INDEPENDENT AUDITORS' REPORT

State of New Mexico
Energy, Minerals, and Natural Resources Department and
Mr. Hector H. Balderas
New Mexico State Auditor

We have audited the accompanying financial statements of the governmental activities, each major fund, general fund and major special revenue fund budgetary comparisons, and the aggregate remaining fund information of the State of New Mexico Energy, Minerals, and Natural Resources Department (the Department) as of and for the year ended June 30, 2008, which collectively comprise the Department's basic financial statements as listed in the table of contents. We also have audited the financial statements of each of the Department's non-major governmental funds, fiduciary funds and the respective budgetary comparisons for the non-major governmental funds and the major capital project fund presented as supplementary information in the accompanying combining and individual fund financial statements as of and for the year ended June 30, 2008, as listed in the table of contents. These financial statements are the responsibility of the Department's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

As discussed in Note 1, the financial statements of the Department are intended to present the financial position and results of operations of only that portion of the financial reporting entity of the State that is attributable to the transactions of the Department. They do not purport to, and do not, present fairly the financial position of the entire State of New Mexico as of June 30, 2008, and the respective changes in the financial position and cash flows, where applicable, thereof and the respective budgetary comparison for the general and special revenue funds for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

State of New Mexico
Energy, Minerals, and Natural Resources Department and
Mr. Hector H. Balderas
New Mexico State Auditor

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of the Department as of June 30, 2008, and the respective changes in financial position thereof, and the respective budgetary comparisons for the general fund and major special revenue fund for the year then ended, in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of each non-major governmental fund and fiduciary funds of the Department as of June 30, 2008, and the respective changes in financial position thereof, and the respective budget comparisons for the non-major governmental and major capital project fund for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued our report dated December 11, 2008, on our consideration of the Department's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The Management's Discussion and Analysis is not a required part of the basic financial statements but is supplemental information required by the Governmental Accounting Standards Board (GASB). We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was made for the purpose of forming opinions on the basic financial statements, the combining and individual fund financial statements, and the budgetary comparisons of the Department taken as a whole. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by the U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and is not a required part of the basic financial statements. Also, the schedules listed as other supplementary information in the table of contents, including the Schedule of Changes in Assets and Liabilities of Agency Funds, are presented for purposes of additional analysis and are not a required part of the basic financial statements of the Department. Such information has been

State of New Mexico
Energy, Minerals, and Natural Resources Department and
Mr. Hector Balderas
New Mexico State Auditor

subjected to the auditing procedures applied in the audit of the basic financial statements, and in our opinion is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

Meyners + Company, LLC

December 11, 2008

STATE OF NEW MEXICO ENERGY, MINERALS, AND NATURAL RESOURCES DEPARTMENT

Management's Discussion and Analysis

The State of New Mexico Energy, Minerals, and Natural Resources Department's (the Department) discussion and analysis is designed to assist the reader in focusing on significant financial issues, provide an overview of the Department's financial activity, identify changes in the Department's financial position (ability to address future year challenges), identify any material deviations from the financial plan, and identify any fund issues of concern.

The Management's Discussion and Analysis (MD&A) is designed to focus on the past year's activities, resulting changes and currently known facts; please read it in conjunction with the transmittal letter at the front of this report and the Department's financial statements and notes which follow this section.

Financial Highlights

- The Department's governmental net assets decreased by \$2,226,150 in fiscal year 2008.
- The Department's operating revenues increased by \$1,363,686 for fiscal year 2008.
- The total cost of all Department programs was \$71,473,757.

Program Highlights

Renewable Energy and Energy Efficiency

The Energy Conservation and Management Division (ECMD) continued to aggressively implement clean energy-related policies and statutes established by the Governor and Legislature over the last six years. Priorities include: (1) stimulating clean energy (renewable energy, energy efficiency and clean fuels) projects and facilities; (2) providing training, outreach and technical assistance to the general public, local and tribal governments, public schools, universities and targeted industries to foster deployment of clean energy technologies and strategies; and (3) coordinating with the General Services Department and other state agencies to ensure that New Mexico state government is leading by example in all aspects of its daily operations, new building construction, and vehicle procurement and utilization. Selected accomplishments include: (1) facilitating the development of over 500 megawatts of new wind power on New Mexico's eastern plains; (2) administering over 90 clean energy projects, totaling over \$11,000.0; (3) providing input for implementing the Efficient Use of Energy Act, resulting in the commitment of over \$20,000.0 per year in utility-provided energy efficiency incentives to the residential and commercial sectors; (4) leveraging private investments of \$2,500.0, federal tax credits of \$580.0 and solar market development tax credits for EMNRD-certified solar systems for \$1,406.0; and (5) implementing the sustainable building tax credit passed by the 2007 New Mexico Legislature for building energy efficient and green buildings in the residential and commercial sectors – the first tax credit in the nation of this breadth and depth. Through these tax incentives, the bar is being raised for energy efficiency in statewide building codes.

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Management's Discussion and Analysis - continued

Program Highlights - continued

Renewable Energy and Energy Efficiency - continued

Prospectively, ECMD plans to build on the clean energy policy and program foundation now firmly in place by: (1) pursuing additional market-based incentives and other cost-effective measures in statute to continue to stimulate clean energy projects and clean energy-related manufacturing enterprises throughout the state; (2) expanding its "lead by example" outreach to school districts, universities and local governments; (3) moving toward Zero-Energy Home Program focused on ensuring that new homes incorporate cost-effective state-of-the-art energy efficiency measures, with particular attention to the low-income home buyer; and (4) in coordination with the Economic Development Department, facilitating the demonstration and deployment of promising economic development potential throughout the state.

Healthy Forests Program

The Forestry Division's role is to protect New Mexico's forests and watershed health. This mission is largely driven on two fronts: advocate for forest restoration and watershed health and the prevention and suppression of wild land fires. Forest and watershed health efforts require strong partnerships and collaborations between and among local, state, tribal, federal and private entities. The Forestry Division provides the leadership that drives those partnerships and collaborations. The division's newly established Forest and Watershed Health Office, as well as the seven field offices, follow the division's Forest and Watershed Health Plan for establishing and maintaining a collaborative, landscape-scale framework for these efforts.

The division was responsible for over 1,100 fires during the 2008 season. The fire season started in January with large grass fires in the southeastern portion of the state, spread into the forested areas and produced eight incidents that required a Type 1 or Type 2 Incident Management Team to suppress. Four of them were declared FEMA incidents. In addition, nine large (but not as complex) fires required the assistance of Type 3 Incident Management Teams. Previous years' efforts to better equip local government fire departments allowed New Mexico to mobilize resources to assist with many in state fires, as well out-of-state fires when the monsoons finally arrived. The fire departments' added capacity is critical and will improve protection to communities and at-risk watersheds long into the future. Fire risks in wild land areas increasingly threaten people and businesses, as well as forests and watershed health. The division continues to chair and coordinate the New Mexico Fire Planning Task Force that deals with wild land urban interface areas most vulnerable to danger from wild land fires in New Mexico. The division funded and the Fire Planning Task Force has approved 19 county/area Community Wildfire Protection Plans (CWPPs) and continues to provide technical assistance to four New Mexico Association of County funded CWPPs.

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Management's Discussion and Analysis - continued

Program Highlights - continued

Mine Reclamation Program

The Mine Reclamation Program continued to make strides in assuring the reclamation and safeguarding of New Mexico's mines. The program is overseeing several large hard rock and coal mine reclamation projects, including the major reclamation of mine tailings at the Phelps Dodge Tyrone Mine. Under a federal grant, the program safeguarded over 160 abandoned mine openings in the past two years. The program has also received awards for its innovative and high quality reclamation work, including most recently the National Award from the Office of Surface Mining for outstanding performance and exemplary abandoned mine land reclamation for the Real de Dolores Mine Safeguard Project south of Santa Fe.

The program is seeing an increase in uranium exploration projects and is taking steps to prepare for a possible return of uranium mining in northwest New Mexico. Specialized uranium mine reclamation training and coordination with tribal, federal and state agencies, along with citizen groups, have been implemented to educate program staff and to increase public trust. The program has initiated efforts to address the legacy of past uranium mining in New Mexico through conducting field investigations, determining remediation steps, and leveraging funding for clean-up with other agencies and tribal governments.

State Parks

State Parks celebrated its 75th anniversary in 2008. Formed in 1933 as the New Mexico State Parks Commission, the New Mexico State Parks Division has grown into a 34-park system that includes 19 lakes and nearly 183,000 acres of land. State parks are currently located in 25 of New Mexico's 33 counties and generate over \$200 million annually for New Mexico's economy. State Parks are part of the Executive's plan for sustainable economic development in New Mexico, especially in rural areas.

Visitation to state parks in FY08 was 4.6 million, a 14 percent increase over FY07. After eight straight years of visitation declines (FY97-FY04), State Parks has essentially maintained or increased visitation every year from FY05-FY08, despite the challenges posed by drought and rising gas prices. Self-generated revenues increased in FY05, FY06, FY07, and FY08, which also reversed revenue declines in the five fiscal years prior to FY05.

A 35th state park—Cerrillos Hills/Galisteo Basin in Santa Fe County—is authorized and funded and will open in late 2008. The Governor has announced his support for a new Pecos Canyon State Park and the Legislature has also requested feasibility studies analyzing the potential for new state parks at Shiprock, Blackwater Draw, and Placitas.

Highlights of the State Parks Program during FY08 included: (1) a 14 percent visitation increase; (2) exceeding all key performance measures; (3) the year-long celebration of the 75th Anniversary, which included visitor discounts, promotions, and more special programs and events than ever; (4) completion of several major park renovation and improvement projects; and (5) significant progress on the Outdoor Classroom Program in

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Management's Discussion and Analysis - continued

Program Highlights - continued

State Parks - continued

conjunction with the Public Education Department, including work with 37 school districts and completion of the new Lower Rio Grande Bosque Education Guide for teachers.

The strategic direction for State Parks includes efforts to: (1) improve park facilities; (2) increase visitation; (3) increase self-generated revenue and diversity revenue sources; (4) protect sites important to New Mexico's natural and cultural heritage; (5) improve recreation and trail opportunities statewide, including construction of the Rio Grande Trail; (5) expand boater education to make boating in New Mexico safer; (6) grow the role of state parks in statewide health and wellness efforts; and (7) expand the Outdoor Classroom Program—especially for children.

