•	58,255
2021		29,670	28,585	P	58,255
2022		30,560	27,695		58,255
2023-2027		167,117	124,157		291,274
2028-2032		193,735	97,538		291,273
2033-2037		224,592	66,683		291,275
2038-2042		260,364	30,912		291,276
2043		46,779	 1,403		48,182
	\$	1,036,744	\$ 467,811	\$	1,504,555

An act of Congress permits deferral of the annual installment of the construction obligation if the Secretary of the Interior determines that payment would place an undue burden on the water users.

The construction obligation is a general obligation of the District as a whole and is secured by an annual assessment of all taxable property of the District.

Note 11. Public Employees Retirement Association (PERA) Plan

General Information about the Pension Plan

Plan description. The Public Employees Retirement Fund (PERA Fund) is a cost-sharing, multiple employer defined benefit pension plan. This fund has six divisions of members, including State General, State Police/Adult Correction Officer, Municipal General, Municipal Police/Detention Officers, Municipal Fire, and State Legislative Divisions, and offers 24 different types of coverage within the PERA plan. All assets accumulated may be used to pay benefits, including refunds of member contributions, to any of the plan members or beneficiaries, as defined by the terms of this plan. Certain coverage plans are only applicable to a specific division. Eligibility for membership in the PERA Fund is set forth in the Public Employees Retirement Act (Chapter 10, Article 11, NMSA 1978). Except as provided for in the Volunteer Firefighters Retirement Act (10-11A-1 to 10-11A-7, NMSA 1978), the Judicial Retirement Act (10-12B-1 to 10-12B-19, NMSA 1978), and the Educational Retirement Act (Chapter 22, Article 11, NMSA 1978), and the provisions of Sections 29-4-1 through 29-4-11, NMSA 1978 governing the State Police Pension Fund, each employee and elected official of every affiliated public employer is required to be a member in the PERA Fund.

PERA issues a publicly available financial report and a comprehensive annual financial report that can be obtained at http://saonm.org using the Audit Report Search function for agency 366.

Benefits provided. For a description of the benefits provided and recent changes to the benefits see Note 1 in the PERA audited financial statements for the fiscal year ended June 30, 2016 available at HTTP://www.pera.org.

Contributions. The contribution requirements of defined benefit plan members and the District are established in state statute under Chapter 10, Article 11, NMSA 1978. The contribution requirements may be amended by acts of the legislature. For the employer and employee contribution rates in effect for FY15 for the various PERA coverage options, for both Tier I and Tier II, see the tables available in the note disclosures on page 48 of the PERA FY16 annual audit report at http://osanm.org/media/audits/366 Public Employees Retirement Association 2016.pdf. The PERA coverage options that apply to the District is the: Municipal General Division. Statutorily required contributions to the pension plan from the District were \$37,235 and there was no employer paid member benefits that were "picked up" by the employer for the year ended June 30, 2017.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions: The PERA pension liability amounts, net pension liability amounts, and sensitivity information were based on an annual actuarial valuation performed as of June 30, 2015. The PERA pension liability amounts for each division were rolled forward from the valuation date to the Plan year ending June 30, 2016, using generally accepted actuarial principles. Therefore, the employer's portion was established as of the measurement date June 30, 2016.

The assets of the PERA fund are held in one trust, but there are six distinct membership groups (municipal general members, municipal police members, municipal fire members, state general members, state police members and legislative members) for whom separate contribution rates are determined each year pursuant to chapter 10, Article 11 NMSA 1978. Therefore, the calculations of the net pension liability, pension expense and deferred inflows and outflows were preformed separately for each of the membership groups: municipal general members; municipal police members; municipal fire members; state general members; state police members and legislative members. The District's proportion of the net pension liability for each membership group that the employer participates in is based on the employer contributing entity's percentage of that membership group's total employer contributions for the fiscal year ended June 30, 2016. Only employer contributions for the pay period end dates that fell within the period of July 1, 2015 to June 30, 2016 were included in the total contributions for a specific employer. Regular and any adjustment contributions that applied to FY 2016 are included in the total contribution amounts. In the event that an employer is behind in reporting to PERA its required contributions, an estimate (receivable) was used to project the

unremitted employer contributions. This allowed for fair and consistent measurement of the contributions with the total population. This methodology was used to maintain consistent measurement each year in determining the percentages to be allocated among all the participating employers.