Oil and Gas Conservation Program

The Oil Conservation Division continues to concentrate on the enforcement of its rules to prevent environmental contamination from oil and gas operations and to enhance those rules in order to ensure that it provides clear guidance on practices to protect human health and the environment. In FY08 the division conducted 18 days of hearings and five days of deliberations which resulted in the unanimous passage by the Oil Conservation Commission of a modified version of the proposed rule to regulate pits. This rule went into effect on June 16, 2008 and the division has provided four industry training sessions thus far.

In FY08 the last portion of a new enforcement rule from 2005 went into effect; this rule requires that well operators provide additional financial assurance for wells on state and fee land that have been inactive for more than two years. As a result of this, the division now has access to 2,943 inactive well financial assurances totaling almost \$31 million. These financial assurances will be used if the wells must be plugged to protect the ground water and the well operator does not have sufficient funds to cover the plugging cost.

Already in FY09 the division successfully reorganized its rules so that all information related to an activity is in one section. The division is also working on carbon sequestration initiatives, continuing efforts to divert water produced in oil and gas operations from disposal and continued coordination of activities related to requests to drill in the Galisteo Basin and in other areas of the state. There have been several recent instances where the division's enforcement actions have been upheld in court. In September, 2008, the Supreme Court of New Mexico denied a petition which effectively affirmed the division's Surface Waste Management Rule. Also in September, a request to keep an OCD compliance case against a well operator from proceeding was denied by the First Judicial District Court. The division will continue to refine its rules and consistently enforce them.

The division and EMNRD's Information Technology bureau are working to expand the already massive amount of information available on the web. The first of these new offerings is expected to be delivered in FY09.

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Management's Discussion and Analysis - continued

Using This Annual Report

The focus of this report is on both the Department (government-wide) and the major individual funds. Both perspectives (government-wide and major funds) allow the user to address relevant questions, broaden a basis for comparison and enhance accountability. Although the Department is one of several agencies within the State of New Mexico Government, the primary Government focus in this financial report is the Department and not the State of New Mexico as a whole.

Management's Discussion and Analysis

MD&A should provide an objective and easily readable analysis of the Department's financial activities based on currently known facts, decisions or conditions. It should provide an analysis of the Department's overall financial position and results of operations to assist users in assessing whether the financial position has improved as a result of the year's activities. Additionally, it should provide an analysis of significant changes that occur in funds and significant budget variances.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the Department's basic financial statements. The Department's basic financial statements comprise four components: 1) government-wide financial statements, 2) fund financial statements, 3) budgetary comparisons, and 4) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Government-wide Financial Statements. The government-wide financial statements consist of a statement of net assets and a statement of activities. These statements should report all of the assets, liabilities, revenues, expenses, and gains and losses of the government. Fiduciary activities whose resources are not available to finance the government's programs are excluded from the government wide statements. Most of the Department's basic services are included in the governmental activities. State appropriations and federal grants finance most of these activities. The funds included in Governmental Activities for the Department are the General Operating Fund, Special Revenue Funds, Debt Service Fund and Capital Project Funds.

GASB #34 requires that infrastructure assets (roads, bridges, traffic signals, etc.) be valued and reported within the Governmental column of the Government-wide Statements. Additionally, the government must elect to either depreciate these assets over their estimated useful life or develop a system of asset management designed to maintain the service delivery potential. The Department does not own a material interest in any infrastructure assets and therefore, is not required to implement this portion of GASB #34.

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Management's Discussion and Analysis - continued

Overview of the Financial Statements - continued

Fund Financial Statements. Fund financial statements consist of a series of statements that focus on information about the major governmental and enterprise funds. Fund financial statements also report information about a government's fiduciary funds. Governmental fund financial statements are prepared using the current financial resources measurement focus and the modified accrual basis of accounting. Fiduciary fund financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting. The Department has two types of funds: governmental funds and agency funds.

Governmental Funds

Most of the Department's services are included in governmental funds which focus on (a) how cash and other financial assets, that can be readily converted to cash, flow in and out, and (b) the balances left at year-end that are available for spending. The governmental fund statements provide a detailed short-term view and help the user determine whether there are more or fewer financial resources that can be spent in the near future to finance the Department's programs. Since this information does not include the additional long-term focus of the government-wide statements, reconciliation between the government-wide statements and the fund financial statements is provided for governmental-type activities.

Agency Funds

The agency funds are used to report assets held in trustee or agency capacity for others and therefore are not available to support Department programs. The reporting focus is upon net assets and changes in net assets and employs accounting principles similar to proprietary funds. With the implementation of GASB #34, agency funds are not included with the governmental-type funds since these funds are not available to support the Department's programs. The Department's agency funds are the Boat Suspense Fund, Governmental Gross Receipts Tax Fund, Soil & Water Equipment Fund, Oil Disposition Fund and the Renewable Energy Transmission Fund. The Renewable Energy Transmission Fund is a new fund that was added this year.

Budgetary Comparisons

In addition to the MD&A, GASB #34 requires budgetary comparison schedules for the general fund and for each major special revenue fund that has a legally adopted annual budget to be presented as Required Supplementary Information (RSI). The budgetary comparison schedules should present both the original and the final appropriated budgets for the reporting period, as well as the actual inflows, outflow and balances, stated on the government's budgetary basis.

As required by the Office of the State Auditor under 2 NMAC 2.2, the Statements of Revenues and Expenditures – Budget and Actual are also presented. This information is provided at the approved budget level to demonstrate compliance with legal requirements.

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Management's Discussion and Analysis - continued

Budgetary Comparisons - continued

The budget to actual statement reflected a significant difference between budgeted federal revenues and actual revenues, as well as budgeted expenditures and actual expenditures. The primary cause for both of these differences is related to multi-year federal grants and the related contractual obligations against these grants. The budgeted federal revenues and expenditures (both in the Contractual and Other Costs categories) are higher based on encumbering the entire amount of these multi-year federal contracts. Because the full amounts of these multi-year contracts are encumbered, there is a related increase in the budgeted revenues and budgeted expenditures. The actual federal revenues and expenditures only include expended funds for this fiscal year and are therefore significantly lower than budgeted amounts. This difference does not indicate a significant shortfall in budgeted revenues or expenditures, but is instead related to the process of fully encumbering multi-year federal grant commitments.

Notes to the Financial Statements

The notes to the financial statements consist of notes that provide information that is essential to a user's understanding of the basic financial statements.

Required Supplementary Information (Other than MD&A)

In addition to the basic statements and accompanying notes, this report also presents certain required supplementary information concerning the Department's progress in funding its obligation to provide pension benefits to its employees.

Financial Analysis of the Department as a Whole

Net Assets

Table A-1 summarizes the Department's net assets for the fiscal year ending June 30, 2008. Total Department net assets for fiscal year FY 2008 is \$89,057,702. Unrestricted net assets in Governmental Activities were \$21,461,026 at the end of the fiscal year. Restricted net assets including capital projects, debt service and special appropriations were \$20,421,284. The balance of \$47,175,392 in net assets represent those invested in capital assets, net of related debt (buildings, equipment, etc.). It should also be noted for comparison purposes the amounts for fiscal year 2007 were restated to include revenue not properly recognized, expenditures not properly recognized, projects in process not capitalized and a math error in calculating the liabilities in the statement of net assets. See note 17 for more detailed information.

Current Liabilities	\$18,723,555	\$16,948,352	\$1,775,203
Long Term Obligations	<u>\$19,097,991</u>	<u>\$19,884,080</u>	<u>-\$786,089</u>
Total Liabilities	\$37,821,546	\$36,832,432	\$989,114
Net Assets:			
Invested in Capital Assets, net of			
Related Debt	\$47,175,392	\$42,106,257	\$5,069,135
Restricted	\$20,421,284	\$30,187,429	-\$9,766,145
Unrestricted	<u>\$21,461,026</u>	<u>\$18,990,166</u>	<u>\$2,470,860</u>
Total Net Assets	<u>\$89,057,702</u>	<u>\$91,283,852</u>	<u>-\$2,226,150</u>

The Department's net assets decreased \$2,226,150 over the course of this fiscal year's operations. The following financial information is a comparison of net assets for 2008 and 2007.

The total assets consist of cash and cash equivalents, investment in the State Treasurers General fund Investment pool, receivables from the federal government for grants, receivables from other state agencies, amount due from fiduciary fund, other receivables and capital assets (net of accumulated depreciation). Total liabilities consist of an advance from the State Treasurers General fund Investment pool, accrued interest payable, accounts payable, amounts due from fiduciary funds, deferred revenue, accrued salaries and employee benefits payable, amounts due to the state's general fund and other agencies and the current amount of other obligations and compensated absences payable. Net assets are comprised of investment in capital assets, restricted and unrestricted amounts. In 2008, the amount that was restricted was used to illustrate reserved amounts in the fund financial statements as stated above.

STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT

Management's Discussion and Analysis - continued

Financial Analysis of the Department as a Whole - continued

Net Assets - continued

The variances consist of:

- **Total assets** – The variance of current and other assets is due to the fact that cash, cash equivalents and investment in the State Treasurers General fund Investment pool decreased by \$7.1 million from fiscal year 2007. This is due in part to a decrease of revenue over expenditures from the previous year of approximately \$3 million dollars. Also there was an increase in net receivables of \$2.2 million from fiscal year 2007. Net capital assets increased from the fiscal year 2007 stated amount by \$5.4 million partly due to including projects in process.
- **Total liabilities** – In current liabilities a major factor contributing to the variance was an increase in the amount of accounts payable, which increased by approximately \$2.5 million dollars. Other liabilities such as advance from the State Treasurers General Fund Investment Pool and accrued interest payable decreased from FY07. Also in FY07 all of the compensated absences were recorded in current liabilities. In FY08, the non-current portion of compensated absences was recorded under long-term obligations accounting for most of the variance in this category.
- **Total net assets** – The net assets for the Department decreased from 2007 by \$2,226,150. The Department's total revenue decreased by approximately 5.3% from \$73,092,332 to \$69,247,607. The Department's total expenses decreased by approximately 1.11% from \$72,279,030 to \$71,473,757. Total net assets decreased by approximately 2.44% from \$91.3 million to \$89.1 million.

Changes in Net Assets

The Department's change in net assets for fiscal year FY 2008 was a decrease of \$2,226,150 (Table A-2). A significant portion, forty one (41%), of the Department's revenue comes from State General Fund Appropriations. Twenty-eight percent (28%) comes from federal grant funds, ten percent (10%) comes from gross receipts tax and eight percent (8%) comes from charges for services. As in Table A-1, it should also be noted for comparison purposes the amounts for fiscal year 2007 were restated to include revenue not properly recognized, expenditures not properly recognized, projects in process not capitalized and a math error in calculating the liabilities in the statement of net assets. See note 17 for more detailed information.

Net Assets, end of year	<u>\$89,057,702</u>	<u>\$91,283,852</u>	<u>-\$2,226,150</u>

Total Revenues \$69,247,607: Revenue received is comprised mostly of appropriations from the state's general fund, but also includes federal grant funds, gross receipts tax, bond proceeds, bond forfeitures, severance tax, interest, gasoline tax and other miscellaneous revenue. Also included in revenue are charges for services of \$5,430,734 which include park admissions, overnight camping, concessionaire income, seedling sales and other penalties.

STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT

Management's Discussion and Analysis - continued

Financial Analysis Of The Department As A Whole - continued

Changes in Net Assets - continued

Total Expenses \$71,473,757: The expenses consist of Personal Services and Benefits. Due to the nature of the department's activities in the areas of mining, oil production, etc., the department is staffed with a high volume of technical positions and engineers. In addition, expenditures also include the cost of salaries, overtime and other costs associated with fire suppression activities.

Another area of expenditures within the Department is the category of Contractual Services, which includes costs associated with fire suppression activities. In addition, this category is used to flow federal grant funds through to local communities within the state.

Significant expenditures within the Department were in the category of Other Costs. This category pays for operational expenses of the Department including utilities, postage, rent of equipment, which are a major portion of the Department costs with 34 field offices statewide. The majority of expenditures within this category are the costs associated with forest protection and safeguarding activities, abandoned mine reclamation, oil and gas well reclamation projects as well as Joint Powers Agreements for construction of outdoor recreational trails projects and conservation projects under the youth conservation corps program.

Change in Net Assets \$(2,226,150): The Department's total revenue decreased by approximately 5.3%, from \$73,092,332 to \$69,247,608. The Department's total expenses decreased by approximately 1.11%, from \$72,279,030 to \$71,473,757. Total net assets decreased by approximately 2.44%, from \$91.3 million to \$89.1 million.

The net assets decreased by \$2,226,150, indicating that the Department is worse off than it was a year ago.

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Management's Discussion and Analysis - continued

Governmental Activities by Program

The department has multiple and varied programs that our resources fund. The Divisions within our Department include the energy conservation and management division, the forestry division, the mine reclamation division, the oil and gas conservation division, the state parks division, youth conservation corps, multiple capital projects and the program support division. The table below shows the expenses by division/program and the percentage of all expenses which was taken from the fund financial statements. The difference in this amount and the amount shown in the statement of activities is approximately \$2.7 million, which is mainly comprised of adjustments made for depreciation, capital outlay, compensated absences and debt service.

<u>Program</u>	<u>Expenses</u>	<u>Percentage Spent by Program</u>
Renewable Energy & Energy Efficiency	\$2,324,115	3.13%
Forestry	\$17,302,473	23.31%
Mine reclamation	\$3,812,566	5.14%
Oil and gas conservation	\$7,692,120	10.36%
State parks	\$27,139,512	36.56%
Program support	\$4,668,161	6.29%
Capital projects	\$8,762,193	11.80%
Youth conservation corps	<u>\$2,532,508</u>	<u>3.41%</u>
	<u>\$74,233,648</u>	<u>100.00%</u>

Fund Balance

As the Department completed the year, its governmental funds reported a combined fund balance of approximately \$44,014,036, which is \$7,256,465 lower than last year. One significant reason for the decrease was that net other financing sources (uses) decreased by approximately \$5.4 million from FY07. There was also a significant deficiency of revenues under expenditures. This deficiency increased from FY07 by approximately \$2 million dollars.

The ending fund balance of 44 million is comprised of amounts reserved and unreserved. The reserved fund balance is broken down by \$17 million reserved for capital projects, \$3.3 million reserved for debt service and \$100,000 for special appropriations. Of the unreserved fund balance, \$23.5 million is categorized in the special revenue funds.

The general fund is the chief operating fund for the Department. It accounts for revenue and expenses not designed for specific purposes in all the program areas except Parks. The Parks fund is non-reverting while the General fund reverts all unreserved fund balance. At the end of the current fiscal year, the reserved fund balance of the general fund was \$100,000 which is for special appropriations and comprised the total balance. The total

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Management's Discussion and Analysis - continued

Fund Balance - continued

fund balance of the Department's general fund decreased by \$400,000 during the current fiscal year. This is due to the fact that the amount reserved for special appropriations decreased from \$500,000 to \$100,000.

Besides the general fund, the other major funds were the emergency fire disaster fund, the capital projects severance tax bonds fund and the Parks fund. Changes in these fund balances from FY07 are as follows:

- The Emergency Fire Disaster decreased by \$609,027.
- The Capital Projects Severance tax bond fund decreased by \$9,549,077.
- The Parks fund increased by \$1,957,159.

General Fund Budgetary Highlights

The New Mexico State Legislature makes annual appropriations to the Department. Amendments to the appropriated budget require approval by the Budget Division of the Department of Finance and Administration with review by the Legislative Finance Committee.

Over the course of the year, the Department adjusts its budget as authorized in the Appropriations Act. The budget adjustments fall into four categories:

- Supplemental and special appropriations that are reflected in the actual beginning account balances (correcting the estimated amounts in the budget adopted for the fiscal year).
- Capital Improvement Project appropriations that are budgeted during the year based on legislative appropriations.
- Budget adjustment requests made during the fiscal year to allow the Department to utilize funds where needed.
- Budget adjustment requests that increase or decrease other state funds based on actual revenues.

The Department received \$1,270,000 of special appropriations for FY 2008.

The Department received several capital project appropriations for FY 2008.

The Governor issued 13 executive orders for FY 2008 for emergency fire suppression activities in the amount of \$9,750,000.

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Management's Discussion and Analysis - continued

Capital Assets and Debt Administration

At the end of fiscal year 2008, the Department has invested a total of \$122,930,574 in governmental-type activities in a variety of capital assets (fixed assets). This amount represents a net increase (including additions and deductions) of \$9,852,916, which is approximately 7% over last fiscal year. The major increases in fixed assets during the fiscal year were in the areas of land improvements, equipment and machinery, vehicles and projects in process. The State Parks Division funds numerous capital projects annually to include various boat ramp extensions, visitor center remodeling, statewide water and wastewater improvements, statewide shelter/picnic table replacements, campground facilities construction and enhancement, and repairs to historic administration buildings and walkways. This is due in part to a concerted effort by the State Parks Division to maintain facilities in a manner that will attract both in-state and out-of-state visitors. As noted in the other tables, the amounts for 2007 were restated to include projects in process.

**Table A-3
Department's Capital Assets
(Dollars in Millions)**

	<u>FY 2008</u>	<u>(Restated) FY 2007</u>	<u>Amount Change</u>	<u>Total % Change</u>
Land	9.2	9.1	0.1	1.10%

Museum Acquisitions	0.5	0.5	0.0	0.00%
Projects in process	<u>2.5</u>	<u>1.8</u>	<u>0.7</u>	<u>38.89%</u>
	<u>122.9</u>	<u>114.8</u>	<u>8.1</u>	<u>7.06%</u>

The Department has many capital projects in process, several which are tentatively scheduled for completion next fiscal year. More detailed information about the Department's capital assets is presented in Note 4 to the financial statements. Accumulated depreciation for these capital assets is calculated at \$ 55,871,102.

GASB #34 requires the recording and depreciation of infrastructure assets such as roads, bridges, traffic signals, etc. The Department does not own a material interest in any infrastructure assets.

AND NATURAL RESOURCES DEPARTMENT**

Management's Discussion and Analysis - continued

Long Term Debt

The Department's long-term debt includes seven outstanding bond issues and a federal loan entered into by the State Parks Department. At the end of FY 2008, the amount outstanding on these obligations was \$19.9 million. Detailed information about the Department's long-term debt is presented in Note 6 to the financial statements.

STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT

Reconciliation of the Statement of Revenues, Expenditures,
and Changes in Fund Balances - Governmental Funds
to the Statement of Activities - Governmental Funds

YEAR ENDED JUNE 30, 2008

Net Changes in Fund Balances - Total Governmental Funds
(Statement of Revenues, Expenditures, and Changes in Fund Balances) \$ (7,256,465)

Amounts reported for governmental activities in the Statement of Activities are different because:

In the Statement of Activities, certain operating expenses - compensated absences (sick and annual leave) are measured by the amounts earned during the year. In the Governmental Funds, however, expenditures for these items are measured by the amounts of financial resources used (essentially, the amounts actually paid). The increase in the liabilities for the fiscal year was: (56,165)

Repayment of bond and note principal is an expenditure in the Governmental Funds, but it reduces long-term liabilities in the Statement of Net Assets and does not affect the Statement of Activities. Bond and note payments during the current fiscal year were: 1,405,946

Interest on long-term debt in the Statement of Activities differs from the amount reported in the Governmental Funds because interest is recorded as an expenditure in the funds when it is due, and thus requires the use of current financial resources. In the Statement of Activities, however, interest expense is recognized as the interest accrues, regardless of when it is due. The additional interest reported in the Statement of Activities is the net result of two factors: accrued interest on bonds and notes payable. The increase in the liability for the fiscal year was: 17,344

Governmental Funds report capital outlays as expenditures. However, in the Statement of Activities, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. In the current period, these amounts were:

Capital outlay	8,762,193
Depreciation expense	<u>(5,064,889)</u>

Excess of depreciation expense over capital outlay	3,697,304
--	-----------

Proceeds from sale of assets	(70,210)
Gain on disposal of assets	<u>36,096</u>

Excess of proceeds over the gain on disposal	(34,114)
--	----------

Change in net assets of governmental activities (Statement of Activities)	<u>\$ (2,226,150)</u>

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Notes to Financial Statements

NATURE OF ORGANIZATION

Reporting Entity

On July 1, 1987, the Energy, Minerals, and Natural Resources Department (Department) was formed by NMSA Section 95A-1 through 95A-7, 1978 Compilation. The basic function of the Department is to maintain responsibility for the protection, preservation and proper utilization of extractive and renewable resources residing within the state. These include, but are not limited to, petroleum, natural gas, coal, uranium, potash, timber, soils and wildlife. The Department administers programs directed toward the promotion of energy conservation, outdoor recreation and natural resources planning. The Department does not have any component units.