For PERA Fund Division Municipal General, at June 30, 2017, the District reported a liability of \$709,362 for its proportionate share of the net pension liability. At June 30, 2016, the District's proportion was 0.0444 percent, which was unchanged from its proportion measured as of June 30, 2015, due to the insignificance of the difference.

For the year ended June 30, 2017, the District recognized PERA Fund - General, pension expense of \$63,353. At June 30, 2017, the District reported PERA Fund Division - General deferred outflows of resources and deferred inflows or resources related to pensions from the following sources:

	D Gu Re	Deferred Inflows of Resources		
Differences between expected and actual experience	\$	35,443	\$	6,923
Change of assumptions		41,598		118
Changes in Proportionianate Share of Contributions		12,929	:	8,691
Net Difference between projected and actual earnings on pension investments		130,701		-
District contributions subsequent to the measurement date	ne promps seminaring	37,235	and to thing a majority physicism of a commissional	
Total	á	256,995	\$ 1!	5,732

\$37,235 reported as deferred outflows of resources related to pensions resulting from the District's contributions subsequent to the measurement date. June 30, 2016 will be recognized as a reduction of the net pension liability in the year ended June 30, 2017. Other amounts reported as deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ended June 30

2018	\$ 46,302
2019	46,302
2020	78,424
2021	32,770
2022	
There After	-

Actuarial assumptions. As described above, the PERA Fund member group pension liabilities and net pension liabilities are based on actuarial valuations performed as of June 30, 2014 for each of the membership groups. Then each PERA Fund member group pension liability was rolled forward from the valuation date to the Plan year ending June 30, 2017 using generally accepted actuarial principles. There were no significant events or changes in benefit provisions that required an adjustment to the roll-forward liabilities as of June 30, 2015. These actuarial methods and assumptions were adopted by the Board for use in the June 30, 2015 actuarial valuation.

Actuarial valuation date	June 30, 2015
Actuarial cost method	Entry age normal
vAmortization period	Solved for based on statutory rates
Asset valuation method	Fair value
Actuarial assumptions:	
 Investment of rate of return 	7.48% annual rate, net of investment expense
 Payroll growth 	2.75% for 10 years 3.25% thereafter
 Projected benefit payment 	100 Years
Projected salary increases	2.75% to 14.00% annual rate
Includes inflation at	2.25% annual rate 10 Years 2.75% Thereafter

 Mortality Assumption 	RP-2000 Mortality Tables (Combined table for Healthy post retirements, Employee table for active members, and disabled table of disabled retirees before retirement age) with projection to 2018 using Scale AA.
Experience Study Dates	7-1-2008 to 6-30-13 Demographic

The long-term expected rate of return on pension plan investments was determined using a statistical analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target asset allocation and most recent best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

ALL FUNDS - Asset Class	Target Allocation	Long-term Expected Real Rate of Return
Global	43.5%	7.39%
Risk Reduction & Mitigation	21,50	1.79
Credit Oriented Fixed Income	15.0	5.77
Real Assets	20.0	7.35
Total	100.0%	

Discount rate: The discount rate used to measure the total pension liability was 7.48 percent. The projection of cash flows used to determine the discount rate assumed that future contributions will be made in accordance with statutory rates. On this basis, the pension plan's fiduciary net position together with the expected future contributions are sufficient to provide all projected future benefit payments of current plan members as determined in accordance with GASBS 67. Therefore, the 7.48% assumed long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the Employer's proportionate share of the net pension liability to changes in the discount rate:

The following tables show the sensitivity of the net pension liability to changes in the discount rate. In particular, the tables present the District's net pension liability in each PERA Fund Division that the District participates in, under the current single rate assumption, as if it were calculated using a discount rate one percentage point lower (6.75%) or one percentage point higher (8.75%) than the single discount rate.

PERA Fund Division -	1 % Decrease	Current Discount Rate	1% Increase
General	(6.48%)	(7.48%)	(8.48%)
District's proportionate share of the net pension liability	\$ 1,057,596	\$709,362	\$420,520

Pension plan fiduciary net position.

Detailed information about the pension plan's fiduciary net position is available in the separately issued FY14 Restated PERA financial report. The report is available at: http://www.pera.state.nm.us/publications.html.

Payables to the pension plan.

As of June 30, 2017 the District had no outstanding payable to PERA.