The chief executive of the Department is the Secretary, who is appointed by the Governor of New Mexico and is a member of the Governor's cabinet. The Department is a component unit of the executive branch and these financial statements include all funds, account groups and activities over which the Department Secretary has oversight responsibility.

The Department is not included in any other governmental "reporting entity" as defined in Section 2100, *Codification of Governmental Accounting and Financial Reporting Standards*. Even though the Department Secretary is appointed by the Governor, that person has decision-making authority, the power to designate management, the responsibility to significantly influence operations and primary accountability for fiscal matters.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements for the Department have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP), as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the standard-setting body for governmental accounting and financial reporting. Pronouncements of the Financial Accounting Standards Board (FASB) issued after November 30, 1989, are not applied in the preparation of the financial statements of the proprietary fund type in accordance with GASB No. 20. The GASB periodically updates its codification of the existing Governmental Accounting and Financial Reporting Standards, which, along with subsequent GASB pronouncements (Statements and Interpretations), constitutes GAAP for governmental units. The more significant of these accounting policies are described below.

In June 1999, the GASB unanimously approved GASB No. 34, *Basic Financial Statements and Management Discussion and Analysis for State and Local Governments*. This statement provides for the most significant change in financial reporting in over 20 years and is scheduled for a phased implementation based on size of government. The Department has implemented the provisions of GASB No. 34. As a part of this statement, there is a reporting requirement regarding the local government's infrastructure (road, bridges, etc.) The Department does not own any infrastructure assets and, therefore, is unaffected by this requirement.

STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT

Notes to Financial Statements - continued

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

• **Financial Reporting Entity - GASB Statement #34**

The basic financial statements include both government-wide (based on the Department as a whole) and fund financial statements. The new reporting model focus is on either the Department as a whole or major individual fund (within the fund financial statements). Both the government-wide and fund financial statements (within the basic financial statements) categorize primary activities as governmental activities. In the government-wide Statement of Net Assets, the governmental activities column is presented on a consolidated basis by column, and is reflected on a full accrual, economic resources basis, which incorporates long-term assets and receivables as well as long-term debt and obligations.

The government-wide Statement of Activities reflects both the gross and net cost per functional category, which are otherwise being supported by general government revenues. The Statement of Activities reduces gross expenses (including depreciation) by related program revenues, operating and capital grants. The program revenues must be directly associated with the function. The Department includes only one function (general government). Inter-fund balances have been eliminated in the government-wide financial statements.

The net cost (by function) is normally covered by general revenues (intergovernmental revenues, interest income, etc). Historically, the previous model did not summarize or present net cost by function or activity. The Department does not currently employ indirect cost allocation systems.

This government-wide focus is more on the sustainability of the Department as an entity and the change in aggregate financial position resulting from the activities of the fiscal period.

The fund financial statements are similar to the financial statements presented in the previous accounting model. Emphasis here is on the major fund in the governmental category.

The governmental fund statements are presented on a current financial resource and modified accrual basis of accounting. This presentation is deemed appropriate to (a) demonstrate legal compliance, (b) demonstrate the source and use of liquid resources, and (c) demonstrate how the Department actual experience conforms to the budget or fiscal plan. Since the governmental fund statements are presented on a different measurement focus and basis of accounting than the government-wide statements' governmental column, a reconciliation is presented on the page following each statement, which briefly explains the adjustment necessary to transform the fund based financial statements into the governmental column on the government-wide presentation.

The Department's fiduciary fund (agency funds) is presented in the fund financial statements. Since by definition these assets are being held for the benefit of a third party and cannot be used to address activities or obligations of the government, these funds are not incorporated in the government-wide statements.

STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT

Notes to Financial Statements - continued

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

• **Financial Reporting Entity - GASB Statement #34 - continued**

The Department is a “department” of the State of New Mexico and will be included in any statewide comprehensive Annual Financial Report. In accordance with the criteria set forth in GASB #14 for determining component units, the Department does not have any component units.

When an expense is incurred for purposes for which both restricted and unrestricted net assets are available, the Department first uses restricted resources, then unrestricted resources.

• **Basis of Presentation - Fund Accounting**

The accounts of the Department are organized on the basis of funds and account groups, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, liabilities, fund balance, revenues and expenditures. The various funds are summarized by type in the accompanying financial statements. The following fund types and account groups are used by the Department:

Governmental Funds - All governmental fund types are accounted for on a spending or financial flow measurement focus. Only current assets and current liabilities are generally included on their balance sheets. Their reported fund balance (net current assets) is considered a measure of available spendable resources. Governmental fund operating statements present increases (revenues and other financing sources) and decreases (expenditures and other financing uses) in net current assets. Accordingly, they are said to present a summary of sources and uses of available spendable resources during a period.

Due to their spending measurement focus, expenditure recognition for governmental fund types is limited to exclude amounts represented by noncurrent liabilities. Since they do not affect net current assets, such long-term amounts are not recognized as governmental fund type expenditures or fund liabilities. However, they are reported as liabilities in the general long-term debt account group.

The major governmental funds presented in these financial statements include the General Fund, the Emergency Fire Disaster Fund and the Capital Projects General Fund/STB Fund.

General Fund- Fund No. 19900 - The General Fund is the operating fund of the Department. It is used to account for all operating activities of the Department, except those requiring other governmental fund types. It is funded primarily through the State of New Mexico Appropriations Act. Included in the General Fund are:

Energy Efficiency - reverting
Forestry - reverting
Mine Reclamation Program - reverting

Energy Conservation and Management Division

Petroleum Violation Escrow Funds - 31000, 31400, 31500, 31600, 31700, 31800.

Petroleum Violation Escrow Funds (non-reverting) were established to account for the State of New Mexico's proportionate share of the Petroleum Violation Escrow Funds (oil overcharge monies) pursuant to the 1983 Further Continuing Appropriations Act, Public Law No. 970-377, enacted on December 20, 1982. Funds received are to be utilized for the purpose of funding energy conservation projects in public and nonpublic schools and hospitals in New Mexico, for promoting the introduction of solar energy measures to residential buildings through reduction of interest rates charged by banks, and for demonstrating and promoting energy conservation technology to residences and small businesses. The Department has special revenue funds for the following petroleum violation escrow accounts: Exxon, Diamond Shamrock, Stripper Well, Warner, Second Stage and Chevron.

Energy Efficiency Assessment Revolving Fund – 20150.

The Energy Efficiency Assessment Revolving Fund (non-reverting) was established in accordance with Section 6, Chapter 171, Laws of 2007. The fund consists of appropriations, gifts, grants, donations and bequests made to the fund and reimbursements of costs incurred by the Department in performing energy efficiency assessments pursuant to the Energy Efficiency and Renewable Energy Bond Act. Income from the fund is credited to the fund and money in the fund at year end is not revertible and nontransferable to any other fund.

STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

• Basis of Presentation - Fund Accounting - continued

Special Revenue Funds - continued

Oil Conservation Division

Oil Reclamation Fund - 31100. The Oil Reclamation Fund (non-reverting), established in accordance with Section 70-2-37, NMSA, 1978 Compilation, provides funds for the plugging of dry and abandoned oil wells. The fund was originally allocated a percentage of the oil conservation tax. The tax revenues are used to award performance contracts to independent contractors.

Forestry Division

Emergency Fire Disaster Fund - 21300. The Emergency Fire Disaster Fund (reverting) was established in accordance with Section 68-2-18, NMSA, 1978 Compilation, to account for the operations of the State Forestry and Resources Division in the execution of emergency fire suppression. This is funded from the Governor's contingency fund. This is a major fund of the Department.

Forest Land Protection Fund - 32200. The Forest Land Protection Fund (non-reverting) was established in accordance with Section 68-2-28, NMSA, 1978 Compilation.

Conservation Planting Revolving Fund - 32100. The Conservation Planting Revolving Fund (non-reverting) was established in accordance with Section 68-2-21, NMSA, 1978 Compilation, to account for the collection and payment to the State's general fund of the proceeds from the sale of tree seedlings to New Mexican landowners for conservation plantings.

Inmate Work Camp Fund - 95600. The Inmate Work Camp Fund (non-reverting) was established in accordance with Section 33-13-1 to 33-13-8, NMSA, 1978 Compilation, to provide inmate labor for natural resource work planned by the forestry division.

State Parks Division

Parks Fund - 20010. The Parks Fund (non-reverting) was established to account for monies derived from the operation of state park and recreation areas or from governmental gross receipts tax distributions pursuant to Section 70106.38 NMSA 1978 appropriated to the Department.

Motor Boat Fuel Tax Fund - 30900. The Motor Boat Fuel Tax Fund (non-reverting) was established in accordance with Section 16-2-19.1, NMSA, 1978 Compilation, to account for ongoing financing, construction and maintenance for motor boat facilities throughout the State. Financing is provided through distribution of gasoline taxes.

Natural Lands Protection Fund - 20000. The Natural Lands Protection Fund (non-reverting) was established to provide funds for the purpose of acquiring land representing the State's commitment to the proposed Petroglyph National Monument located in Bernalillo Department. This appropriation is contingent upon the following provisions: (1) the federal government designating the proposed petroglyph site a national monument; (2) the City of Albuquerque providing funds equal to this appropriation; and (3) the Department entering into a joint powers agreement with the City of Albuquerque in order for the City of Albuquerque to acquire lands necessary for the State's portion of the proposed Petroglyph National Monument.

Mining and Minerals Division

Abandoned Mine Reclamation Fund - 65600. The Abandoned Mine Reclamation Fund (non-reverting) was established in accordance with Section 69-25B-4, NMSA, 1978 Compilation, to retain a portion of the reclamation fees collected in an interest-bearing account to be used after August 3, 1992, for abandoned mine and land reclamation projects.

Surface Mining Penalty Fund - 32000. The Surface Mining Penalty Fund (non-reverting) was established in accordance with Section 69-25A-22, NMSA, 1978 Compilation, as an escrow account for penalties assessed under the Surface Mining Act, which are contested by persons charged with violations of the Act. Proposed penalty amounts are deposited to this fund until the penalty case is adjudicated, at which time such amounts are transferred to the Surface Mining Permit Fees Fund or returned to the depositor.

Surface Mining Permit Fees Fund - 31900. The Surface Mining Permit Fees Fund (non-reverting) was established in accordance with Section 69-25A-10, NMSA, 1978 Compilation, to account for fees accompanying applications for surface coal mining

and reclamation permits pursuant to the Surface Mining Act. Fees collected are appropriated for expenditures in the General Fund for administration of the Surface Mining Act.

New Mexico Mining Act Fund - 56600. The New Mexico Mining Act Fund (non-reverting) was established in accordance with Section 69-36-1, NMSA, 1978 Compilation, to promote responsible utilization and reclamation of lands affected by exploration, mining or the extraction of minerals that are vital to the welfare of New Mexico.

New Mexico Mining Act Penalty Fund - 73100. The New Mexico Mining Act Penalty Fund (non-reverting) was established in accordance with Section 69-36-19, NMSA, 1993, to establish a fund in order to properly deposit fines and penalties collected per the act.

Office of the Secretary

Youth Conservation Corps - 01400. The Youth Conservation Corps (YCC) fund (non-reverting) was established in accordance with Section 9-SB-1, NMSA, 1978 Compilation, to provide a process to employ young persons in projects to conserve New Mexico's natural resources and provide community benefits of lasting value. The monies are received according to the Laws of 1994, Chapter 145, which states that, "A distribution pursuant to Section 7-1-6.1 NMSA 1978 shall be made to the Energy, Minerals, and Natural Resources Department in an amount equal to 25% of the net receipts attributable to the governmental gross receipts tax. 40% of the distribution is appropriated to the Department to implement the provisions of the New Mexico Youth Conservation Corps Act, and 60% of the distribution is appropriated to the Department for state park and recreation area capital improvements, including the costs of planning, engineering, design, construction, renovation, repair, equipment and furnishings."

Capital Projects Funds - Capital Projects Funds are used to account for financial resources to be used for the acquisition or construction of major capital facilities.

STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT

Notes to Financial Statements - continued

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

- Basis of Presentation - Fund Accounting - continued

Capital Project Funds - continued

Park and Recreation Division

EMNRD Capital Projects - 64600. The EMNRD Capital Projects - GGRT Fund (non-reverting) was established by law to account for financing resources to be used for improving roads; purchasing equipment; and developing, improving and acquiring capital facilities. This fund is financed by governmental gross receipts taxes and federal funds.

EMNRD Capital Projects GF/STB - 50900. The EMNRD Capital Projects Fund (non-reverting) was established to account for financing resources to be used for the acquisition of capital assets as outlined by state law. The fund was created pursuant to Laws of 1995 and is funded primarily by state general fund appropriations and debt issuances of severance tax bonds. This is a major fund of the Department.

Debt Service Fund - 30000 - The Debt Service Fund is used to account for financial resources set aside to meet current and future debt service requirements as required by the 1995A and 1995B Series bond issuances, 1996A and 1996B Series bond issuances, 1997A and 1997B Series bond issuances, 1998A and 1998B Series bond issuances and 2001 Series bond issuances.

Fiduciary Funds - Fiduciary Funds include trust and agency funds, which are used to account for assets held by the Department in the capacity of trustee or agent for individuals, private organizations, other governmental entities and/or other funds. These funds are custodial in nature (assets equal liabilities) and do not involve measurement of results of operations.

Boat Suspense Fund - 77300-521. The Boat Suspense Fund (non-reverting) was established by Statute 66-12-6.1H NMSA 1978, Annotated. An excise tax is imposed upon the sale of every boat required to be registered in the state. All taxes collected under the provision of this section shall be paid to the State Treasurer for credit to the "boat suspense fund" hereby created. At the end of each month, the State Treasurer shall transfer 50% of the excise tax collections in the boat suspense fund to the Department, and the balance to the state general fund. The amounts transferred to the Department are appropriated for use by the Department for improvements and maintenance of lakes and boating facilities owned by the state and for administration and enforcement of the Boat Act.

Fiduciary Funds - continued

Governmental Gross Receipts Tax Suspense Fund - 77400. The Governmental Gross Receipts Tax Suspense Fund (non-reverting) was established by Chapter 08, Laws of 1991. The Governmental Gross Receipts Tax Act, effective July 1, 1991, Section 7-9-4.1 NMSA 1978, states in pertinent part that “For the privilege of engaging in certain activities by governments, there is imposed on the State of New Mexico and any agency, institution, instrumentality or political subdivision... an excise tax of 5% of governmental gross receipts.”

To account for the governmental gross receipts tax the agency must pay, the agency established the GGRT fund. Transferred to the fund from the operating fund are monies that represent 5% of the collections for seedling sales and for admissions and campsite rentals at the various state parks. Payments of the governmental gross receipts tax to the TRD are effected through state warrants.

Soil & Water Equipment Fund - 77500. The Soil and Water Equipment Fund (non-reverting) was established by Chapter 137, Laws of 1965. Section 24 states, “the sum of twenty thousand dollars (\$20,000) is appropriated to the Soil and Water Conservation committee from the Soil Conservation Guaranty Fund, specifically to carry out this purpose of the Soil and Water Conservation District Act: the purchasing of equipment for resource development districts whose credit requires the guaranty of the committee. This appropriation shall not revert after any term to any other governmental fund.”

Oil Disposition Holding Fund - 89100. The Oil Disposition Holding Fund (non-reverting) was established by the Oil and Gas Proceeds Payment Act contained in sections 70-10-1 to 70-10-6 to hold funds until parties who have claim to these monies have been determined.

• Basis of Accounting

The government-wide and fiduciary fund financial statements are reported using the economic resources measurement focus. The government-wide financial statements are reported using the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place. Non-exchange transactions, in which the Department gives (or receives) value without directly receiving (or giving) equal value in exchange, include gross receipts taxes, grants and appropriations. On an

STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT

Notes to Financial Statements - continued

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

- **Basis of Accounting – continued**

accrual basis, revenue from gross receipts taxes is recognized in the fiscal year for which the taxes are collected. Revenue from grants and appropriations is recognized in the fiscal year in which all eligibility requirements have been satisfied.

Amounts reported as program revenues include: 1) charges to customers or applicants for goods, services or privileges provided; 2) operating grants and contributions; and 3) capital grants and contributions. Internally dedicated resources are reported as general revenues rather than program revenues. Likewise, general revenues include all taxes.

Governmental fund types follow the modified accrual basis of accounting for financial statement purposes. Under the modified accrual basis of accounting, revenues and other governmental fund financial resource increments are recognized in the accounting period in which they become susceptible to accrual - that is, when they become both measurable and available to finance expenditures of the fiscal period (available meaning collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period, typically 60 days, and 9 months for Federal Revenue).

Revenues from grants that are restricted for specific uses are recognized as revenues and as receivables when the related costs are incurred. Interest earned is accrued currently by the appropriate funds. Contributions, gross receipts tax and other monies held by other state and local agencies are recorded as a receivable at the time the money is made available to the specific fund. All other revenues are recognized when they are received and are not susceptible to accrual.

Expenditures, other than vacation, compensatory and sick pay, are recorded when they are incurred. Expenditures charged to federal programs are recorded utilizing the cost principles prescribed or permitted by the various funding sources. Interest expense is recognized when paid. Total interest expense incurred during the year ended June 30, 2008, was \$860,462.

- **Federal Grants Receivable (Deferred Revenue)**

Various reimbursement procedures are used for federal awards received by the Department. Consequently, timing differences between expenditures and program reimbursements can exist at any time during the fiscal year. Receivable balances at fiscal year end represent an excess of modified accrual basis expenditures over cash reimbursements received to date. Conversely, deferred revenue balances represent an overdraw of cash (advances) in excess of modified accrual basis expenditures. Generally, receivable or deferred balances caused by differences in the timing of cash reimbursements and expenditures will be reversed in the remaining grant period.

STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT

Notes to Financial Statements - continued

1. **SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued**

- **Reservations and Designations**

The accounting for actual revenue and expenditures for budgetary purposes beginning July 1, 2004, were changed to the modified accrual method of accounting from the budgetary non-accrual basis of accounting. In conjunction with this change in the basis of accounting, encumbrances are no longer reflected in the expenditures of the Statement of Revenues, Expenditures and Changes in Fund Balance - Budget and Actual, beginning July 1, 2004.

Reservations of fund balance are created to either (1) satisfy legal covenants that require that a portion of the fund balance be segregated, or (2) identify the portion of the fund balance that is not appropriated for future expenditures. Under the guidance provided by the Office of the State Auditor - Audit Rule - 2.2.2.12 A (5) (a), (b) NMAC 2005, encumbrances are to be reflected as a reservation of fund balance but are not to be reflected as restricted fund balance in the governmental-wide financial statements. Specific reservations of fund balance accounts are summarized below:

Reserved for special monies - These reserves were created to restrict the use of all resources contributed to or earned by these funds through laws created by the State legislature.

- **Budgets and Budgetary Accounting**

The state Legislature makes annual appropriations to the Department. Annual appropriations lapse at fiscal year end unless otherwise specified in the legislation. Legal compliance is monitored through the establishment of a budget (modified accrual) and a financial control system that permits a budget to actual expenditure comparison. Expenditures may not legally exceed appropriations for each budget at the category level. Budgeted category amounts may be amended upon approval from the Budget Division of the State of New Mexico Department of Finance and Administration (DFA) within the limitations as specified in the General Appropriations Act.