Note 12. Post-Employment Benefits - State Retiree Health Care Plan

The Retiree Health Care Act, Chapter IV, Article 7C, NMSA 1978 provides comprehensive core group health insurance for persons who have retired from certain public service in New Mexico. The District has elected not to participate in the post-employment health insurance plan.

Note 13. Significant Estimates

The District records ad valorem taxes receivable based on information provided by the Quay County Treasurer's Office. An estimated receivable of \$184,470 at December 31, 2017 was recorded by the District based on the applicable assessed valuation, the related mill levy rates and other information provided.

Note 14. Agreement with Interstate Stream Commission

Pursuant to an agreement with the Interstate Stream Commission, the District has agreed to act as a conduit for loans to individuals for the specific purposes of improving water distribution and promoting water conservation. The terms of the loan to the District provide for repayment over a period of 20 years at an interest rate of 2.5%. The District loans these funds in turn to property owners at available rates of between 3% and 4%. The agreement permits the District to charge the funds for reasonable and documented administrative costs.

This activity is reported in the Private Purpose Trust Fund.

Pursuant to the agreement with the Interstate Streams Commission concerning the loans to landowners, the District has guaranteed the repayment of such loans. Although property mortgages secure the loans, the District remains contingently liable for such loans. A provision for contingencies related to Interstate Streams Commission has not been provided for, as the District does not expect any losses on these loans. As of December 31, 2017 the liability was paid off.

Note 15. Contingencies

Amounts received or receivable from grantor agencies are subject to audit and adjustment by grantor agencies, principally the state and federal governments. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount, if any, of expenditures which may be disallowed by the grantors cannot be determined at this time although the District expects such amounts, if any, to be immaterial.

Note 16, Concentrations

Approximately 93% of the District's revenues are derived from assessments and ad valorem taxes. Reduction or interruption of these revenue sources is not expected; however, if reduction or interruption occurred, it would have a material impact on the operations of the District. The District also depends on financial resources flowing from, or associated with, both the Federal Government and the State of New Mexico. Because of this dependency, the District is subject to changes in specific flows of intergovernmental revenues based on modifications to Federal and State laws and federal and State appropriations.

Note 17. Related Party Transactions

Directors on the Board of the District are recipients of water delivery charges and services. These transactions are correctly considered arm's length transactions since these related parties are subject to the same installation, invoicing, payment expectations, and late payment procedures as all the District customers.

Note 18. Subsequent Events Review

Arch Hurley Conservancy District has evaluated subsequent events through May 21, 2018, which is the date the financial statements were dated.

Note 19. Risk Management

The District is exposed to various risk of loss related to torts, thefts of, damage to, and destruction of assets, errors and omissions, and natural disasters for which the District carries insurance with commercial carriers. The insurance coverage is for general and auto liability, workmen's compensation, employee liability, and property.

A surety bond as required by Section 12-6-7 NMSA 1978 Compilation and the New Mexico State Auditor Rule NMAC 2.2.2 covers the officials and certain employees of the District.

The following is a description of the surety bond coverage: A. Name and address of insurance company:

A Name of Company

The Ohio Casualty Insurance Co.

136 No. Third Street Hamilton, Ohio 45025

B. Bond number

1-850-435

C Expiration date:

4-15-18

D. Individual Bonded and Amount of Coverage per Employee

\$300,000

E. Coverage

Employee Dishonesty

Note 20. Capital Appropriations

The District received a New Mexico Capital Outlay Grant per Laws of 2016 Chapter 81, Section 22 Paragraph 143 in the amount of \$80,000 to purchase equipment for improving canal delivery efficiency in the counties of Quay and San Miguel within the Arch Hurley Conservancy District. All funds were expended prior to the reversion date of June 30, 2018 for said equipment.

Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance With Government Auditing Standards

Independent Auditor's Report

Mr. Wayne Johnson State Auditor of the State of New Mexico Board Members of Arch Hurley Conservancy District

Mr. Keller and Members of the Board

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of Arch Hurley Conservancy District (the District) as of and for the year ended December 31, 2017, and related notes to the financial statements, which collectively comprise the District's basic financial statements, and the budgetary comparison of the District presented as supplementary information, and have issued my report thereon dated May 25, 2018.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the District's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing my opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we do not express an opinion on the effectiveness of the District's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during my audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the District's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of my testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* \n considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