The budgetary legal authorization to incur obligations is on a basis that differs from the basis of accounting required by accounting principles generally accepted in the United States of America (GAAP). Significant differences between the budgetary basis and GAAP include the following:

The budget is adopted on a modified accrual basis of accounting that is consistent with generally accepted accounting principles (GAAP). This change was implemented with the Laws of 2004, Chapter 114, Section 3, paragraph N and paragraph O. This change is effective for fiscal years beginning July 1, 2004. In prior years, the budgetary basis of accounting was not considered a GAAP basis of accounting. There remains a difference, however, between the budgetary basis and the GAAP presentation which is a result of receipts in prior years and payments made in the current year on outstanding prior year encumbrances. Budgetary

STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT

Notes to Financial Statements - continued

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

- **Budgets and Budgetary Accounting - continued**

comparisons presented in the financial statements are now presented on a basis which is consistent with generally accepted accounting principles (GAAP).

- **Interfund and Interagency Transactions**

During the year, the Department makes various transfers of monies to fund debt service payments, capital projects and to reimburse the General Fund for costs incurred on behalf of other funds. Transfers which, because of budgetary or legal restrictions, must be expended by funds other than the fund initially receiving the revenue, are recorded as operating transfers in (out) under the other financing sources (uses) category.

- **Modified Accrual**

In applying the “susceptible to accrual” concept to intergovernmental revenues pursuant to Governmental Accounting Standards Board Statement No. 33 (GASB 33), *Accounting and Financial Reporting for Nonexchange Transactions*, the provider should recognize liabilities and expenses and the recipient should recognize receivables and revenues when the applicable eligibility requirements, including time requirements, are met. Resources transmitted before the eligibility requirements are met, under most circumstances, should be reported as advances by the provider and deferred revenue by the recipient.

- **Capital Assets**

Capital assets are recorded at historical cost and depreciated over their estimated useful lives (with no salvage value). Donated capital assets are recorded at their estimated fair value at the date of donation. Additions, improvements and other capital outlays exceeding \$5,000 that significantly extend the useful life of an asset are capitalized per Section 12-6-10 NMSA 1978. Other costs incurred for repairs and maintenance are expensed as incurred.

Estimated useful life is management’s estimate of how long the asset is expected to meet service demands. Straight-line depreciation is used based on the following estimated useful lives in years:

Land improvements	20
Buildings and building improvements	25
Furniture and equipment	5 - 10
Vehicles	5

The Department capitalizes computer software, whether purchased or developed internally, in accordance with guidelines provided by the GSD Rule NMAC Chapter 20, Part 1, Sections 2.20.1.9C(5) and 2.20.1.10C, and FASB 86 accounting principles. Museum acquisitions are considered inexhaustible assets and therefore are not deferred.

STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT

Notes to Financial Statements - continued

1. **SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued**

- **Reserve for Subsequent Years' Expenditure**

Reserve for subsequent years' expenditure represents the portions of the fund balance that are legally segregated for specific future uses.

- **Compensated Absences**

The Department accounts for the accumulated vacation leave on the accrual basis in accordance with GASB 16. Accrued vacation up to 240 hours is recorded in the Statement of Net Assets at 100% of the employee's hourly wage. In addition, accrued sick leave over 600 and up to 720 hours less the amount classified as current is recorded in the Statement of Net Assets at 50% of the employee's hourly wage. Compensatory time is accrued at a rate of one and one-half hours for each hour of employment for which overtime compensation is required for those employees covered by the Fair Labor Standards Act (FLSA). Employees exempt from coverage by FLSA earn one hour of compensatory time for each overtime hour. The accrual for compensated absences is calculated at pay rates in effect at June 30, 2008, and includes direct and incremental salary related payments, such as the employees' share of social security taxes.

- **Short-Term Debt**

The Department did not have any short-term debt activity during the year.

- **Use of Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

- **Risk Management**

The Department, as a "State Agency" defined in the New Mexico Tort Claims Act, is insured through the Risk Management Division of the State of New Mexico. The Department pays annual premiums to the Risk Management Division for coverage provided in the following areas:

- Liability and civil rights protection for claims made by others against the State of New Mexico.
- Coverage to protect the State of New Mexico's property and assets.
- Fringe benefit coverage for State of New Mexico employees.

At June 30, 2008, the Department had no claims that the Risk Management Division has returned as not covered that would become the responsibility of the Department.

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Notes to Financial Statements - continued

2. PVE FUND GRANT EXPENDITURES

Various grant programs allocate expenditures to the Petroleum Violation Escrow (PVE) accounts included as cost centers in the General Fund and as Special Revenue Funds. These expenditures are included in the General Fund and within the Combined Special Revenue Funds. However, these expenditures have not been included within the accompanying Supplemental Schedule of Expenditures of Federal Awards because of the unique nature of these funds. Revenues included in the PVE Funds are derived from interest earned on deposits with the State Treasurer recorded as Other State Funds and federal draw downs from the U.S. Department of Energy. During the current fiscal year, the PVE accounts did not incur any expenditures.

3. CASH DEPOSIT ACCOUNTS AND INVESTMENTS

Cash, other than petty cash, is deposited by the Department into its accounts with the State Treasurer and is pooled and invested by the State Treasurer. The Department is required by statute to deposit any money received into the State Treasury. The State Treasurer issues separate financial statements, which disclose the collateral pledged to secure these deposits, the categories of risk involved, and the market value of purchased investments, which may differ from the cash deposited by the Department.

Other bank accounts are used by the Department to deposit revenue from its various locations in order to transfer the funds into its accounts with the State Treasurer. The Department's investments are held by agents of the Department in the Department's name. All funds deposited at financial institutions were fully insured by the Federal Deposit Insurance Corporation up to \$100,000 at June 30, 2008.

The Bank of Albuquerque repurchase agreements are held in trust for the 1995, 1996, 1997, 1998, 2001 and 2003 Series bonds received from the New Mexico Finance Authority. State law requires that repurchase agreements be secured by collateral with a market value greater than 102% of the value of the agreement.

Cash balances at June 30, 2008 consisted of cash invested with and confirmed by the State Treasurer. In general, state statutes require that all deposits held by the State Treasurer be collateralized at a minimum level of 50%. The State Treasurer is in compliance with this requirement. The State Treasurer issues separate financial statements, which disclose the collateral pledged to secure these deposits, categories of risk involved and the market value of purchased investments, which may differ from the cash deposited by the Department (refer to Schedule 3 – Pledged Collateral and Schedule 2 – Schedules of Cash Accounts.) All pledged securities for the Department are held in the name of the New Mexico State Treasurer by the Federal Home Loan Bank of Dallas Texas, an independent custodian. Custodial credit risk is the risk that, in the event of failure of the counterparty, the Department will not be able to recover the value of its cash that is in the possession of an outside party. The Department's cash balances are exposed to custodial credit risk of \$19,377,010.

Notes to Financial Statements - continued

6. LONG-TERM DEBT - continued

Typically, the General Fund has been used to liquidate other long-term liabilities.

There is a long-term obligation of \$1,059,000 resulting from federal loan proceeds received to fund construction of recreational facilities at Brantley Reservoir, which was completed during 1992. The funding was provided by the Bureau of Reclamation and created through Federal Contract No. 7-07-57-X0888. A base amount of \$914,500 plus 50% of federal funds received by the state in excess of \$914,500 will be repaid to the federal government. The other 50% in excess of this amount has been recognized as federal revenue. Repayment is scheduled over a fifty-year period with annual payments of \$69,473 or the state's annual revenues from entrance and user fees, whichever is less.

The terms of repayment as of June 30, 2008, are as follows:

	Principal Balance	Interest Rate
\$	914,500	5.116%
	144,500	9.92%
\$	<u>1,059,000</u>	

The annual payments will be applied first to the obligation in excess of \$914,500 and then to the \$914,500 base amount. Interest expense for the current fiscal year was \$61,874.

Maturities of the debt for the following five years and thereafter are as follows:

<u>Year Ended June 30,</u>	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
2009	\$ 8,353	61,120	69,473
2010	9,181	60,292	69,473
2011	10,092	59,381	69,473
2012	11,093	58,380	69,473
2013	12,194	57,279	69,473
2014 - 2018	81,699	265,666	347,365
2019 - 2023	121,586	225,779	347,365
2024 - 2028	156,734	190,631	347,365
2029 - 2033	201,145	146,220	347,365
2034 - 2038	258,139	89,226	347,365
2039 - 2041	188,784	19,637	208,421

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Notes to Financial Statements - continued

6. LONG-TERM DEBT - continued

During the 1996 fiscal year, Parks and Recreation Division issued series 1995A and 1995B Series bonds. These bonds were issued in accordance with 16-2-21 NMSA 1978, "State Park and Recreation Bond Act". These bonds were issued to provide for the acquiring, developing, operating and maintaining of state parks and recreation areas. Series 1995A was issued for \$3,330,000 and Series B for \$333,000, with a total issuance cost of \$77,348. The 1995A bond series were paid off in the prior year with the 1995/1996 Series A bond issue. These bonds are pledged to be repaid by Parks and Recreation Division's share of governmental gross receipts tax. Interest rates on the series vary from 3 to 6%. The issuances require a reserve of \$285,365 to be maintained in a debt service fund. Interest expense for the current fiscal year was \$4,310. The current portion of long-term debt is \$18,152.

Maturities of the bond issuances for the next five years and thereafter are as follows:

<u>Year Ended June 30,</u>	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
Series B:			
2009	\$ 18,152	3,825	21,977
2010	18,697	3,326	22,023

6. LONG-TERM DEBT - continued

During the 1997 fiscal year, Parks and Recreation Division issued series 1996A and 1996B Series bonds. These bonds were issued in accordance with 16-2-21 NMSA 1978, "State Park and Recreation Bond Act". These bonds were issued to provide for the acquiring, developing, operating and maintaining of state parks and recreation areas. Series 1996A was issued for \$3,510,000 and Series 1996B for \$390,000, with issuance costs of \$75,250. The 1996A bond series were paid off in the prior year with the 1995/1996 Series A bond issue. Parks and Recreation Division's share of governmental gross receipts tax is pledged to repay these bonds. Interest rates on the 1996 series bonds vary from 3 to 6%. The issuances require a reserve of \$296,100 to be maintained in the debt service fund. Interest expense for the current fiscal year was \$5,613. The current portion of long-term debt is \$20,694.

Maturities of the bond issuances for the next five years and thereafter are as follows:

<u>Year Ended June 30,</u>	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
Series B:			
2009	\$ 20,694	5,060	25,754

10. SPECIAL APPROPRIATIONS AND GOVERNOR'S EXECUTIVE ORDERS

The Governor issued executive orders during the 2008 fiscal year to fund the Emergency Fire Disaster Program (21300). Any unexpended or unencumbered amounts revert in the subsequent fiscal year. The Department requested and received \$9,750,000 during the 2008 fiscal year.

11. PENSION PLAN – PUBLIC EMPLOYEES RETIREMENT ASSOCIATION

• **Plan Description**

Substantially all of the Department's full-time employees participate in a public employee retirement system authorized under the Public Employees Retirement Act (Chapter 10, Article 11, NMSA 1978). The Public Employees Retirement Association (PERA) is the administrator of the plan, which is a cost-sharing multiple-employer defined benefit retirement plan. The plan provides for retirement benefits, disability benefits, survivor benefits and cost-of-living adjustments to plan members and beneficiaries. PERA issues a separate, publicly available financial report that includes financial statements and required supplementary information for the plan. That report may be obtained by writing to PERA, P.O. Box 2123, Santa Fe, NM 87504-2123. The report is also available on PERA's website at www.pera.state.nm.us.

• **Funding Policy**

Plan members are required to contribute 7.42% of their gross salary. The Department is required to contribute 16.59% of the gross covered salary. The contribution requirements of plan members and the Department are established in State statute under Chapter 10, Article 11, NMSA 1978. The requirements may be amended by acts of the legislature. The Department's contributions to PERA for the fiscal years ending June 30, 2008, 2007 and 2006 were \$3,213,778, \$2,969,946, and \$2,811,976, respectively, which equal the amount of the required contributions for each fiscal year.

12. POST-EMPLOYMENT BENEFITS – STATE RETIREE HEALTH CARE PLAN

• **Plan Description**

The Department contributes to the New Mexico Retiree Health Care Fund, a cost-sharing multiple-employer defined benefit postemployment healthcare plan administered by the New Mexico Retiree Health Care Authority (RHCA). The RHCA provides health care insurance and prescription drug benefits to retired employees of participating New Mexico government agencies, their spouses, dependents, and surviving spouses and dependents. The RHCA Board was established by the Retiree Health Care Act (Chapter 10, Article 7C, NMSA 1978). The Board is responsible for establishing and amending benefit provisions of the healthcare plan and is also authorized to designate optional and/or voluntary benefits like dental, vision, supplemental life insurance, and long-term care policies.

Eligible retirees are: 1) retirees who make contributions to the fund for at least five years prior to retirement and whose employer during that period of time made contributions as a participant in the RHCA plan on the person's behalf unless that person retires before the employer's RHCA effective

• **Plan Description - continued**

date, in which the event the time period required for employee and employer contributions shall become the period of time between the employer's effective date and the date of retirement; 2) retirees defined by the Act who retired prior to July 1, 1990; 3) former legislators who served at least two years; and 4) former governing authority members who served at least four years.

The RHCA issues a publicly available stand-alone financial report that includes financial statements and required supplementary information for the postemployment healthcare plan. That report and further information can be obtained by writing to the Retiree Health Care Authority at 4308 Carlisle NE, Suite 104, Albuquerque, NM 87107.

• **Funding Policy**

The Retiree Health Care Act (Section 10-7C-13 NMSA 1978) authorizes the RHCA Board to establish the monthly premium contributions that retirees are required to pay for healthcare benefits. Each participating retiree pays a monthly premium according to a service based subsidy rate schedule for the medical plus basic life plan plus an additional participation fee of five dollars if the eligible participant retired prior to the employer's RHCA effective date or is a former legislator or former governing authority member. Former legislators and governing authority members are required to pay 100% of the insurance premium to cover their claims and the administrative expenses of the plan. The monthly premium rate schedule can be obtained from the RHCA or viewed on their website at www.nmrhca.state.nm.us.

The Retiree Health Care Act (Section 10-7C-15 NMSA 1978) is the statutory authority that establishes the required contributions of participating employers and their employees. The statute requires each participating employer to contribute 1.3% of each participating employee's annual salary; each participating employee is required to contribute .65% of their salary. Employers joining the program after 1/1/98 are also required to make a surplus-amount contribution to the RHCA based on one of two formulas at agreed-upon intervals.

The RHCA plan is financed on a pay-as-you-go basis. The employer, employee and retiree contributions are required to be remitted to the RHCA on a monthly basis. The statutory requirements for the contributions can be changed by the New Mexico State Legislature.

The Department's contributions to the RHCA for the years ended June 30, 2008, 2007 and 2006 were \$247,291, \$231,700 and \$222,330, respectively, which equal the required contributions for each year.

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Notes to Financial Statements - continued

13. OPERATING LEASE COMMITMENT

The Department leases certain equipment and premises under numerous operating leases. Leases are subject to future appropriation and as such are cancelable by the Department at the end of a fiscal year. Rental expense for the year ended June 30, 2008, was \$330,037.

The following is a schedule by years of future minimum lease payments required under operating leases that have initial or remaining non-cancelable terms in excess of one year as of June 30, 2008.

Years ending June 30:	<u>Lease Amounts</u>
2009	\$ 137,824
2010	143,172
2011	142,237
Thereafter	<u> -</u>
	<u>\$ 423,233</u>

14. CONTINGENT LIABILITIES (CLAIMS AND JUDGMENTS)

The Department, as a State Agency defined in the New Mexico Tort Claims Act, is insured through the Risk Management Division of the General Services Department of the State of New Mexico. The Office of Risk Management Division pays annual premiums for coverage provided in the following areas:

- Liability and civil rights protection for claims made by others against the State of New Mexico;
- Coverage to protect the State of New Mexico's property and assets; and
- Fringe benefit coverage for State of New Mexico employees.

In the case of civil actions or claims against the Department for financial damages, the Department's certificate of insurance with Risk Management does not cover claims for back wages but does cover civil rights claims for other compensatory damages.

The Department is involved in legal actions arising from the ordinary course of operations. With respect to these legal actions, the Department believes that a loss is probable, but can now be reasonably estimated. The possible loss is determined to be between \$30,000 and \$210,000.

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Notes to Financial Statements - continued

15. UNRESERVED - UNDESIGNATED FUND BALANCE (DEFICIT)

The unreserved - undesignated fund balance (deficit) for the general fund is the component of the fund balance that represents the portion of the encumbrances for which revenue has not been recorded on a modified accrual basis.

16. RISK MANAGEMENT

The Department is exposed to various risks of loss for which the Department carries insurance with the State of New Mexico Risk Management Division (i.e., auto, employee fidelity bond, general liability, civil rights and foreign jurisdiction, money and securities, property and workers' compensation).

17. FUND BALANCE AND NET ASSET RESTATEMENTS

The 2007 financial statements were issued with fund balances in the Emergency Fire Disaster Fund understated by \$98,064, due to revenue that was not properly recognized. As a result of this error, beginning fund balances were restated as follows:

Fund balance as originally reported, June 30, 2007	\$ 6,312,074
Restatement	<u>98,064</u>
Fund balance, July 1, 2007, restated	\$ <u>6,410,138</u>

The 2007 financial statements were issued with fund balances in the State Parks Fund overstated by \$121,021, due to expenditures that were not properly recognized. As a result of this error, beginning fund balances were restated as follows:

Fund balance as originally reported, June 30, 2007	\$ 4,305,877
Restatement	<u>(121,021)</u>
Fund balance, July 1, 2007, restated	\$ <u>4,184,856</u>

The 2007 financial statements were issued with net assets understated by \$1,872,828, due to the following reasons:

Overstatement in fund balances (described above)	\$ (22,957)
Expenses related to capital projects that were not capitalized as Projects in Process	1,769,558
Math error in Statement of Net Assets	<u>5,206</u>
	\$ <u>1,751,807</u>

Schedule 3 - continued

Supplemental Schedule of Bank Accounts - continued

YEAR ENDED JUNE 30, 2008

Agency	<u>Accounts at State Treasurer</u>	<u>Bank of Albuquerque</u>	<u>All Other Banks</u>
Total amount of deposit	\$ 38,754,019	2,918,913	661,399
Less FDIC	-	-	(661,399)
Total uninsured public money	38,754,019	2,918,913	-
50% collateral requirement (A)	19,377,010	-	-
102% repurchase agreements collateral requirement (B)	-	<u>2,977,291</u>	-
Total pledged	<u>(19,377,010)</u>	<u>(2,977,291)</u>	-
Over (under) pledged	\$ <u>(19,377,010)</u>	<u>58,378</u>	<u>-</u>

(A) This amount is held at the Office of the State Treasurer and is detailed in the report of the Office of the State Treasurer, whose audit is covered by a separate report. Detail specific for the collateral is commingled by the Office of the State Treasurer, and they monitor the adequacy of the funds pledged for collateral to ensure they are fully covered as required by the Laws of the State of New Mexico and related statutes.

(B) Repurchase agreements are collateralized with securities backed by the full faith and credit of the U.S. Government at 102% of maturity value. The repurchase agreement is held in an American Performance Institutional U.S. Treasury Fund. The CUSIP number is 028846848. This fund is cumulative of all New Mexico State agency funds collateralized by the Bank of Albuquerque.

Notes to the Schedule of Expenditures of Federal Awards

GENERAL

The accompanying Supplemental Schedule of Expenditures of Federal Awards presents the activities of all federal awards of the Department.

BASIS OF ACCOUNTING

The accompanying Supplemental Schedule of Expenditures of Federal Awards is presented using the modified accrual basis of accounting, which is described in Note 1 to the Department's general purpose financial statements.

NON-CASH ASSISTANCE

The Department did not receive any federal non-cash assistance during the year ended June 30, 2008.

**REPORT ON INTERNAL CONTROL
OVER FINANCIAL REPORTING AND
ON COMPLIANCE AND OTHER
MATTERS BASED ON AN AUDIT OF
FINANCIAL STATEMENTS PERFORMED
IN ACCORDANCE WITH *GOVERNMENT
AUDITING STANDARDS***

State of New Mexico
Energy, Minerals, and Natural Resources Department and
Mr. Hector H. Balderas
New Mexico State Auditor

We have audited the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of State of New Mexico Energy, Minerals and Natural Resources Department (Department) as of and for the year ended June 30, 2008. We also have audited the financial statements of each of the Department's non-major governmental and fiduciary funds, presented as supplementary information in the combining and individual fund financial statements and schedules as of and for the year ended June 30, 2008, and have issued our report thereon dated December 11, 2008. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the Department's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the County's internal control over financial reporting.

Our consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph, and would not necessarily identify all deficiencies in internal control over financial reporting that might be significant deficiencies or material weaknesses. However, as discussed below, we identified certain deficiencies in internal control over financial reporting that we consider to be significant deficiencies.

Energy, Minerals, and Natural Resources Department and
Mr. Hector H. Balderas
New Mexico State Auditor

Internal Control Over Financial Reporting - continued

A **control deficiency** exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A **significant deficiency** is a control deficiency, or a combination of control deficiencies, that adversely affects the Department's ability to initiate, authorize, record, process or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the Department's financial statements that is more than inconsequential will not be prevented or detected by the Department's internal control. We consider the deficiencies described in the accompanying schedule of findings and questioned costs to be significant deficiencies in internal control over financial reporting. Significant deficiencies are described in the accompanying schedule of findings and questioned costs as item 08-02.

A **material weakness** is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the Department's internal control.

Our consideration of the internal control over financial reporting was for the limited purpose described in the first paragraph of this section, and would not necessarily identify all deficiencies in the internal control that might be significant deficiencies and, accordingly, would not necessarily disclose all significant deficiencies that are considered to be material weaknesses. However, of the significant deficiencies described above, we consider none of the items to be material weaknesses.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Department's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of immaterial noncompliance and other matters that are required to be reported under *Government Auditing Standards*.

We noted certain immaterial instances of non-compliance, which are described in the accompanying schedule of findings and questioned costs as item 08-01.

State of New Mexico
Energy, Minerals, and Natural Resources Department and
Mr. Hector H. Balderas
New Mexico State Auditor

Compliance and Other Matters - continued

The Department's responses to the findings identified in our audit are described in the accompanying schedule of findings and responses. We did not audit the Department's responses and, accordingly, we express no opinion on them.

This report is intended solely for the information and use of the management of the Department, the New Mexico Office of the State Auditor, the New Mexico Legislature, the New Mexico Department of Finance and Administration, and federal awarding agencies and pass-through entities, and is not intended to be and should not be used by anyone other than these specified parties.

Mayneiro + Company, LLC

December 11, 2008

**REPORT ON COMPLIANCE WITH
REQUIREMENTS APPLICABLE TO
EACH MAJOR PROGRAM AND
INTERNAL CONTROL OVER
COMPLIANCE IN ACCORDANCE
WITH OMB CIRCULAR A-133**

State of New Mexico
Energy, Minerals, and Natural Resources Department and
Mr. Hector H. Balderas
New Mexico State Auditor

Compliance

We have audited the compliance of the State of New Mexico Energy, Minerals and Natural Resources Department (Department), with the types of compliance requirements described in the *U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement* that are applicable to each of its major federal programs for the year ended June 30, 2008. The Department's major federal programs are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts and grants applicable to each of its major federal programs is the responsibility of the Department's management. Our responsibility is to express an opinion on the Department's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the Department's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination on the Department's compliance with those requirements.

In our opinion, the Department complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended June 30, 2008.

State of New Mexico
Energy, Minerals, and Natural Resources Department and
Mr. Hector H. Balderas
New Mexico State Auditor

Internal Control over Compliance

The management of the Department is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts and grants applicable to federal programs. In planning and performing our audit, we considered the Department's internal control over compliance with the requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Department's internal control over compliance.

A **control deficiency** in an entity's internal control over compliance exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect noncompliance with a type of compliance requirement of a federal program on a timely basis. A **significant deficiency** is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to administer a federal program such that there is more than a remote likelihood that noncompliance with a type of compliance requirement of a federal program that is more than inconsequential will not be prevented or detected by the entity's internal control.

A **material weakness** is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that material noncompliance with a type of compliance requirement of a federal program will not be prevented or detected by the entity's internal control.

Our consideration of the internal control over compliance was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above.

This report is intended solely for the information and use of the management of the Department, the New Mexico Office of the State Auditor, the New Mexico Legislature, the New Mexico Department of Finance and Administration, and federal award agencies and pass-through entities, and is not intended to be and should not be used by anyone other than these specified parties.

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Schedule of Findings and Questioned Costs

YEAR ENDED JUNE 30, 2008

A. SUMMARY OF AUDIT RESULTS

1. The auditors' report expresses an unqualified opinion on the basic financial statements of the New Mexico Energy, Minerals, and Natural Resources Department (Department).
2. There were no instances of noncompliance material to the financial statements disclosed during the audit of the Department.
3. There were two_ control deficiencies identified, of which none are considered to be material weaknesses to the financial statements of the Department.
4. There were no control deficiencies over the internal control over major programs identified that were material weaknesses.
5. There were no audit findings that the auditor is required to report under 510(a) of Circular A-133.
6. The auditors' report on compliance for the major federal award programs for the Department expresses an unqualified opinion.
7. There were no audit findings that the auditor is required to report under 510(a) of Circular A-133.
8. The programs tested as the major programs included:

U.S. Department of Interior:	
Office of Surface Mining – Administration and Enforcement	10.664
National Park Service – Land and Water	15.916
U.S. Department of Homeland Security:	
U.S. Coastguard Boating Safety Program	97.012
U.S. Department of Transportation:	
Federal Highway Administration – National Trails Act	20.219
Various Agencies:	
Reimbursements for Emergency Fires	10.XXX
9. The threshold for distinguishing Types A and B programs was \$484,461.
10. The Department was determined to be a low-risk auditee.

AND NATURAL RESOURCES DEPARTMENT

Schedule of Findings and Questioned Costs - continued

B. FINDINGS - FINANCIAL STATEMENT AUDIT

08-01 MISSING PAYROLL DOCUMENTATION

Condition: In one out of the 40 employee files tested, it was noted that the file was missing a W4 form and PERA contribution form.

Criteria: Personnel files must contain a W4 form and a signed PERA form for every employee (Section 10-9-10, NMSA 1978).

Cause: Management/department oversight.

Effect: This oversight could result in improper payroll deductions.

Recommendation: We recommend that the Department ensure that PERA contribution forms and W4 forms are kept in the personnel files for all employees.

Management's Response: Sophia Barnett transferred to the Department on July 22, 2000, from the Public Defender's Office. Her original W-4 and PERA Application would have been in her file at the Public Defender's Office. The Public Defender's Office did not send her personnel file to the Department when she transferred. We have, since 2000, changed our internal transfer procedure to include "Receiving the Personnel File from the Transferring Agency" on our transferring Checklist. We apparently neglected to follow this procedure when processing the paperwork for this individual.

The HR Bureau's specific responsibilities were met. The PERA application was the responsibility of the "hiring agency" and the Department was not the hiring agency for Ms. Barnett. The same can be said for the W-4; since Ms. Barnett did not have a change, there was not a need for her to complete a new form. However, we recognize the need for our custody of these forms.

We have alerted all HR personnel of this problem and have reinforced the necessity for verification and follow up of receipt of the personnel file from the transferring agency.

07-03 MONITORING OF CONCESSIONAIRE CONTRACTS

Condition: A concessionaire did not pay the proper amount of commissions to EMNRD in three of the twelve months tested, resulting in a shortage of approximately \$1,900 in commissions.

Criteria: The contract between EMNRD and Sports Adventure requires 7% commission to be paid to EMNRD on all revenues.

Cause: A mathematical error in the report sent to EMNRD understated commissions due. EMNRD did not properly monitor the report filed by the concessionaire.

STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT

Schedule of Findings and Questioned Costs - continued

B. FINDINGS - FINANCIAL STATEMENT AUDIT - continued

07-03 MONITORING OF CONCESSIONAIRE CONTRACTS - continued

Effect: The lack of monitoring on the report resulted in EMNRD not receiving the proper amount of revenue per the contract.

Recommendation: We recommend the Department monitor all concessionaire contracts, and recalculate the reports submitted to EMNRD to ensure completeness of commission revenue

Management's Response: The New Mexico State Parks Business Enterprise Coordinator position, which oversees and manages all Parks Concessionaire Contracts, was vacated in FY08 and the planned review and modification of the New Mexico State Parks Concessionaire Inspection Guidelines was never completed. This included new guidelines/procedures for the annual internal audit of the concessionaire's financial reporting requirements. The Business Enterprise Coordinator position was recently filled and yearly financial inspection audits, as well as a thorough review of the concessionaire's annual reports, have been scheduled.

The New Mexico State Parks Division did assure in FY08 that individual concession contracts were provided and on file at each corresponding State Park location. Park Managers and/or Superintendents did conduct quarterly on-site inspections to ensure compliance with the physical and program components of all concession contracts.

**C. FINDINGS AND QUESTIONED COSTS - MAJOR FEDERAL AWARD PROGRAMS
AUDIT**

None.

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Summary Schedule of Prior Year Audit Findings

- 07-01 Reconciliation of Agency Interest in State Investment Pool – Resolved
- 07-02 SHARE Journal Entries – Resolved
- 07-03 Monitoring of Concessionaire Contracts – Revised and restated
- 07-04 Cash Receipts Procedures – Resolved
- 07-05 Untimely Reversion – Resolved
- 07-06 Audit Report Submitted Late – Resolved
- 07-07 Subrecipient Monitoring – Resolved

**STATE OF NEW MEXICO ENERGY, MINERALS,
AND NATURAL RESOURCES DEPARTMENT**

Exit Conference

An exit conference was held with the Department on December 11, 2008. The conference was held at the Department's offices in Santa Fe, New Mexico. In attendance were:

ENERGY, MINERALS, AND NATURAL RESOURCES DEPARTMENT

JoAnna Prukop, Cabinet Secretary
Sandra Haug, Administrative Services
Kim Keahbone, CPA, Chief Financial Officer

MEYNER + COMPANY, LLC

Janet Pacheco-Morton, CPA, CGFM, Assurance Senior Manager
Kyle McGuire, Assurance Senior
Jason Shaw, Assurance Staff

PREPARATION OF FINANCIAL STATEMENTS

The financial statements presented in this report have been prepared by the independent auditor. However, they are the responsibility of management, as addressed in the Independent Auditors' Report.
